However this book demonstrates that this transnational engagement not only facilitated China's broader transition to socialist modernity but also generated unintended consequences that outlasted the propaganda. Drawing on archival findings, newspapers, magazines, media productions and oral interview, the book delves into changes in Chinese popular imagination and everyday aesthetics contingent upon Soviet influence. It proposes a revisionist view of the Soviet impact on China, revealing that Soviet culture offered Chinese people the language and imagery to conceive of their future as a dream about material abundance, self-determination and the pleasures of leisure and cultural enrichment. Written with a transnational interdisciplinary and thematic approach, this book is aimed at scholars and students in the fields of Sino-Soviet relations, international socialism, modern Chinese history, cultural studies and mass communication. It will also be of interest to researchers seeking to understand the nature, significance and repercussions of Sino-Soviet cultural engagement.

The Global Lincoln Richard Carwardine, Jay Sexton, 2011-02-01. Perhaps more than any other American, Abraham Lincoln has become a global figure, one who spoke and continues to speak to people across the world. Karl Marx judged Lincoln the single-minded son of the working class. Tolstoy reported his fame in the Caucasus. Tomas Masaryk, the first president of Czechoslovakia, drew strength as the Lincoln of Central Europe. Racially mixed republican Lincoln brigades fought in the Spanish Civil War, and more recently, statesmen ranging from Gordon Brown to Pervez Musharraf to Barack Obama have invoked Lincoln in support of their respective agendas. This fascinating volume brings together leading historians from around the world to explore Lincoln's international legacy. The authors examine the meaning and image of Lincoln in many places and across continents, ranging from Germany to Japan, India to Ireland, Africa and Asia to Argentina and the American South. The book reveals that at the heart of Lincoln's global celebrity were his political principles, his record of successful executive leadership in wartime, his role as the Great Emancipator and his resolute defense of popular government. Yet the Global Lincoln has been a malleable and protean figure, one who is forever being redefined to meet the needs of those who invoke him. The first study of Lincoln's global legacy, this book tells the unknown and remarkable story of the world-wide impact of one of America's great presidents.

Modernisation of Chinese Culture Jana S. Rošker, Nataša Vampelj Suhadolnik, 2014-09-26. The editors are grateful to the Chiang Ching-kuo Foundation for its generous support of their research work, which enabled them to publish the present book. The present book carefully maps the Chinese modernisation discourse, highlighting its relationship to other similar discourses and situating it within historical and theoretical contexts. In contrast to the majority of recent discussions of a Chinese development model that tend to focus more on institutional than cultural factors and are more narrowly concerned with economic matters than overall social development, the book offers several important focal points for many presently overlooked issues and dilemmas. The multifaceted perspectives contained in this anthology are not limited to economic, social and ecological issues but also include political and social functions of ideologies and culturally conditioned values representing the axial epistemological grounds of modern Chinese society. 2011

was the 100th anniversary of the Xinhai Revolution The centennial is relevant not only in terms of state ideology but also plays a significant role within academic research into Chinese society and culture This historic turning point likewise represents the symbolic and concrete linkages and tensions between tradition and modernity progress and conservatism traditional values and the demands for adjustment to contemporary societies The book shows that Chinese transition from tradition to modernity cannot be understood in a framework of a unified general model of society but rather through a more complex insight into the interrelations among elements of physical environment social structure philosophy history and culture
