Class and Colonialism in Antarctic Exploration, 1750-1920 Ben Maddison,2015-10-06

Between 1750 and 1920 over 15 000 people visited Antarctica. Despite such a large number, the historiography has ignored all but a few celebrated explorers. Maddison presents a study of Antarctic exploration, telling the story of these forgotten facilitators; he argues that Antarctic exploration can be seen as an offshoot of European colonialism. **An Urban Profile of the Middle East** Hugh Roberts,2020-10-07. Changes in economic and social conditions throughout the Middle East have been profound and perhaps nowhere has this been more evident than in the field of urban development and town planning. This book, first published in 1979, provides a view of the Middle East as it undergoes transition by identifying and analysing the symptoms of change.

Normative Economics in the History of Economic Thought Sina Badieli,2024-06-21. This book examines the role of normative economics in the writings of Karl Marx, Ludwig von Mises, Milton Friedman and Karl Popper. The book shows that while distinguishing positive from normative economics can be helpful, this distinction should not minimize the importance of normative economics or reject the possibility of offering objective evaluations of social phenomena and policies in normative economics. The book offers a critical assessment of the attempts by Marx, Mises and Friedman to reduce scientific economics to the positive analysis of social phenomena alone. Through a meticulous analysis of their work, the book shows that their positive theories fail to justify their evaluations of economic phenomena and policies. The book then draws on the writings of Popper to maintain that we should place normative economics at the center of economics. The book argues that normative economics can choose the norms underlying its evaluations of social situations and policies objectively and relies on some of Popper's ideas to offer some criteria that can facilitate the selection of these norms. The book will be of interest to economists, historians of economic thought, philosophers of economics and political theorists and philosophers. Perspectives on

Development P. F. Leeson, Martin Minogue,1988 Marxian Economics: A Reappraisal Riccardo Bellofiore,1998-02-12. Springing from a conference held in Bergamo University on the occasion of the centenary of the publication by Engels of the third book of Capital, the papers collected in these two volumes reinstate Marx's as the first genuinely evolutionary economic theory. In this, the capitalist process incessantly brings about states which will by themselves generate the next ones. Thus, as Schumpeter remarked, Marx was the first to visualise what even at the present time is still the economic theory of the future.

Rethinking Economics Stuart Birks, 2014-08-27 This brief responds to the criticism that mainstream economics is currently facing due to its heavy reliance on models and narrow range of quantitative research techniques It takes a broader view identifying issues that are also relevant for heterodox and pluralist approaches to economics By acknowledging that the world of theory is not the same as the reality that we are trying to understand the brief focuses on three paths that generally receive little attention These are from theory to the real world from theory to empirical analysis and from empirical results to policy application Each path highlights a range of related concerns and qualifications and the focus on these transitions provides a strong basis for critical evaluation of analyses and potentially more realistic results and recommendations It also provides a framework for synthesizing information from alternative schools of thought and across disciplines In addition the importance of framing and rhetoric is demonstrated The brief addresses philosophical and methodological issues using a clear non technical approach that can be easily understood by a non specialist audience The Runaway Economy ,

Modern Economics Jan Pen, Trevor S. Preston, 1969 **Explorations in Marx's Theory of Price—Why Marx Is Still Relevant for Understanding the Modern Economy** Howard Nicholas, 2023-01-01 This book is the first volume in a three volume series that takes an in depth look at the relevance of Marx's economics for understanding the modern economy The focus of this volume is the money prices of commodities In light of the failure of central banks to stimulate inflation through printing of money it is now accepted that there are problems with the mainstream approach to the explanation of prices Howard Nicholas underlines the shortcomings of this and other approaches to the explanation of prices particularly their concepts of the value of the commodity and money He argues the problems with all other approaches are manifest in their inability to explain the changes in the relative prices of commodities taking place in the context of changes in the aggregate money price level as well as independently He contends that of paramount importance in Marx's explanation is that prices are set by producers prior to putting their commodities into the process of circulation undermining the notion they are determined by the supply of and demand for the commodities in the process of exchange Marx's approach to the explanation of prices is also contrasted with those of Neoclassicals Post Keynesians and Sraffa with a view to highlighting the shortcomings in these approaches as bases for their understanding and explanations of money and prices This book will be of interest to academics and students of price theory money and finance political economy and the history of economic thought

Robinson Crusoe's Economic Man Ulla Grapard, Gillian Hewitson, 2012-04-27 In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719 The authors critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural

specificity The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer producer trying to maximize his personal well being Using poststructuralist feminist postcolonial Marxist and literary criticism approaches the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature the political economy of colonization international trade and the pervasive gendered organization of social relations The contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts **Companion to**
