### **Modern English Digest 2003 Issue 11 Med:**

ICU Resource Allocation in the New Millennium David Crippen, 2012-09-14 Intensive care medicine is one of the fastest growing services provided by hospitals and perhaps one of the most expensive. Yet in response to the global financial crisis of the last few years healthcare funding is slowing or decreasing throughout the world. How we manage health care resources in the intensive care unit ICU now and in a future that promises only greater cost constraints is the subject of this book, the third in an informal series of volumes providing a global perspective on difficult issues arising in the ICU. Taking 12 developed countries as their focus, leading experts provide a country by country analysis of current ICU resource allocation. A second group of experts use the chapters as a departure point to analyze current ICU resource allocation at the level of the global medical village. The process is repeated but with an eye toward the future: first country by country, then at the global level that takes into account initiatives and reforms now underway. A fictional healthcare plan, the Fair Equitable Healthcare Plan, is put forth to address weaknesses in existing approaches, and healthcare experts and ethicists are invited to respond to its often provocative provisions. Itself structured as a dialogue, the book is an excellent way to start or to continue serious discussion about the allocation of ICU healthcare resources now and in the years ahead. *Serials in the British Library*

, 2007 **Integrating Plain English into Writing Activities in the PhD Language Programme** Monika Śleszyńska, 2025-09-04 This book explores the intersection of writing theory, language simplification, and academic communication, with a specific focus on integrating plain English into doctoral education. Through five comprehensive chapters, the book discusses essential topics such as the principles of effective writing, the role of clarity and readability in academic texts, and the significance of plain English for enhancing scientific writing skills. Chapter 1 offers an overview of writing theory, emphasizing key concepts that impact the clarity and readability of written texts. Chapter 2 examines the importance of language simplification, particularly in scientific publishing, while Chapter 3 highlights writing challenges in target language classrooms with a focus on writing development. In Chapter 4, the book provides the context for a groundbreaking empirical study justifying the use of plain English in PhD language programmes. Chapter 5 presents detailed data analysis, key findings, and implications for future research, demonstrating how the teaching of plain English enhances doctoral students' writing skills, empowers them as publishable authors, and improves the overall quality of their scientific work. Given the limited research on this topic in Polish educational settings, this book is of interest to scholars and English language teachers in doctoral programmes. **Health Promotion in Midwifery : Principles and practice** Jan

McCue, Meera Balasubramaniam, 2016-10-27 This book provides a comprehensive view of rational

suicide in the elderly a group that has nearly twice the rate of suicide when chronically ill than any other demographic Its frame of reference does not endorse a single point of view about the legitimacy of rational suicide which is evolving across societies with little guidance for geriatric mental health professionals Instead it serves as a resource for both those clinicians who agree that older people may rationally commit suicide and those who believe that this wish may require further assessment and treatment The first chapters of the book provides an overview of rational suicide in the elderly examining it through history and across cultures also addressing the special case of baby boomers This book takes an ethical and philosophical look at whether suicide can truly be rational and whether the nearness of death in late life adults means that suicide should be considered differently than in younger adults Clinical criteria for rational suicide in the elderly are proposed in this book for the first time as well as a guidelines for the psychosocial profile of an older adult who wants to commit rational suicide Unlike any other book this text examines the existential psychological and psychodynamic perspectives A chapter on terminal mental illness and a consideration of suicide in that context and proposed interventions even without a diagnosable mental illness also plays a vital role in this book as these are key issues in within the question of suicide among the elderly This book is the first to consider all preventative measures including the spiritual as well as the psychotherapeutic and pharmacologic A commentary on modern society aging and rational suicide that ties all of these elements together making this the ultimate guide for addressing suicide among the elderly Rational Suicide in the Elderly is an excellent resource for all medical professionals with potentially suicidal patients including geriatricians geriatric and general psychiatrists geriatric nurses social workers and public health officials *Endocrine Pathology with Online*
