Modern Garden Design Innovation Since 19:

The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals *The Greening of London, 1920-2000* Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities Modern Hospice Design Ken Worpole, 2023-09-29 The new edition of this acclaimed book comprehensively updates its timely advocacy of the need for good quality palliative care today more necessary than ever Rooted in the social history of the care of the elderly and terminally ill *Modern Hospice Design The Architecture of Palliative and Social Care* takes cognisance of the new conditions of social care in the 21st century principally in the UK Europe and North America It does so with regard to the development of new building types but also in response to new

philosophies of palliative care and the status of the elderly and the dying Benefitting from a clearer methodological approach and conceptual framework the expanded book allows a broad section of readers to navigate the text more easily At its core is a public discussion of a philosophy of design for providing care for the elderly and the vulnerable taking the importance of architectural aesthetics the use of quality materials the porousness of design to the wider world and the integration of indoor and outdoor spaces as part of the overall care environment In doing so it advocates care settings that in the words of Maggie Jencks whose life and ideas inspired the Maggie s Centres rise to the occasion Including new chapters and new in depth case studies complete will full colour illustrations this book is for architects and interior designers and their students healthcare professionals social care providers estate and facility managers hospital administrators and Healthcare Trust Boards

Since Meiji J. Thomas Rimer, 2011-10-31 Research outside Japan on the history and significance of the Japanese visual arts since the beginning of the Meiji period 1868 has been with the exception of writings on modern and contemporary woodblock prints a relatively unexplored area of inquiry In recent years however the subject has begun to attract wide interest As is evident from this volume this period of roughly a century and a half produced an outpouring of art created in a bewildering number of genres and spanning a wide range of aims and accomplishments Since Meiji is the first sustained effort in English to discuss in any depth a time when Japan eager to join in the larger cultural developments in Europe and

the U S went through a visual revolution Indeed this study of the visual arts of the nineteenth and twentieth centuries suggests a fresh history of modern Japanese culture one that until now has not been widely visible or thoroughly analyzed outside that country In this extensive collection which includes some 190 black and white and color reproductions scholars from Japan Europe Australia and America explore an impressive array of subjects painting sculpture prints fashion design crafts and gardens The works discussed range from early Meiji attempts to create art that referenced Western styles to postwar and contemporary avant garde experiments There are in addition substantive investigations of the cultural and intellectual background that helped stimulate the creation of new and shifting art forms including essays on the invention of a modern artistic vocabulary in the Japanese language and the history of art criticism in Japan as well as an extensive account of the career and significance of perhaps the best known Japanese figure concerned with the visual arts of his period Okakura Tenshin 1862 1913 whose Book of Tea is still widely read today Taken together the essays in this volume allow readers to connect ideas and images thus bringing to light larger trends in the Japanese visual arts that have made possible the vitality range and striking achievements created during this turbulent and lively period Contributors Stephen Addiss Chiaki Ajioka John Clark Ellen Conant Mikiko Hirayama Michael Marra Jonathan Reynolds J Thomas Rimer Audrey Yoshiko Seo Eric C Shiner Lawrence Smith Shuji Tanaka Reiko Tomii Mayu Tsuruya Toshio Watanabe Gennifer Weisenfeld Bert Winther Tamaki Emiko Yamanashi **Gardens by the Bay** David A. A Landscape of Architecture, History and Fiction Jonathan Hill, 2015-12-22 Architecture can be analogous to a history a fiction and a landscape We expect a history or a novel to be written in words but they can also be cast in concrete or seeded in soil The catalyst to this tradition was the simultaneous and interdependent emergence in the eighteenth century of new art forms the picturesque landscape the analytical history and the English novel Each of them instigated a creative and questioning response to empiricism s detailed investigation of subjective experience and the natural world and together they stimulated a design practice and lyrical environmentalism that profoundly influenced subsequent centuries Associating the changing natural world with journeys in self understanding and the design process with a visual and spatial autobiography this book describes journeys between London and the North Sea in successive centuries analysing an enduring and evolving tradition from the picturesque and romanticism to modernism Creative architects have often looked to the past to understand the present and imagine the future Twenty first century architects need to appreciate the shock of the old as well as the shock of the new

XV International Scientific Conference
“INTERAGROMASH 2022” Alexey Beskopylny, Mark Shamtsyan, Viktor Artiukh, 2023-02-24 The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022 Rostov on Don Russia This conference is dedicated to the innovations in the field of precision agriculture robotics and machines as well as agriculture biotechnologies and soil management It is a collection of original and fundamental research in such areas as follows unmanned aerial systems satellite based applications proximal and remote sensing of soil and crop positioning systems geostatistics mapping and spatial data analysis robotics and automation Potential and prospects for the use of hydrogen in agriculture for example in

high performance tractors with hybrid electric transmission are disclosed in the research works of scientists from all over the world. It also includes such topics as precision horticulture, precision crop protection, differential harvest, precision livestock farming, controlling environment in animal husbandry and other topics. One of the important issues raised in the book is to ensure the autonomy of local farms. The topic of the impact of the agro-industrial sector on the environment also received wide coverage. Ways to reduce the burden on the environment are proposed and the use of alternative fuels and fertilizers is suggested. The research results presented in this book cover the experience and the latest studies on the sustainable functioning of agribusiness in several climatic zones: The tundra and taiga forest steppe, the steppe and semi-desert. All this is a unique and incredibly demanded bank of information, the main value of which is the real experience of the functioning of agribusiness in difficult climatic and geographic conditions. These materials are of interest for professionals and practitioners, for researchers, scholars and producers. They are used in the educational process at specific agricultural universities or during vocational training at enterprises and also become an indispensable helper to farm managers in making the best agronomic decisions.
