Modern Hieroglyphs Patricia G. Berman, Davis Museum and Cultural Center, 1994 *Expressionism and Poster Design in Germany 1905-1922* Kathleen G. Chapman, 2019-01-21 In *Expressionism and Poster Design in Germany 1905-1922* Kathleen Chapman re defines Expressionism by situating it in relation to the most common type of picture in public space during the Wilhelmine twentieth century the commercial poster Focusing equally on visual material and contemporaneous debates surrounding art posters and the image in general this study reveals that conceptions of a modern image were characterized not so much by style or mode of production and distribution but by a visual rhetoric designed to communicate more directly than words As instances of such rhetoric Expressionist art and posters emerge as equally significant examples of this modern image demonstrating the interconnectedness of the aesthetic the utilitarian and the commercial in European modernism **Archaeologies of Modernity** Rainer Rumold, 2015-06-22 *Archaeologies of Modernity* explores the shift from the powerful tradition of literary forms of Bildung the education of the individual as the self to the visual forms of Bildung from Bild that characterize German modernism and the European avant garde Interrelated chapters examine the work of Franz Kafka Jean Hans Arp Walter Benjamin and Carl Einstein and of artists such as Oskar Kokoschka or Kurt Schwitters in the light of the surge of an autoformation Bildung of verbal and visual images at the core of expressionist and surrealist aesthetics and the art that followed In this first scholarly focus on modernist avant garde Bildung in its entwinement of conceptual modernity with forms of the archaic Rumold resituates the significance of the poet and art theorist Einstein and his work on the language of primitivism and the visual imagination *Archaeologies of Modernity* is a major reconsideration of the conception of the modernist project and will be of interest to scholars across the disciplines **German Expressionism** Museum of Modern Art (New York, N.Y.), Starr Figura, Peter Jelavich, 2011 Catalog of an exhibition held at the Museum of Modern Art New York Mar 27 July 11 2011 **Women Artists in Expressionism** Shulamith Behr, 2022-11-15 A beautifully illustrated examination of the women artists whose inspired search for artistic integrity and equality influenced Expressionist avant garde culture *Women Artists in Expressionism* explores how women negotiated the competitive world of modern art during the late Wilhelmine and early Weimar periods in Germany Their stories challenge predominantly male oriented narratives of Expressionism and shed light on the divergent artistic responses of women to the dramatic events of the early twentieth century Shulamith Behr shows how the posthumous critical reception of Paula Modersohn-Becker cast her as a prime agent of the feminization of the movement and how K the Kollwitz used printmaking as a vehicle for technical innovation and sociopolitical commentary She looks at the dynamic relationship between Marianne Werefkin and Gabriele Mnter whose different paths in life led them to the Blaue Reiter a group of Expressionist artists that included Wassily Kandinsky and Paul Klee Behr examines Nell Walden's role as an influential art dealer collector and artist who promoted women Expressionists during the First World War and discusses how Dutch artist Jacoba van Heemskerck's spiritual

abstraction earned her the status of an honorary German Expressionist. She demonstrates how figures such as Rosa Schapire and Johanna Ey contributed to the development of the movement as spectators, critics, and collectors of male avant-gardism. Richly illustrated *Women Artists in Expressionism* is a women-centered history that reveals the importance of emancipative ideals to the shaping of modernity and the avant-garde.

Drawing from the Modern: 1880-1945 Jodi Hauptman, Museum of Modern Art (New York, N.Y.), 2004. While art history has made room for the flurry of movements that emerged in the period following World War II, the myriad artistic developments of the last thirty years have yet to be assigned firm historical categories. *Drawing from the Modern* 1975-2005, the final installment in a series of inaugural year exhibitions produced by the Department of Drawings, attempts to tell a provisional story of the years from 1975 to the present as reflected through MoMA's singular drawings collection. While making no claims to comprehensiveness, the installation details both the blossoming of different art positions on a broad international scale in this era and the coming of age of drawing as an independent and for many artists, primary mode of expression. Organized chronologically and in loose clusters of artists working in the same milieu or vein of interest, the exhibition features works by more than fifty artists, including Bruce Nauman, Gerhard Richter, Martin Kippenberger, Marlene Dumas, Gabriel Orozco, Kara Walker, and Luc Tuymans.

Henri Michaux Nina Parish, 2007. Henri Michaux is both a recognized poet and visual artist, arguably one of the greatest double artists of the twentieth century. This book presents the first detailed examination of a particular interdisciplinary aspect of his production, namely, the innovative experimentation with signs contained in four works: *Mouvements*, *Par la voie des rythmes*, *Saisir*, and *Par des traits*. Questions arise concerning their literary and visual status as, in their attempt to render interior rhythm and dynamism, they occupy an interstitial space between writing and drawing, between the book and the canvas, between the Western alphabet and Chinese characters. This study addresses these questions by analysing the conception, production, and reception of Michaux's signs and the literary and artistic contexts in which they were produced.

Kirchner and the Berlin Street Deborah Wye, Ernst Ludwig Kirchner, Museum of Modern Art (New York, N.Y.), 2008. Ernst Ludwig Kirchner's remarkable series of paintings known as the Berlin Street Scenes is a highpoint of the artist's work and a milestone of German Expressionism, widely seen as a metaphor for modernity itself through their depiction of life in a major metropolis. Kirchner moved from Dresden to Berlin in 1911, and it was in this teeming city, immersed in its vitality, decadence, and underlying sense of danger posed by the imminent World War I, that he created the Street Scenes in a sustained burst of creative energy and ambition between 1913 and 1915. As the most extensive consideration of these paintings in English, this richly illustrated volume examines the creative process undertaken by the artist as he explores his theme through various mediums and presents the major body of related charcoal, drawings, pen and ink studies, pastels, etchings, woodcuts, and lithographs he created in addition to the paintings. The volume also investigates

the significance of the streetwalker as a primary motif and provides insight on the series in the context of Kirchner's wider oeuvre

Drawing, 1994 Egon Schiele Egon Schiele, 2005 Egon Schiele 1890-1918 was one of the greatest artists of the twentieth century. A superb draftsman and colorist, he produced images of startling emotional power. Following the lead of his mentor Gustav Klimt, Schiele created figurative works of uncanny intimacy and brought a new openness to the art of his time. Schiele's death at the age of 28 has added a mythic quality to his artistic achievements. This publication accompanies the exhibition *Egon Schiele: The Ronald S. Lauder and Serge Sabarsky Collections*, which presents paintings and drawings from the collections of the co-founders of Neue Galerie New York. Together, these collections comprise the finest gathering of works by Schiele in the United States. Essays examine the artist's reception history in America and Austria, the censorship of his art during and after his lifetime, and the lost Schiele collections. This publication also traces for the first time Schiele's enormous influence on contemporary culture. A Material History of Medieval and Early Modern Ciphers Katherine Ellison, Susan Kim, 2017-09-14 The first cultural history of early modern cryptography, this collection brings together scholars in history, literature, music, the arts, mathematics, and computer science who study ciphering and deciphering from new materialist, media studies, cognitive studies, disability studies, and other theoretical perspectives. Essays analyze the material forms of ciphering as windows into the cultures of orality, manuscript, print, and publishing, revealing that early modern ciphering and the complex history that preceded it in the medieval period not only influenced political and military history but also played a central role in the emergence of the capitalist media state in the West, in religious reformation, and in the scientific revolution. Ciphered communication, whether in etched stone and bone, in musical notation, in runic symbols, polyalphabetic substitution, algebraic equations, graphic typographies, or literary metaphors, took place in contested social spaces and offered a means of expression during times of political, economic, and personal upheaval. Ciphering shaped the early history of linguistics as a discipline and it bridged theological and scientific rhetoric before and during the Reformation. Ciphering was an occult art, a mathematic language, and an aesthetic that

influenced music sculpture painting drama poetry and the early novel This collection addresses gaps in cryptographic history but more significantly through cultural analyses of the rhetorical situations of ciphering and actual solved and unsolved medieval and early modern ciphers it traces the influences of cryptographic writing and reading on literacy broadly defined as well as the cultures that generate resist and require that literacy This volume offers a significant contribution to the history of the book highlighting the broader cultural significance of textual materialities *Pioneers and Exiles* Indiana University, Bloomington.
