Proof, Evidence and Hate Crime Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

California Law Review, 1915 **The Principles and Practice of the Law of Evidence** Edmund Powell, 1869 **Improperly Obtained Evidence in Anglo-American and Continental Law** Dimitrios Giannouloupoulos, 2019-02-21 This is the first book to offer an extensive cosmopolitan cross cultural insight into the perennial controversy over the use of improperly obtained evidence in criminal trials It challenges the conventional view that exclusionary rules are idiosyncratic of Anglo American law and highlights the constitutionalisation and internationalisation of criminal evidence and procedure as a cause of rapprochement or divergence beyond the Anglo American and Continental law divide Analysis focuses on confessional evidence and evidence obtained by search and seizure telephone interceptions and other means of electronic surveillance The laws of England and Wales France Greece and the United States are systematically compared and contrasted throughout this study but where appropriate analysis extends to other Anglo American and Continental legal systems The book reviews exclusionary rules vis vis the operation of judicial discretion and explores the normative justifications that underpin them It attempts to reinvigorate the idea of excluding evidence to protect constitutional or human rights the rights thesis arguing that there is significant scope for Anglo American and Continental legal systems to place a renewed emphasis on it particularly in relation to confessional evidence obtained in violation of custodial interrogation rights we can locate an emerging rapprochement and unique potential for European Court

of Human Rights jurisprudence to build consensus in this respect In marked contrast remaining divergence with regard to evidence obtained by privacy violations means there is little momentum to adopt a reinvigorated rights thesis more widely Longlisted for the Inner Temple Book Prize 2022
