After Postmodernism Richard Smith, Philip Wexler, 2005-09-27 This work presents a set of thematic essays aimed at clarifying the educational problems and paradoxes of postmodern educational conditions and theory The major concerns of the book are the possibility of achieving substantive political objectives and of theorising such possibilities These concerns arise from a dissatisfaction with the organisational and political conditions of postmodern educational practice The seeming inability of academics to intervene in the public sector especially in matters of equality provides a driving force to the book For individuals who care about the future of education and its role in social reconstruction the pessimistic nature of postmodern theories of society and education is an additional impetus for the book All the chapters exemplify the issues that confront lecturers in contemporary university teacher education contexts A notable feature of the book is a theme that current theorisation about education and society are historically outmoded and that the future lies in post postmodern theories

Mystical Society Philip Wexler, 2018-03-05 In *Mystical Society* Philip Wexler a well known critical theorist with a background in social psychology and a special interest in spirituality examines the revitalization of spirituality manifesting itself in society and in education Describing what he calls cultural changes toward the sacred he documents a cultural shift brought about by technological and societal changes toward a new mysticism Wexler explores the meaning for this new spirituality for our daily lives for social theory and for education From the pervasiveness of a spiritual vernacular to the integration of spiritual practices into our highly individualized and technologized lives Wexler lays out the evidence for a growing movement and then draws parallels to periods of mystical revitalization from the past In the course of this discussion he draws on the work of Marx Weber and Durkheim as well as from contemporary social theory

Balancing Acts James Conklin, 2021-07-30 *Balancing Acts* offers consultants and managers a simple powerful way to think about change and ascribes a four phase iterative process for implementing change Reviewing change initiatives from different types of organizations *Balancing Acts* confronts the problems and pitfalls head on that often arise during workplace transitions Conklin explains why organizational change can be so difficult and shows that by balancing a set of competing psychological and systemic challenges interveners will increase their chance of success Conklin shows that human groups function as complex systems and that a change initiative

is not a linear progression toward a predefined result. Instead, change is an iterative process that involves a search for feasible and useful solutions. The book's central argument is that while leading or supporting this search, consultants and leaders must balance four critical concerns: confrontation and compassion, participation and observation, assertion and inquiry, and planfulness and emergence.

Symbolic Movement Philip Wexler, 2008-01-01 This is a book about sociology of education past, present, and future. In the first section, the author chronicles and specifies the changes in the field in a reflexive sociology of education, tracing the path out of liberalism through radicalism and postmodernism to an emergent new age stance in understanding education in society. Section two looks in more detail how these movements have actually worked in education and society. The third section places the historical macrosocial analysis of education and society on the smaller, more everyday screen of school life. Based on the author's studies in high school, the question of identity and education is the fulcrum for a series of concrete studies or school portraits which connect public social change and more personal everyday life and identity with the social process of schooling. The final section probes the new age theme. Questions of spirituality, rationality, magic, mysticism, and sublimation are related to changes both in education and in sociology of education. What does it mean to do educational research in a re-sacralized mystical society? And does a new theory of sociology of education emerge on a Weberian rather than Durkheimian functionalist or Marxist radical view of the directions and reversals that begin in modernity and become more evident in our times.

Ballano, 2024-04-30 Does the current celibate semi monastic and all male seminary formation contribute to the persistence of clerical sexual abuse in the Roman Catholic Church Applying sociological theories on socialization total institutions and social resistance as the primary conceptual framework and drawing on secondary literature media reports the author s experience interviews and Church documents this book argues that the Catholic Church s institution of the celibate seminary formation as the only mode of clerical training for Catholic priests has resulted in negative unintended consequences to human formation such as the suspension of normal human socialization in society psychosexual immaturity and weak social control against clerical sexual

abuse The author thus contends that celibate training while suitable for those who do live in religious or monastic communities is inappropriate for those who are obliged to live alone and work in parishes As such an alternative model for diocesan clerical formation is advanced A fresh look at the aptness and effects of celibate formation for diocesan clergy this volume is the first to relate the persistence of Catholic clerical sexual abuse to celibate seminary formation exploring the structural links between the two using sociological arguments and proposing an apprenticeship based model of formation which has numerous advantages as a form of clerical training It will therefore appeal to scholars and students of religion sociology and theology as well as those involved with seminary formation
