Rethinking Global Modernism Vikramaditya Prakash,Maristella Casciato,Daniel E. Coslett,2021-11-22 This anthology collects developing scholarship that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks By both revisiting the canons of modernism and seeking to decolonize and globalize those canons the volume explores what a genuinely global history of architectural modernism might begin to look like Its chapters explore the historiography and weaknesses of modernism's normative interpretations and propose alternatives to them The collection offers essays that interrogate transnationalism in new ways reconsiders the agency of the subaltern and the roles played by infrastructures materials and global institutions in propagating a diversity of modernisms internationally Issues such as colonial modernism architectural pedagogy cultural imperialism and spirituality are engaged With essays from both established scholars and up and coming researchers this is an important reference for a new understanding of this crucial and developing topic

Housing, Architecture and the Edge Condition Ellen Rowley,2018-11-02 This book presents an architectural overview of Dublin's mass housing building boom from the 1930s to the 1970s During this period Dublin Corporation built tens of thousands of two storey houses developing whole communities from virgin sites and green fields at the city's edge while tentatively building four storey flat blocks in the city centre Author Ellen Rowley examines how and why

this endeavour occurred Asking questions around architectural and urban obsolescence she draws on national political and social histories as well as looking at international architectural histories and the influence of post war reconstruction programmes in Britain or the symbolisation of the modern dwelling within the formation of the modern nation Critically the book tackles this housing history as an architectural and design narrative It explores the role of the architectural community in this frenzied provision of housing for the populace Richly illustrated with architectural drawings and photographs from contemporary journals and the private archives of Dublin based architectural practices this book will appeal to academics and researchers interested in the conditions surrounding Dublin s housing history Building the New World Valerie Fraser,2000 Brasilia Caracas Mexico City Rio de Janeiro these are cities synonymous with some of the most innovative and progressive architecture of the twentieth century The period between 1930 and 1960 in particular when many Latin American economies expanded rapidly was an era of incomparable inventiveness and creative production as the various governments strove to shake off their colonial pasts and make public their modernising intentions This book focuses on major state funded architectural projects featuring not only the high profile prestigious building like the House of Representatives in Brasilia but also social architecture such as schools and low cost housing developments Architects like Pani Costa Reidy and Niemeyer who undertook this work with considerable autonomy and significant financial resources in effect became social planners their avant garde aesthetic and technical experimentation often being teamed with radical social agendas By 1960 the year in which Brasilia was inaugurated economic growth in the region was slowing and faith in the modernist project in general was faltering The English speaking world which had previously endorsed and even envied Latin American architectural production changed its opinion and largely dismissed it from the history of twentieth century architecture Building the New World redresses the balance It provides an accessible introduction to the most important examples of state funded modernism in Latin America during a period of almost unimaginable optimism when politicians and architects saw architecture as literally a way of building themselves out of underdevelopment and into the new world of a culturally rich and socially inclusive future **Skyscraper** Benjamin Flowers,2012-02-25 Selected by Choice magazine as an Outstanding Academic Title Nowhere in the world is there a greater concentration of significant skyscrapers than in New York City And though this iconographic American building style has roots in Chicago New York is where it has grown into such a powerful reflection of American commerce and culture In Skyscraper The Politics and Power of Building New York City in the Twentieth Century Benjamin Flowers explores the role of culture and ideology in shaping the construction of skyscrapers and the way wealth and power have operated to reshape the urban landscape Flowers narrates this modern tale by closely examining the creation and reception of three significant sites the Empire State Building the Seagram Building and the World Trade Center He demonstrates how architects and their clients employed a diverse range of modernist styles to engage with and influence broader cultural themes in American society immigration the Cold War and the rise of American

global capitalism Skyscraper explores the various wider meanings associated with this architectural form as well as contemporary reactions to it across the critical spectrum Employing a broad array of archival sources such as corporate records architects papers newspaper ads and political cartoons Flowers examines the personal political cultural and economic agendas that motivate architects and their clients to build ever higher He depicts the American saga of commerce wealth and power in the twentieth century through their most visible symbol the skyscraper *Perspectives On Western Art* Linnea Wren,2018-02-22 This anthology of readings related to Western art history explains specific works of art illustrated in Janson s History of Art and De la Croix and Tansey s Gardner s Art Through the Ages in terms of the ideas beliefs and concerns of the people and cultures who created the art It brings a new understanding of art because it shows the social and cultural basis of major works of art through history The ten sections are Ancient Near East Egyptian Aegean Greek Etruscan Roman early Christian Byzantine and Islamic early Medieval Romanesque and Gothic The readings have been drawn from many areas of intellectual and social history including religion philosophy literature science economics and law Each selection is preceded by an introductory note which discusses the readings in terms of its subject and theme its source and usage and its relevance to the study of the work of art The Architecture of Use Stephen Grabow,Kent Spreckelmeyer,2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life **Brazil Built** Zilah Quezado Deckker,2013-09-13 The book constitutes a unique presentation of the major Modern buildings in Brazil in their historical context Prompted by the contemporary revaluation of Modernism and the renewed interest in Brazil this book examines how the buildings came into being how they came to be so highly regarded and the changing reactions to them in Brazil and abroad Jacket **Valences of Historiography** Gevork Hartoonian,2024-12-30 The compiled essays offer various themes and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author s contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian s conjectures towards capturing the past and present zeitgeist Temporality is the theme running

through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture s past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian s interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents Valences of Historiography offers a fresh take on architectural history that is useful for academics researchers and architecture students

Modern Architecture Adam Sharr,2018 Adam Sharr tells the story of how modern architecture developed and produced its powerful cultural images Considering the new building materials and techniques which shaped the movement such as innovations in steel and concrete and the advent of air conditioning he concludes by asking whether contemporary architecture remains modern at heart
