Modern Higher Algebra:

Modern Higher Algebra A. Adrian Albert, 2015-10 This book originally published in 1938 provides a detailed exposition of modern abstract algebra *Lessons Introductory to the Modern Higher Algebra*, 1966 **Lessons Introductory to the Modern Higher Algebra** George Salmon, 1924 Modern Higher Algebra Abraham Adrian Albert, 1936 *Lessons Introductory to the Modern Higher Algebra* George Salmon, 2013-01-28 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy *Lessons Introductory to the Modern Higher Algebra (Classic Reprint)* George Salmon, 2016-11-08 Excerpt from *Lessons Introductory to the Modern Higher Algebra* It may be said to date from a paper published by Professor Boole in the Cambridge Mathematical Journal for November 1841 which was mainly occupied with applications of the following theorem Let an ordinary algebraic equation be made homogeneous by writing a y for 12 let these variables then be linearly transformed by writing $M + pX$ $N + qY$ for x and y and let $V = 0$ be the condition that the transformed equation shall have equal roots then the function V will be equal to the similar function for the original equation multiplied by a function of $A + pN + q^2$ and not involving the coefficients of the original equation The truth of this principle is manifest from the fact that if the original equation have a square factor the transformed must have one likewise that therefore one of the functions in question must vanish whenever the other does and consequently the one must contain the other as a factor and since each of the coefficients of the transformed only contains in the first degree the coefficients of the original the two functions being of the same degree in those coefficients can only differ by a quantity independent of them Similar reasoning applies to functions of any number of variables About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
