B. Stephens, 1981-09-10 English local and regional history has attracted widespread attention in the last twenty five to thirty years Its study has expanded at undergraduate and postgraduate levels in universities polytechnics and at other institutions of higher education and it has long retained its popularity as a subject for adult education classes In schools the teaching of local history in its own right and as an

ingredient of general history environmental studies and local and social studies is well established and commonly involves the use of original sources The expansion of genealogical studies into the wider area of family history has involved many individuals and groups in the investigation of the local conditions which existed where former generations lived and in this pursuit increasing use of local records has been made Many who seek to involve themselves in this work however find that they are ill equipped in the knowledge of what sources exist where they are to be found or what techniques are suitable in making the best use of them

**The Mid-Victorian Generation** K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation

*English Historical Documents, 1874-1914* David Charles Douglas, W. D. Handcock, 1996 English Historical Documents is the most ambitious impressive and comprehensive collection of documents on English history ever published An authoritative work of primary evidence each volume presents material with exemplary scholarly accuracy Editorial comment is directed towards making sources intelligible rather than drawing conclusions from them Full account has been taken of modern textual criticism A general introduction to each volume portrays the character of the period under review and critical bibliographies have been added to assist further investigation Documents collected include treaties personal letters statutes military dispatches diaries declarations newspaper articles government and cabinet proceedings orders acts sermons pamphlets agricultural instructions charters grants guild regulations and voting records Volumes are furnished with lavish extra apparatus including genealogical tables lists of officials chronologies diagrams graphs and maps

New Directions in European Historiography Georg G. Iggers, 1984-07 Impressive analytical essays on the transformation of historical studies in Europe In four impressively researched essays Georg Iggers recounts the transformation of historical studies in Europe during the twentieth century with particular emphasis on the

historiography of the past fifteen years Although the book does survey a broad area of contemporary historical thought it is primarily a careful analytical examination of the methodological and theoretical reorientation of certain influential European historians The first essay discusses the emergence at German Universities during the eighteenth and nineteenth centuries of the concept of history as a scientific discipline distinct from the classical tradition of literary history and the later broad acceptance of this mode of Enquiry in the Western world Against this background Mr Iggers then considers the challenge to this mode of the political social and intellectual upheavals of the twentieth century especially after World War II The three essays following examine important attempts to develop alternate paradigms for historical study the French historians of the Annales tradition the German political historians of the 1960s the various Marxist historians of France Poland East Germany and Great Britain In despite of the frequent insistence by philosophers and theorists of history that history is not a science in contemporary terms historians themselves have striven in recent years to strengthen the quantitative aspects of historical study moving away from traditional patterns of writing and adopting methods and concepts from the systematic social sciences Mr Iggers book is an excellent introduction to these contemporary changes in historiography and in its comparative analyses itself makes a contribution to historical studies

**The Era of World War II** Roy Barnard,1977      *The Afterlife of Idealism* Admir Skodo,2016-06-01 This book examines the legacy of philosophical idealism in twentieth century British historical and political thought It demonstrates that the absolute idealism of the nineteenth century was radically transformed by R G Collingwood Michael Oakeshott and Benedetto Croce These new idealists developed a new philosophy of history with an emphasis on the study of human agency and historicist humanism This study unearths the impact of the new idealism on the thought of a group of prominent revisionist historians in the welfare state period focusing on E H Carr Isaiah Berlin G R Elton Peter Laslett and George Kitson Clark It shows that these historians used the new idealism to restate the nature of history and to revise modern English history against the backdrop of the intellectual

social and political problems of the welfare state period thus making new idealist revisionism a key tradition in early postwar historiography
