Consciousness Vwadek P. Marciniak,2006 Towards a History of Consciousness Space Time and Death offers a cogent and compelling discussion of the neglected topic of the history of consciousness An analysis of our postmodern ontology reveals deep but neglected roots What are those roots and how did they grow Is there a self without consciousness What is the relation of the self to the individual Does the recognition of death contribute to the growth of consciousness As a survey of western history this work pushes the boundaries of the understanding of consciousness in intriguing and sometimes provocative directions This integrative study is intended for the serious curious student and thinker **The Evolution of**

Future Consciousness Thomas Lombardo,2006-06-23 Are there any unique qualities that humans possess that make us special within the world of nature Since the beginnings of recorded history we have pondered this question What if many of humanitys highest qualities and unique achievements such as technology civilization morals self consciousness freedom of choice religion and science are all built upon a single distinctive human capacity It may be that our highly evolved mental power to envision and think about the future is at the core of our greatest accomplishments and most unique human attributes In The Evolution of Future Consciousness psychologist and futurist Tom Lombardo examines the human ability to be conscious of the future to create ideas images goals and plans about the future to think about these mental creations and use them in directing ones actions and ones life In the opening chapter he looks at the psychology of future consciousness and its values and benefits as well as ways to enhance this human ability Subsequent chapters describe the emergence of future consciousness in pre historic times and how it was critical in the development of love and bonding the family tools and human aggression and hunting the central importance of the future and time in early myths religions and classical philosophy and the rise of modern futurist thinking covering the Renaissance the Scientific Revolution the Western Enlightenment and the Romantic counter reaction The book concludes with Darwin and how the theory of evolution revolutionized humanitys conception of both the past and the future In its companion volume Contemporary Futurist Thought Tom Lombardo completes his survey of the historical development of future consciousness discussing significant ideas and approaches to the future in the last century including science fiction future studies and an extensive array of recent theories and paradigms of the future

Harry Redner,2013-01-31 For Harry Redner the phrase beyond civilization refers to the new and unprecedented condition the world is now entering specifically the condition commonly known as globalization Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development His account begins with the Axial Age 700 300 BC and proceeds through Modernity after AD 1500 to the present global condition What is globalization doing to civilization In answering this question Redner studies the role played by capitalism the state science

and technology He aims to show that they have had a catalytic impact on civilization through their reductive effect on society culture and individualism However Redner is not content to diagnose the ills of civilization he also suggests how they might be ameliorated by cultural conservation Above all it is to the problem of decline in the higher forms of literacy that he addresses himself for it is on the culture of the book that previous civilizations were founded This study will be of interest to sociologists historians and social and political theorists Its style makes it accessible also to general readers interested in civilization past present and future *Logoteunison: Literary Easternization in Orhan Pamuk's Works* Saman

Erasing the Invisible Hand Warren J. Samuels,2011-09-12 This book examines the use principally in economics of the concept of the invisible hand centering on Adam Smith It interprets the concept as ideology knowledge and a linguistic phenomenon It shows how the principal Chicago School interpretation misperceives and distorts what Smith believed on the economic role of government The essays further show how Smith was silent as to his intended meaning using the term to set minds at rest how the claim that the invisible hand is the foundational concept of economics is repudiated by numerous leading economic theorists that several dozen identities given the invisible hand renders the term ambiguous and inconclusive that no such thing as an invisible hand exists and that calling something an invisible hand adds nothing to knowledge Finally the essays show that the leading doctrines purporting to claim an invisible hand for the case for capitalism cannot invoke the term but that other nonnormative invisible hand processes are still useful tools

Modernist America Richard Pells, 2011-03-29 America's global cultural impact is largely seen as one-sided with critics claiming that it has undermined other countries' languages and traditions But contrary to popular belief the cultural relationship between the United States and the world has been reciprocal says Richard Pells The United States not only plays a large role in shaping international entertainment and tastes it is also a consumer of foreign intellectual and artistic influences Pells reveals how the American artists novelists composers jazz musicians and filmmakers who were part of the Modernist movement were greatly influenced by outside ideas and techniques People across the globe found familiarities in American entertainment resulting in a universal culture that has dominated the twentieth and twenty-first centuries and fulfilled the aim of the Modernist movement to make the modern world seem more intelligible *Modernist America* brilliantly explains why George Gershwin's music Cole Porter's lyrics Jackson Pollock's paintings Bob Fosse's choreography Marlon Brando's acting and Orson Welles's storytelling were so influential and why these and other artists and entertainers simultaneously represent both an American and a modern global culture

A Cultural Interpretation of the Genocide Convention Kurt Mundorff, 2020-08-25 This book critiques the dominant physical and biological interpretation of the Genocide Convention and argues that the idea of culture is central to properly understanding the crime of genocide Using Raphael Lemkin's personal papers archival materials from the State Department and the UN as well as the mid-century secondary literature it situates the convention in the longstanding debate between Enlightenment notions of universality and individualism and Romantic notions of particularism and holism The author conducts a thorough review of the treaty and its preparatory work to show that the drafters brought strong culturalist ideas to the debate and that Lemkin's ideas were held widely in the immediate postwar period Reconstructing the mid-century conversation on genocide and situating it in the much broader mid-century discourse on justice and society he demonstrates that culture is not a distraction to be read out of the Genocide Convention it is the very reason it exists This volume poses a forceful challenge to the materialist interpretation and calls into question decades of international case law It will be of interest to scholars of genocide human rights international law the history of international law and human rights and treaty interpretation
