Modern North:

Modern North Julie Decker, 2010-03-31 The Geographic Region Around the North Pole is a Raw and Exotic Area of Untouched Nature and Inescapable Beauty Building in this extremely cold climate requires an advanced degree of ingenuity and resolve Ecological conditions including high winds snowdrifts and permafrost combined with periods of little sunlight present seemingly impossible logistical hurdles for architects Vernacular buildings have emerged but like most indigenous structures they do little more than simply enclose and protect Recent years have witnessed an explosion of exceptional new architecture and a new definition of a Northern building one that is both extraordinarily responsive to place and aesthetically provocative In *Modern North Architecture on the Frozen Edge* author Julie Decker presents thirty four of the most compelling and far ranging possibilities of contemporary architecture in the North These buildings located in northern Canada Scandinavia and Alaska are united in the way they embrace extreme conditions and provide visual stimulation in places that sometimes offer little more than a whitescape The book contains innovative structures by both established and up and coming architects including David Chipperfield Architects Studio Granda and Shim Sutcliffe Architects as well as essays by Brian Carter Juhani Pallasmaa Edwin Crittenden and Lisa Rochon that place the projects in the context of a new architectural response to the North **BOOK JACKET** *The Modern North* Ken S. Hawley, 2018-01-03 Early modern India a period extending from the fifteenth to the late eighteenth century saw dramatic cultural religious and political changes as it went from Sultanate to Mughal to early colonial rule Witness to the rise of multiple literary and devotional traditions this period was characterized by immense political energy and cultural vibrancy *Text and Tradition in Early Modern North India* brings together recent scholarship on the languages literatures and religious traditions of northern India It focuses on the rise of vernacular languages as vehicles for literary expression and historical and religious self assertion and particularly attends to ways in which these regional spoken languages connect with each other and their cosmopolitan counterparts Hindu Muslim and Jain idioms emerge in new ways and the effect of the volume as a whole is to show that they belong to a single complex cultural conversation *Literary Cultures in Early Modern North India* Imre Bangha, Danuta Stasik, 2024-06-11 *Literary Cultures in Early Modern North India* Current Research grows out of over a 40 year tradition of the triennial International Conferences on Early Modern Literatures in North India ICEMLNI initiated to share Bhakti in current research This volume brings

together a selection of contributions from some of the leading scholars as well as emerging researchers in the field originally presented at the 13th ICEMLNI University of Warsaw 18-22 July 2018. Considering innovative methodologies and tools, the volume presents the current state of research on early modern sources and offers new inputs into our understanding of this period in the cultural history of India. This collection of essays is in the tradition of Bhakti in current research volumes produced from 1980 onward but reflecting our current understanding of early modern textualities. The book operates on the premises that the centuries preceding the colonial conquest of India, which in scholarship influenced by orientalist concepts has often been referred to as medieval, however, these languages already participated in modernity through increased circulation of ideas, new forms of knowledge, new concepts of the individual, of the community and of religion. The essays cover multiple languages: Indian vernaculars, Sanskrit, Apabhramsha, Persian, different media, texts, performances, paintings, music, and traditions: Hindu, Jain, Muslim, Sant, Sikh, analyzing them as individual phenomena that function in a wider network of connections at textual, intertextual, and knowledge system levels.

An Introduction to the Modern Middle East David S. Sorenson, 2018-05-04. Combining elements of comparative politics with a country-by-country analysis, author David S. Sorenson provides a complete and accessible introduction to the modern Middle East. With an emphasis on the politics of the region, the text also dedicates chapters specifically to the history, religions, and economies of countries in the Persian, Arabian, Gulf, the Eastern Mediterranean, and North Africa. In this updated and revised second edition, *An Introduction to the Modern Middle East* includes new material on the Arab Spring, the changes in Turkish politics, the Iranian nuclear issues, and the latest efforts to resolve the Israeli-Palestinian dilemma. Introductory chapters provide an important thematic overview for each of the book's individual country chapters, and short vignettes throughout the book offer readers a chance for personal reflection.

The topics covered fall into three broad categories that encompass Brendan's main fields of influence: 1) supercontinents and the supercontinent cycle including reconstructions and modelling; 2) orogenesis and terranes with a focus on the Appalachian Variscan and Central Asian orogenic belts and the oceans with which they are associated; and 3) magmatism and magmatic processes centring on the geochemistry and isotopic compositions of magmas in arc and rift settings. Like Brendan's own research, the scope of the papers spans the globe and ranges from strongly field based studies to conceptual analyses. All of the articles however are focused on unravelling some critical aspect of geology or aimed at clarifying some crucial geological process. Hence they also share a theme common to Brendan's many contributions in emphasizing the importance of process oriented research.
