Redescribing Bioethics Tod S. Chambers, 2024-11-19 It has traditionally been accepted that one cannot derive how the world ought to be from the way the world is The discipline of bioethics endeavors to respond to ethical issues as they arise in the world For these issues to be analyzed they must first be described Redescribing Bioethics How the Field Constructs Its Argument argues the descriptions bioethicists provide of the moral problems anticipate the proposed solution to these problems To understand the rhetorical power of bioethics arguments we need to reverse the structure of the argument seeing the anticipated solution as driving the presentation of the problem Arguing the story of bioethics is as much one of powerful redescription as of proposed solutions Tod S Chambers examines seven rhetorical strategies in how bioethics texts have steered readers toward a particular moral vision of the world retrodiction anagnorisis imbalance dissociation metaphor sources and hypertextuality Through these techniques bioethicists construct a world in which their particular moral theory thrives and alternative theories will struggle

Bioethics and Women

Mary Briody Mahowald,2006-10-05 All persons while different from one another have the same value this is the author s relatively uncontroversial starting point Her end point is not uncontroversial an ideal of justice as human flourishing based on each person s unique set of capabilities Because the book s focus is women s health care gender justice a necessary component of justice is central to examination of the issues Classical pragmatists and feminist standpoint theorists are enlisted in support of a strategy by which gender justice is promoted Two features of the book are unique 1 the topics presented cover the entire life span of women not just those related to reproduction 2 a range views about moral status are applied not only to fetuses but also to individuals already born Attention to these features is intended to facilitate ethical consistency or moral integrity and respect for those who hold different moral views While delineating and defending the book s perspective the first section provides an overview of bioethics critiques prevalent approaches to bioethics and models of the physician patient relationship and sketches distinguishing aspects of women s health care that are prevalently neglected Positions about moral status are also presented The second section identifies topics that are indirectly as well as directly related to women s health such as domestic violence and caregiving Brief cases illustrate variables relevant to each topic Empirical and theoretical considerations follow each set of cases these are intended to precipitate more expansive and critical examination of the issues raised The last section is devoted to an egalitarian ideal that may be pursued through an ethic of virtue or supererogation rather than obligation By embracing this ideal according to the author moral agents support a more demanding level of morality than guidelines or laws require

The Modern Art of Dying Shai J. Lavi,2009-01-10 How we die reveals much about how we live In this provocative book Shai Lavi traces the history of euthanasia in the United States to show how changing attitudes toward death reflect new and troubling ways of experiencing pain hope and freedom Lavi begins with the historical meaning of euthanasia as signifying an easeful death Over time he shows the term came to mean a death blessed by the grace of God and later medical hastening of death Lavi illustrates these changes with compelling accounts of changes at the deathbed He takes us from early nineteenth century deathbeds governed by religion through the medicalization of death with the physician presiding over the deathbed to the legalization of physician assisted suicide Unlike previous books which have focused on law and technique as explanations for the rise of euthanasia this book asks why law and technique have come to play such a central role in the way we die What is at stake in the modern way of dying is not human progress but rather a fundamental change in the way we experience life in the face of death Lavi argues In attempting to gain control over death he maintains we may unintentionally have ceded control to policy makers and bio scientific enterprises
