Equilibrium of Eternitys Playground Andrew Lennard,2021-02-15 The transcendental truth had always been hidden from the spiritual being Even among the enigma of supernatural existence the celestial contradictions of the consecrated cosmos were concealed from the Archangel and Seraphim But the days of a duplicitous divine design were numbered Infinity s lies are about to come to an end The mutiny of three malevolent malcontents are ready to destroy the Deity s deceit as Parrish May and Ecole s insurrection ignites the flames of divine dissidence in heaven and earth releasing an angelic apocalypse But can the three subversive seraphs rebellion alter the numinous nebula of creation with their seditious symmetry Or will the inviolable equilibrium of eternity s playground come to a bitter end

The Numinous Universe Daniel Liderbach,1989 Contraversial and utterly unique this scholarly work uses modern physics to proclaim that the Kingdom of God is an active presence in the world Egocentricity and Mysticism Ernst Tugendhat,2016-10-04 In Egocentricity and Mysticism Ernst Tugendhat casts mysticism as an innate facet of what it means to be human a response to an existential need for peace of mind This need is created by our discursive practices which serve to differentiate us from one another and privilege our respective first person standpoints Emphasizing the first person fuels a desire for mysticism which builds knowledge of what binds us together and connects us to the world Any intellectual pursuit that prompts us to step back from our egocentric concerns harbors a mystic kernel that manifests as a sense of awe wonder and gratitude Philosophy the natural sciences and mathematics all engender forms of mystical experience as profound as any produced by meditation and asceticism One of the most widely discussed books by a German philosopher in decades Egocentricity and Mysticism is a philosophical milestone that clarifies in groundbreaking ways our relationship to

Sideris, 2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network

of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse. Highly regarded in many academic circles, these movements have been endorsed by numerous prominent scholars, scientists, historians, and educators. Their express goal, popularized in numerous books, films, TED talks, YouTube videos, podcasts, and even introductory courses at places like Harvard or Washington University, is to instill in readers and audiences a profound sense of being at home in the universe, thereby fostering environmentally responsible behavior. Whether promoted as *The New Story*, *The Universe Story*, or *The Epic of Evolution*, they all offer humanity a new sacred story, a common creation myth for modern times and for all people: the evolutionary unfolding of the universe from the Big Bang to the present. Evolutionary science and religious cosmology together at last! But as Sideris shows, however, the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world. Instead of cultivating an ethic of respect for nature, the project of consecrating science only increases human arrogance and indifference to nonhuman life. Going back to the work of Rachel Carson and other naturalists, the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet. The Deities Are Many Jordan Paper, 2005-03-17 Provides a theology of polytheism, the belief in many deities, using examples from a wide range of world religions. *The Trinity, Creation and Pastoral Ministry* Graham Buxton, 2007-01-01 In this book, the author proposes a three-way conversation between theology, science, and pastoral ministry. His approach draws on a Trinitarian understanding of God as a relational being of love whose life spills over into all created reality, human and nonhuman. By locating human meaning and purpose within God's creation community, this book offers the possibility of a transforming engagement between those in pastoral ministry and the scientific community. *The Witch's Spellbook* Sarah Bartlett, 2018-04-10 Magic is in every part of the living world; one just needs to know how to tap into it. *The Witch's Spellbook* is a powerful collection of spells, rituals, and enchantments that you can use to tap into your intuition and the power of the natural world. This book reveals how, by casting spells that align to the cycles of nature and the universe, you can begin to manifest your dreams and shape your destiny. Organized by topic, such as spells for prosperity, charms for body beauty and sex, or enchantments for creativity and charisma, each spell draws upon world traditions, sacred holidays, and lunar events, such as solstices and equinoxes. Whether you're new or experienced, this is every person's guide to practical magic. *The Learned Practice of Religion in the Modern University* Donald Wiebe, 2019-11-14 In these essays, Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe: that studies almost always exhibit a religious bias. To explore this issue, Wiebe looks at the religious and moral agendas behind the study of religion, showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred. As a result, he argues, religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny. This book provides a critical

history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena The Love Story of Creation Edward Ruetz, Ruetz Edward Ruetz, 2010 A man awakens one day in a land of brilliant light Unsure of his surroundings he sees another man woman and their child surrounded by a pure crimson energy of love He soon realizes that the Divine Beings intend to use their energy of love to give birth to new beings And so begins an expanding Universe fueled by diverse particles woven by gravity's power into a massive web The Divine Beings empower atoms to be agents of creativity The first beings Quarkie and Photie join twelve atom friends and quadrillions of other atoms who manage to create billions of suns in billions of galaxies After the Divine Beings take the atom pals on journeys back to the past to visit other atom families the atom friends living in the Milky Way Galaxy are jolted by an exploding supernova and land on planet Earth where they eventually create the first living beings During the next two billion years they engage in a crucial mission the conception of the eukaryote cell which will determine all future creativity on Earth But just as they are certain of their success a momentous catastrophe threatens to end their creative journey **Jesus and the Cosmos** Denis Edwards, 2004-07-22 At the end of the twentieth century we began to understand that the earth is vulnerable that it is like a tiny garden in space under threat on all sides Jesus and the Cosmos is an attempt to think theologically about the ecological crisis we face in the light of the great Christian tradition Our theological tradition has been shaped within the worldview of a static universe By contrast we are told today that the universe began with a cosmic explosion called the Big Bang that we live in an expanding universe with galaxies rushing away from us at an enormous rate that we human beings are part of an evolutionary movement on the earth and that we are intimately linked with the health of delicately balanced life systems on our planet Not only has modern science given this age a new cosmology but contemporary historical studies have provided us with a new approach to the historical Jesus Critical biblical study has allowed us to know far more about the Jesus who brought joy and liberation into people's lives In Jesus and the Cosmos Denis Edwards tells the story of the cosmos the story of Jesus of Nazareth and shows their connections Ultimately he will assert Jesus of Nazareth risen from the dead IS the dynamic power at the heart of the cosmic process **Spellcraft for a Magical Year** Sarah Bartlett, 2015-07-15 Draw upon beneficial universal energy at any time in the year to maximize your spell success Using planetary solar and other natural influences as well as the ancient power of pagan holidays goddess energy and traditional festive dates Spellcraft for a Magical Year gives a month by month guide to spells rituals and enchantments This comprehensive almanac by the renowned Sarah Bartlett includes important celebrations Discover which spells work best on Sabbats Halloween or All Souls Day as well as days devoted to deities from

world spiritual traditions such as Greek Demeter Hindu Durga or Persian god Baal Spellcraft for a Magical Year reveals specially designed spells and rituals for all major dates to benefit you and your loved ones Follow step by step instructions for performing the rituals using talismans or amulets and casting spells around New and Full Moons solstices and equinoxes There is also a unique guide to bewitchments according to the apparent path of the sun through the sky to boost fertility love creativity prosperity and well being This eclectic spell book also uses invocations blessings talismans and amulets drawn from a wide range of traditional magic practice from around the world including medieval grimoires ancient Mesopotamian and Egyptian magical tablets Greco Roman Magic texts all completely updated for the modern day witch By working with the cycles of nature you can stay in tune with the rhythms of the universe to help manifest your dreams [David's Question](#)
