

PRINCIPLES OF HEALTH PROMOTION

3. Health promotion combines diverse, but complementary methods or approaches including communication, education, legislation, fiscal measures, organisational change, community change, community development and spontaneous local activities against health hazards.
4. Health promotion aims particularly at effective and concrete public participation. This requires the further development of problem-defining and decision-making life skills, both individually and collectively, and the promotion of effective participation mechanisms.
5. Health promotion is primarily a societal and political venture and not medical service, although health professionals have an important role in advocating and enabling health promotion.
