Patterns And Precision The Arts And Sciences Of Islam:

Patterns and Precision, the Arts and Sciences of Islam Holly Edwards, 1982 *Patterns and Precision* National Committee Islam Centennial Fourteen, 1982 Historiography of the History of Science in Islamicate Societies Sonja Brentjes, 2023-09-05 This book presents eight papers about important historiographical issues as debated in the history of science in Islamicate societies the history of science and philosophy of medieval Latin Europe and the history of mathematics as an academic discipline Six papers deal with themes about the sciences in Islamicate societies from the ninth to the seventeenth centuries among them novelty context and decline Two other papers discuss the historiographical practices of historians of mathematics and other disciplines in the nineteenth and twentieth centuries The central argument of the collected papers is that in addition and beyond the study of scientific texts and instruments historians of science in Islamicate societies need to pay attention to cultural material and social aspects that shaped the scientific activities of the authors and makers of such texts and instruments It is pointed out that the diachronic de contextualized comparison between methods and results of scholars from different centuries regions and cultures often leads to serious distortions of the historical record and is responsible for the long term neglect of scholarly activities after the so called Golden Age The book will appeal in particular to teachers of history of science in Islamicate societies to graduate students interested in issues of methodology and to historians of science grappling with the unresolved problems of how think and write about the sciences in concrete societies of the past instead of subsuming all extant texts instruments maps and other objects related to the sciences under macro level concepts like Islam or Latin Europe CS 1114 **From Alexandria, Through Baghdad** Nathan Sidoli, Glen Van Brummelen, 2013-10-30 This book honors the career of historian of mathematics J L Berggren his scholarship and service to the broader community The first part of value to scholars graduate students and interested readers is a survey of scholarship in the mathematical sciences in ancient Greece and medieval Islam It consists of six articles three by Berggren himself covering research from the middle of the 20th century to the present The remainder of the book contains studies by eminent scholars of the ancient and medieval mathematical sciences They serve both as examples of the breadth of current approaches and topics and as tributes to Berggren s interests by his friends and colleagues Muslim Cultures in the Indo-Iranian World during the Early-Modern and Modern Periods Fabrizio Speziale, Denis Hermann, 2020-08-10 No detailed description available for Muslim Cultures in the Indo Iranian World during the Early Modern and Modern Periods Bibliography of Art and Architecture in the Islamic World (2 vols.) in The Metropolitan Museum of Art David G. Alexander, 2015-12-31 Armor and weaponry were central to Islamic culture not only as a means of conquest and the spread of the faith but also as symbols of status wealth and power The finest arms were made by master craftsmen working with the leading designers goldsmiths and jewelers whose work transformed utilitarian military equipment into courtly works of art This book reveals the diversity and artistic quality of one of the most important and encyclopedic collections of its kind in the West The Metropolitan Museum's holdings span ten centuries and include representative pieces from almost every Islamic culture from Spain to the Caucasus The collection includes rare early works among them the oldest documented Islamic sword and is rich in helmets and body armor decorated with calligraphy and arabesques that were worn in Iran and Anatolia in the late fifteenth century Other masterpieces include a jeweled short sword yatagan with a blade of watered steel that comes from the court of Sleyman the Magnificent a seventeenth century gold inlaid armor associated with Shah Jahan and two gold inlaid flintlock firearms belonging to the guard of Tipu Sultan of Mysore Presenting 126 objects each handsomely photographed and richly documented with a detailed description and discussion of its technical historical and artistic importance this overview of the Met's holdings is supplemented by an introductory essay on the formation of the collection and appendixes on iconography and on Turkman style armor [A Muslim Primer](#) Ira G. single leaf works of calligraphy iconic writing in contemporary art to more theoretical considerations on aesthetic perception
