Taleghani, 2008-06-26 This monograph presents a morpho syntactic investigation on modality aspect and negation by concentrating on Persian and is designed to contribute to theoretical linguistics and the study of Iranian languages The analysis is based on the Minimalist program This research challenges the idea that the syntactic structure maps on the semantic interpretation or vice versa The discussion presented in this monograph shows that the syntactic structure of Persian modals is uniform no matter if the modals are interpreted as having root or epistemic readings Although it is claimed that modals are raising constructions in different languages modals in Persian which does not have subject raising constructions show a different syntactic behavior Furthermore the structural analysis of the interaction of Persian modals and negation shows that because of the scope interaction of negation and modals the syntactic structure of modals with respect to negation mostly corresponds to the semantic interpretation of modals **A Grammar of the Corpse** Elizabeth Spragins, 2023-06-06 No matter when or where one starts telling the story of the battle of al Qasr al Kabir August 4 1578 the precipitating event for the formation of the Iberian Union one always stumbles across dead bodies rotting in the sun on abandoned battlefields publicly displayed in marketplaces exhumed and transported for political uses A Grammar of the Corpse Necroepistemology in the Early Modern Mediterranean proposes an approach to understanding how dead bodies anchored the construction of knowledge within early modern Mediterranean historiography A Grammar of the Corpse argues that the presence of the corpse in historical narrative is not incidental It fills a central gap in testimonial narrative providing

tangible evidence of the narrator's reliability while provoking an affective response in the audience. The use of corpses as a source of narrative authority mobilizes what cultural historians, philosophers, and social anthropologists have pointed to as the latent power of the dead for generating social and political meaning and knowledge. *A Grammar of the Corpse* analyzes the literary semiotic and epistemological function these bodies serve within text and through language. It finds that corpses are indexically present and yet disturbingly absent, a tension that informs their fraught relationship to their narrators' own bodies and makes them useful but subversive tools of communication and knowledge. *A Grammar of the Corpse* complements recent work in medieval and early modern Iberian and Mediterranean studies to account for the confessional, ethnic, linguistic, and political diversity of the region. By reading Arabic texts alongside Portuguese and Spanish accounts of this key event, the book responds to the fundamental provocation of Mediterranean studies to work beyond the linguistic limitations of modern national boundaries.
