

Rift and Revolt in Hungary is "a notable book," says Robert R. Bowie, Director of the Harvard Center for International Affairs, in his foreword to the volume. "Comprehensive, analytical, and lively, it brings new insights to the turbulent events in Hungary since World War II even to an informed reader who followed those events closely as they took place. Its author is peculiarly qualified to write such a volume: international lawyer and political scientist, professor and public servant, he experienced Communist rule in Hungary from the inside. Arrested by the Hungarian Security Police, interrogated according to the usual methods, condemned for conspiracy and high treason, he spent five years of his life in Budapest prisons."

Rift and Revolt in Hungary Ferenc Albert Váli, 1961 Study of post World War Hungarian history *Challenge and Response in Internal Conflict: The experience in Europe and the Middle East* Doris M. Condit, 1967 *Imre Lakatos and the Guises of Reason* John Kadvany, 2001-04-09 An exploration of the philosophy of science and mathematics of Hungarian emigre Imre Lakatos demonstrating its contemporary relevance **Soldiers and Politics in Eastern Europe, 1945-90** Zoltan D. Barany, 1993-07-27 **Problems of Communism**, 1961 **The First Domino** Johanna Cushing Granville, 2004 A Fascinating Analysis Based on Newly Declassified Documents from the Former USSR and Communist Bloc On October 23 24 and November 3 4 1956 the Soviet Union invaded Hungary to reassert strict communist rule The First Domino International Decision Making during the Hungarian Crisis of 1956 is the first analytical monograph in English drawing on new archival collections from East bloc countries to reinterpret decision making during this Cold War crisis Johanna Granville selects four key patterns of misperception as laid out by Columbia University political scientist Robert Jervis and shows how these patterns prevailed in the military crackdown and in other countries reactions to it Granville perceptively examines the statements and actions of Soviet Presidium members the Hungarian leadership U S policy makers and even Yugoslav and Polish leaders According to Granville Soviet first secretary Nikita Khrushchev zigzagged ineptly between policy options with apparently little or no analysis of costs and risks permitting Moscow s Eastern European satellites at times to subtly manipulate the Kremlin s decision making Granville s discussions of Polish policy Yugoslav actions and the arduous process of normalization after the uprising show that the Soviets were preoccupied with stemming what many of them construed as a Western encouraged attempt to undermine Eastern Europe s communist regimes Granville concludes that the United States bears some responsibility for the events of 1956 as ill advised U S covert actions may have convinced the Soviet leaders that the United States was attempting to weaken Soviet hegemony over Eastern Europe although the Eisenhower administration actually intended only to sow confusion and dissatisfaction This masterful study leads to the conclusion that the Hungarian Crisis in 1956 was most likely sustained by self perpetuating misperceptions and suspicions among key countries In short Granville s multi archival research tends to confirm the post revisionists theory about the cold war it was everyone s fault and no one s fault It resulted from the emerging bipolar structure of the international system the power vacuum in Europe s center and spiraling misconceptions **The Real Special Relationship** Michael Smith, 2023-07-18 Gripping deeply researched and authoritative the history of one of the closest intelligence and security relationships in the world The Special Relationship between the United States and Britain is touted by politicians when it suits their purpose and as frequently dismissed as myth not least by the media Yet the truth is that the two countries are bound together more closely than either is to any other ally In *The Real Special Relationship* Michael Smith reveals how it all began eighty years ago when a top secret visit by four American codebreakers to Bletchley Park in February 1941 ten months

before the US entered World War II marked the start of a close collaboration between the intelligence services of the two nations. When that war ended and the Cold War began, both sides recognized that the way they worked together to decode German and Japanese ciphers could be used to counter the Soviet threat. They laid the foundation for the behind-the-scenes intelligence sharing that has continued despite rivalries among the services and occasional political conflict and public disputes between the two nations through the collapse of the Soviet Union, 9/11, the wars in Afghanistan and Iraq, and to the threats of the present moment. Smith, who served in British military intelligence, brings together a fascinating range of characters from Winston Churchill and Ian Fleming to John F. Kennedy, Ronald Reagan, Margaret Thatcher, and Edward Snowden. Supported by in-depth interviews and a broad range of personal contacts in the intelligence community, he takes the reader into the workings of MI6, the CIA, the NSA, and all those who strive to keep us safe. Sir John Scarlett, former chief of MI6, has written the introduction, and Michael Hayden, former director of the CIA and the NSA, has provided the foreword.

Hungary and the superpowers Janos Radvanyi, 1972 **State Sovereignty** E. Kurtulus, 2005-11-26

State sovereignty is the foundation of international relations. This thought-provoking book explores the gap between seeing sovereignty as either absolute or relative. It argues that state sovereignty is both factual and judicial and that the loss of sovereignty exists only at the margins of the international society. With many interesting real-world examples of ambiguous sovereignty examined, this is an important argument against those who are quick to claim that sovereignty is under assault. *The State against Society* Grzegorz Ekiert, 1996-09-30

Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions. State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens, impervious to reform and change, and representative of extreme political and economic dependency. Despite their contrasting historical experiences, they have been treated as basically identical in their institutional design, social and economic structures, and policies. Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post-1945 East Central Europe: Hungary (1956-63), Czechoslovakia (1968-76), and Poland (1980-89). The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status. He explores how political crises reshaped party-state institutions, redefined relations between party and state institutions, altered the relationship between the state and various groups and organizations within society, and modified the political practices of these regimes. He shows how these events transformed cultural categories, produced collective memories, and imposed long-lasting constraints on mass political behavior and the policy choices of ruling elites. These crises shaped the political evolution of the region, produced important cross-national differences among state socialist regimes, and contributed to the distinctive patterns of their collapse. **The East European Economy in Context** David Turnock, 2003-09-02

Since 1989, the former communist

countries of Eastern Europe have witnessed a profound and dramatic upheaval The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured In *The East European Economy in Context Communism and Transition* David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe As well as containing an informative survey of the impact of communism *The East European Economy in Context* provides Political profiles of individual countries A clear study of the contrasts between northern and balkan groups Summaries of regional variations in the transition process An exploration of the new state structures and resources Discussion of political stability inter ethnic tensions and progress in economic change

Social Control in Europe Herman Roodenburg, 2004 This two volume collection of essays provides a comprehensive examination of the idea of social control in the history of Europe The uniqueness of these volumes lies in two main areas First the contributors compare methods of social control on many levels from police to shaming church to guilds Second they look at these formal and informal institutions as two way processes Unlike many studies of social control in the past the scholars here examine how individuals and groups that are being controlled necessarily participate in and shape the manner in which they are regulated Hardly passive victims of discipline and control these folks instead claimed agency in that process accepting and resisting and thus molding the controls under which they functioned In both volumes an introduction outlines the origins and the continuing value of the concept of social control The introductions are followed by two substantive sections The essays in part one of volume I focus on the interplay of ecclesiastical institutions and the emerging states those in part two of volume I look more explicitly at discipline from a bottom up perspective The essays in part one of volume 2 explore the various means by which communities generally working class communities in nineteenth and twentieth century Europe were subjected to forms of discipline in the workplace by the church and by philanthropic housing organizations It notes also how the communities themselves generated their own forms of internal control Part two of volume 2 focuses on various policing institutions exploring in particular the question of how liberal and totalitarian regimes differed in their styles of control repression and surveillance
