The Right Brain and Religion C. W. Dalton, 1990      **Complete Idiot's Guide to Understanding Catholicism** Bob O'Gorman, Robert Thomas O'Gorman, Mary Faulkner, 2003 No Marketing Blurb      **The Last Book** John Williams, 2007-08-27

There have been many attempts to explain life For the most part they are variants on a religious or mystical theme These provide a purpose to life but not the purpose of life A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now The explanation of life which is offered in this book draws on three main components evolution genetics and psychology However something exists in our mind which stops us from seeing clearly what is already before us Once this block is removed we can view life objectively and see it as a special form of information which has arisen through evolution Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter This book relates these findings to our world and our lives It sets out in rational terms where we came from how we got here and finally reveals our destiny [www.thelastbook.co.uk](http://www.thelastbook.co.uk)      **Spiritual Intelligence and the Neuroplastic Brain** Charles W. Mark Ph. D., Charles W. Mark, 2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person's life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>      *Evolution of Faith and Religion* Ajit Randhawa, 2009-08      **We Believe...** Roy E. Bourque, 2021-02-24 We Believe A Journey into Christ Consciousness By Roy E Bourque After a profound spiritual experience at the age of nine the author found clarity in some of what the church was teaching while bringing into question other

teachings of the church Eleven years later during a nuclear physics lecture this spiritual experience coincided with what the instructor was teaching Numerous additional spiritual experiences would soon follow We Believe A Journey into Christ Consciousness details the bridge that was formed between science and spirituality from those experiences Since that time the author has researched religious history looking for connections that would correlate modern science with what the ancient writers knew This endeavor has brought clarity to much of what the church teaches as well as serving as the basis to weed out misconceptions that have muddled up the waters This book may serve the reader who is looking for connections between science and religion *Religion, Materialism and Ecology* Sigurd Bergmann, Kate Rigby, Peter Manley Scott, 2023-05-31

This timely collection of essays by leading international scholars across religious studies and the environmental humanities advances a lively discussion on materialism in its many forms While there is little agreement on what materialism means it is evident that there is a resurgence in thinking about matter in more animated and active ways The volume explores how debates concerning the new materialisms impinge on religious traditions and the extent to which religions with their material culture and beliefs in the Divine within the material can make a creative contribution to debates about ecological materialisms Spanning a broad range of themes including politics architecture hermeneutics literature and religion the book brings together a series of discussions on materialism in the context of diverse methodologies and approaches The volume investigates a range of issues including space and place hierarchy and relationality the relationship between nature and society human and other agencies and worldviews and cultural values Drawing on literary and critical theory and queer philosophical theological and social theoretical approaches this ground breaking book will make an important contribution to the environmental humanities It will be a key read for postgraduate students researchers and scholars in religious studies cultural anthropology literary studies philosophy and environmental studies **The War of the**

**Ghosts and Machines** Mike Hockney, 2015-09 Are you a ghost or a machine You don't need to be a superstitious believer to support the side of the ghosts Machine people reduce everything to lifeless mindless purposeless atoms of matter the ultimate little machines For ghost people reality reduces to dimensionless mathematical singularities which are none other than the hyper-rational monadic souls posited by Pythagoras and Leibniz Ghost people subscribe to atoms minds with atomic number zero i.e. minds souls are made of massless dimensionless photons Machine people start with hydrogen atoms with atomic number one All ghost entities are associated with zero and infinity All machine people deny the existence of zero and infinity Mathematically these are the two numbers where the ghosts and the machines collide head on This book is all about demonstrating that there are indeed ghosts in the machines Living Deeply Fraser Watts, 2018-01-01 Here is a book that takes people on a personal journey a journey that is both spiritual and psychological a three fold journey that leads you the reader to face issues about yourself raises challenges about relationships and points towards what is above and beyond Fraser Watts draws on his own Christian tradition in a way that is relevant to spiritual people everywhere whatever tradition

the belong to or if they are of no religious tradition at all It is a book to be read reflectively giving some time to make connections between what is gently written in the pages and your own experience of life if you let it Living Deeply will help you join up a spiritual perspective with your own psychological issues Such a journey could change a life Perhaps it will change yours helping you to see what deeper issues are at stake as you journey through life and give you a spiritual compass to respond to life s challenges This book will help you indeed to be living more deeply Can Scientists Believe Sir Nevill Mott,2013-11-05 In this collection of thought provoking essays a range of distinguished scientists and theologians men and women young and old all with strong scientific training and deeply held religious beliefs in the Judeao Christian tradition give their personal answers They do not always agree the views of each contributor being informed both by their particular scientific expertise and religious affiliation They address a wide range of problems that will interest all concerned to reconcile their own religious beliefs with currently accepted scientific theory and practice The divergences of opinion are as a significant as the agreements Positions are thoughtfully explained and make important often novel and illuminating contributions to debate on these great issues Spirituality Beyond Science and Religion Lillian Stover Wells,Jack McMahan,William Pillow,2012-05-25 Spirituality means something different to everyone Some may believe it involves participating in organized religion Others may prefer it to be more personal like getting in touch with ones inner self through yoga meditation quiet reflection or even long walks A few may find that it lies in finding a new sense of purpose for their lives Spirituality Beyond Science and Religion addresses all of these and more through a new paradigm about life and death It lifts readers above their daily press for competitive survival and success by going to the heart of all spirituality The book disputes traditional sciences claim that physical matter is the only reality It also helps explain enigmas that have confronted orthodox religion for centuries To do so this book correlates published research from nearly one hundred and fifty authors and professionals in medicine neuroscience psychology theology history and metaphysics It explores new insights being revealed through thousands of subjective experiences around the worldall of them beyond the ability of science or religion to explain The book therefore not only offers reassurance that death is not final but it also discloses profound implications for how we live our lives on earth The US Review of Books Spirituality Beyond Science and Religion by William Pillow with Jack McMahan and Lillian Stover Wells iUniverse reviewed by Priscilla Estes but deep inside us is the recognition that life can and should have more meaning one that reaches far beyond traditional science and orthodox religion and one that involves all of us The mind body spirit MBS publishing industry has come a long way since the 1960s and 1970s when Aldous Huxley Hermann Hesse and Carlos Castaneda combined Eastern and Western thought in the best sellers Doors of Perception Siddhartha and The Teachings of Don Juan respectively In fact according to religion and publishing expert Elizabeth Puttick MBS publishing is the fastest growing non fiction genre which a quick examination of virtual and real bookstores supports More than ever before great minds race to close the gap between science and religion to answer the questions of where do

we come from why are we here and where do we go after death We search for answers inside the human brain the psyche the fetus gravity energy fields near death experiences NDEs universal consciousness time travel soul travel quantum medicine karma dharma and more it's hard for the average person to comprehend let alone keep up Finally here is a book that helps pull it all together for us written by William Pillow ex US Air Force and retired pharmacist with thirty four years at Eli Lilly Pillow began a quest to discover where we go after death and why when a long and lingering illness befell his wife and he confronted aging Initially a Southern Baptist and a skeptic about all things metaphysical he changed his mind while reading the incredible body of research on soul survival After prodigious investigation much of which concerns NDEs and studies on fetal awareness Pillow concluded there is a soul a God and a Heaven His conclusions may challenge your philosophy but parenthetical documentation and a fifteen page bibliography encourage independent verification The book starts slowly and carefully as Pillow builds his case by conscientiously stitching together scientific religious and metaphysical literature both ancient and modern on the nature of God the spark of life souls the human superconsciousness and Heaven the spirit world The brain begins to smoke while chugging through study after study on NDEs shared NDEs life between lives LBL out of body experiences OBE past life regression after death communications ADC pre birth visions neurological pathways the transcendent source of consciousness the ego and more We long for an index a glossary and less use of quotes around words that don't require them Halfway through our mental labors are rewarded with chapter 7 Our Incomparable Souls This is the heart of the book a behind the scenes look at the soul and a parting of the veil of forgetfulness produced by the ego Pillow discusses studies on fetal consciousness which provide the strongest circumstantial evidence for existence of the soul and gives a moving testament to the soul's purpose to instill compassion empathy and benevolence in its human host The second half of the book flies by as we greedily gobble mainstream studies on energy healing brain waves and the need for face to face friendships in an electronically connected world Tucked unobtrusively at the end of chapter 11 are three paragraphs titled For Me Personally in which the author shares his private definition of faith Such unheralded brevity from a man who once considered entering the Christian ministry shows great respect for the reader and for the role of science in decoding religion and spirituality The final chapter implores us to at least consider the possible importance of these concepts and commentaries for your loved ones and for you Pillow believes that by knowing there is a God a soul and a Heaven we can sustain our inner journey toward purpose and meaning in our lives and that by recognizing our shared humanity we can save civilization One hopes and prays this is true as murders by children mass killings by governments greed corruption materialism apathy mental illness addiction and more threaten to suffocate humanity's life force Pillow is an accomplished author having written or edited five educational textbooks several dozen articles one murder mystery involving reincarnation and the paranormal and five books about the search for self and the meaning of life through science self awareness and spirituality Spirituality Beyond Science and Religion is his first book written with theologian Jack McMahan and clinical

psychologist Lillian Stover Wells Pillow brilliantly connects his philosophy on the soul God and Heaven with salient literature in the field of science and religion The MBS genre has come a long way from the Indian fables and drug induced journeys of the sixties and seventies Pillow s overall message that the power of love is greater than the love of power points us in the right direction for the twenty first century **Science, Religion, and the Meditative Mind** J. Richard

Wingerter,2003-05-07 Meditative mind awareness gives one a proper understanding of what science and what religion is The meditative mind sees itself as fundamentally different from the scientific mind and from the mind to which ordinary religion relates **Can a Scientist Believe in Miracles?** Ian Hutchinson,2018-09-11 Plasma physicist Ian Hutchinson has been

asked hundreds of questions about faith and science Is God s existence a scientific question Is the Bible consistent with the modern scientific understanding of the universe Are there scientific reasons to believe in God In this comprehensive volume Hutchinson answers a full range of inquiries with sound scientific insights and measured Christian perspective *Women's*

*Intuition* Norman Edgar Wengert,2013-08 Women s Intuition by Norman Edgar Wengert Doctor of Chiropractic whose 50 year clinical practice inspired development of Enchanted Sight a method he teaches to control interaction at the interface of left brain logic and right brain intuitive input our access point to our non mental non physical nature proving the sixth or psychic sense is primary discovering women experience twice the number of feelings hundreds men do giving them access to twice the knowledge He and his researchers reveal it is possible to download and transpose the actual meanings contained in myriad enigmas produced by the sixth sense *Believers: Faith in Human Nature* Melvin Konner,2019-09-10 An

anthropologist examines the nature of religiosity and how it shapes and benefits humankind Believers is a scientist s answer to attacks on faith by some well meaning scientists and philosophers It is a firm rebuke of the Four Horsemen Richard Dawkins Daniel Dennett Sam Harris and Christopher Hitchens known for writing about religion as something irrational and ultimately harmful Anthropologist Melvin Konner who was raised as an Orthodox Jew but has lived his adult life without such faith explores the psychology development brain science evolution and even genetics of the varied religious impulses we experience as a species Conceding that faith is not for everyone he views religious people with a sympathetic eye his own upbringing his apprenticeship in the trance dance religion of the African Bushmen and his friends and explorations in Christian Buddhist Hindu Muslim and other faiths have all shaped his perspective Faith has always manifested itself in different ways some revelatory and comforting some kind and good some ecumenical and cosmopolitan some bigoted coercive and violent But the future Konner argues will both produce more nonbelievers and incline the religious among us holding their own by having larger families to increasingly reject prejudice and aggression A colorful weave of personal stories of religious and irreligious encounters as well as new scientific research Believers shows us that religion does much good as well as undoubted harm and that for at least a large minority of humanity the belief in things unseen neither can nor should go away Seeking Science-Friendly Christianity Harwood Hoover,2023-11-17 This book brings together lessons

from three journeys The first journey began with my acceptance of Jesus at a young age together with my growing recognition of the differences between the scriptural record and scientific understanding It continued with a young man s adventure a retreat into nature and an encounter with war War and life s darker side convinced me that even as nature brings awe and opens us to religious experience we need morality The second journey began as I inquired into the ministry When the church transferred the guide they had assigned to me Bob Wessman became my mentor Bob was an ordained pastor with a doctorate in theology For twenty years we read and discussed theology including the Catholic ideas that I had discovered while teaching with the Dominican Sisters Bob is in hospice care as I write this and my library is full of the books that he gifted to me Thank you Bob I now had many ideas from my first two journeys but they floated about in my head without an organizing form The challenge was to find a form that would allow the ideas to come together and speak in harmony Differences between Scripture and science had troubled me since my youth and I could not ignore science It was simply too good at finding truth to ignore So science would have to help me Science cannot touch all that religion touches but science and technology can be in correspondence with theology Researching and writing this book could explore that relationship The result was to have remained personal but then I thought that a reader might find an idea or two useful A person who is literate in science might see why trusting Jesus is both good and reasonable This book is the story of the third journey an odyssey through science and Christian theology

**The Way It Is** R Preston Todd,2016-07-25 RPTodd has been involved with Scientific Consciousness for well over 30 years Here you will find a synopsis of how he sees the evolution of consciousness as well as his learnings in order that you too may apply these concepts In The Way It Is items looked at differently than usual or brand new are The three pieces of existence are given new labels You can re program your brain The evolution of consciousness Stories as given by Organized Religion The Infinite Roadmap of Life analogy aka the Akashic Records E mc2 Einstein got it almost right You can turn your ideas into reality Affirmations and Meditation also fit with reality Emotions and Creativity have no words attached The ego cannot be used to provide brand new solutions You will find humorous comments interspersed here and there to keep anyone with a sense of humor engaged If indeed consciousness is evolving the fact you are reading this is proof You will see how within

**Genetic Enslavement** Bruce L. Gary,2011-06 Every living thing is assembled by its genes This is a crucial starting point for exploring a fundamental human dilemma As stated so starkly by Richard Dawkins a human is a lumbering machine created for the task of safeguarding and propagating the all important genes within I would add that since the machine s behavior is driven by brain circuits pre wired by those genes sometimes

we are prone to doing things which work against our individual best interest in order to advance the cause of the genes In other words some of our genes are our enemies outlaw genes because they jeopardize individual well being as they work to assure themselves genetic immortality Every thinking person must face the following dilemma How can I achieve liberation from genetic pitfalls when my values and thinking are so profoundly influenced by the very same genes that have created those pitfalls The more one tries to answer this question the harder it is to imagine that an answer is possible Nevertheless this is a challenge that can become irresistibly fascinating This book is an attempt to bravely explore one of Humanity s most profound existential dilemmas The fate of a civilization is also affected by the outlaw genes especially those responsible for a feeling of discontent with civilization and a vague preference for a simpler society which I would describe as resembling those found in the human ancestral environment This book explores how a flawed human nature undermines every civilization starting a decline and eventual fall Those of us born during the 20th Century are lucky for having seen the best of times for our civilization and as a questionable bonus we may now witness from close up the forces that have condemned every past civilization to ruin
