Kegley,Gregory A. Raymond,2020-02-12 *Great Powers and World Order* encourages critical thinking about the nature of world order by presenting the historical information and theoretical concepts needed to make projections about the global future Charles W Kegley and Gregory Raymond ask students to compare retrospective cases and formulate their own hypotheses about not only the causes of war

but also the consequences of peace settlements Historical case studies open a window to see what strategies for constructing world order were tried before why one course of action was chosen over another and how things turned out By moving back and forth in each case study between history and theory rather than treating them as separate topics the authors hope to situate the assumptions causal claims and policy prescriptions of different schools of thought within the temporal domains in which they took root giving the reader a better sense of why policy makers embraced a particular view of world order instead of an alternative vision

A Military Revolution? Jeremy Black,1991-11-11 In this radical reassessment Jeremy Black challenges many of the established assumptions about the so called Military Revolution of 1560 1660 He argues that it is far from clear that a military revolution did occur during this period Indeed there is more evidence to suggest that the description could be applied more accurately to the following hundred years This book also re examines the relationship between military strength and domestic stability Rather than seeing the latter as the consequence of the former Dr Black argues that it makes more sense to see the former as a result of the latter

Why Wars Happen Jeremy Black,2005-03-01 Why Wars Happen is a groundbreaking inquiry into the crucial yet surprisingly understudied question of why wars occur Jeremy Black one of Britain s foremost military historians presents an interdisciplinary study that draws on subjects such as history political science and international relations and marshals a vast range of material with global examples spanning from the fifteenth century to today Black examines several major modern wars in their historical contexts taking into account cultural differences and various conflict theories He analyzes the three main types of war between cultures within cultures and civil and explores the problems of defining war Black s investigation inspires fascinating questions such as Do wars reflect the bellicosity in societies and states or do they largely arise as a result of a diplomatic breakdown How closely is war linked to changes in the nature of warfare the international system or the internal character of states Black also considers contemporary situations and evaluates the possible course of future wars Offering a valuable and thought provoking analysis on the causes of war and conflicts Why Wars Happen will interest historians and readers of military history alike

An Age of Neutrals Maartje Abbenhuis,2014-06-12 An Age of Neutrals provides a pioneering history of neutrality in Europe and the wider world between the Congress of Vienna and the outbreak of the First World War The long nineteenth century 1815 1914 was an era of unprecedented industrialization imperialism and globalization one which witnessed Europe s economic and political hegemony across the world Dr Maartje Abbenhuis explores the ways in which neutrality reinforced these interconnected developments She argues that a passive conception of neutrality has thus far prevented historians from understanding the high regard with which neutrality as a tool of diplomacy and statecraft and as a popular ideal with numerous applications was held This compelling new history exposes neutrality as a vibrant and essential part of the nineteenth century international system a powerful instrument used by great and small powers to solve disputes stabilize international relations and promote a variety of interests within and outside the continent
