Introduction to Psychology Sayed Jafar Mahmud, 2004 *Self-culture in Reading, Speaking, and Conversation* William Sherwood, 1855 **Lectures on the Calculus of Variations and Optimal Control Theory** L. C. Young, 2024-10-30 This book is divided into two parts The first addresses the simpler variational problems in parametric and nonparametric form The second covers extensions to optimal control theory The author opens with the study of three classical problems whose solutions led to the theory of calculus of variations They are the problem of geodesics the brachistochrone and the minimal surface of revolution He gives a detailed discussion of the Hamilton Jacobi theory both in the parametric and nonparametric forms This leads to the development of sufficiency theories describing properties of minimizing extremal arcs Next the author addresses existence theorems He first develops Hilbert's basic existence theorem for parametric problems and studies some of its consequences Finally he develops the theory of generalized curves and automatic existence theorems In the second part of the book the author discusses optimal control problems He notes that originally these problems were formulated as problems of Lagrange and Mayer in terms of differential constraints In the control formulation these constraints are expressed in a more convenient form in terms of control functions After pointing out the new phenomenon that may arise namely the lack of controllability the author develops the maximum principle and illustrates this principle by standard examples that show the switching phenomena that may occur He extends the theory of geodesic coverings to optimal control problems Finally he extends the problem to generalized optimal control problems and obtains the corresponding existence theorems **A Shipyard in Maine** Ralph Linwood Snow, Douglas K. Lee, 1999 Toward the end of the nineteenth century a new firm was established in Bath Maine at a time when established yards in the City of Ships were turning to steel construction Percy Small would set unrivaled records for wooden shipbuilding and ship management launching 22 giant five and six masted schooners along with 16 four masters in two decades Not just builders Percy Small also demonstrated an unusual knack for making money as managing owners of a large fleet of schooners and the stories of their ships are told in these pages in wonderful detail Doug Lee's meticulously researched construction drawings add immeasurably to the

Quadrilingual Economics Dictionary Simon K. Kuipers,B.S. Wilpstra,2012-12-06 This quadrilingual economics dictionary is the result of many years of work Professor Frits J de Jong gathered material for this book since the very beginning of his professional career in the final years of the forties Unfortunately the author himself was not able to see the final result of his labours in book form A mere few weeks after the completion of the manuscript in November 1976 Professor De Jong passed away As Hartog and Hennipman wrote in their memorials Frits de Jong always devoted much attention to the development of concepts and terminology Throughout his career he exhibited great determination and perseverance in trying to achieve a clear and consistent terminology and its subsequent use in the science of economics 2 That his efforts were mainly aimed at his native language was due to the fact that a language such as Dutch which is only practiced in a small geographic area faces the danger of a large scale introduction of foreign words specifically English American German and French words in this case He always strongly resisted such a debasement of the Dutch language and sought instead to construct appropriate Dutch words for the existing English German and French ones An early example can be found in an article published in De Economist of 1950 entitled De economische terminologie in het Nederlands The Terminology of Economics in Dutch
