## Risky Agricultural Markets:

*Risky Agricultural Markets* Pasquale L Scandizzo,Peter B R Hazell,Jock Anderson,2019-07-11 This book shows how decisions made by individual farmers influence the efficiency of agricultural markets Unless farmers properly take account of the correlation between prices and yields in forming their price forecasts competitive markets will often be socially inefficient leading to misallocation of resources The authors demonstrate that a simple and practical price forecasting rule based on expected per unit revenue is generally adequate to ensure efficient market behavior Time series data from various countries are used to test the hypothesis that market supply is influenced by the correlation of price and yield as well as by lagged market prices The importance of market inefficiencies in risky situations is shown to depend on the variability of yields the nature of farmers price forecasting behavior the degree of private risk aversion and the elasticity of demand The authors suggest and evaluate three basic policy approaches governments may take when confronted with very inefficient markets establishing production quotas improving market information services and implementing price stabilization schemes They conclude by discussing implications of the study for the specification of agricultural supply models and for the economic appraisal of risky investment projects

**Income Risk Management in Agriculture** OECD,2000-12-11 These OECD workshop proceedings examine the various risk strategies used by farm households in particular those attracting renewed interest such as diversification of income sources vertical co ordination hedging on futures markets insurance coverage and public safety nets

**A Comprehensive Assessment of the Role of Risk in U.S. Agriculture** Richard E. Just,Rulon D. Pope,2013-11-11 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk

research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk    *Federal Agriculture Reform and Risk Management Act of 2013* United States. Congress. House. Committee on Agriculture,United States.

Congress. House. Committee on the Judiciary,2013    *Comprehensive analysis of disaster risk reduction and management system for agriculture in North Macedonia* FAO,2024-10-10 This report aims to highlight the current strengths of the institutional disaster risk reduction DRR system for agriculture in North Macedonia as well as indicate existing gaps and capacity needs to further enhance it A comprehensive assessment is conducted which includes a general overview of the

country's agriculture sector and outlines the most frequent natural hazards impacting it. It is followed by an analysis of the existing legal policy and institutional structure and discusses various components of the system including the functioning of early warning systems assessments of disaster risks post disaster needs assessments including damage and loss assessments and the availability of agricultural insurance for farmers. It concludes by providing recommendations for capacity building interventions to strengthen the current system to reduce the adverse impacts of natural hazards in particular floods, landslides and droughts and climate change on agriculture in North Macedonia.
