Ritual Cosmos The Sanctification Of Life In African Religions:

Ritual Cosmos Evan M. Zuesse, 1985 **Theoretical Explorations in African Religion** Wim van Binsbergen, Matthew Schoffeleers, 2013-10-28 First published in 1985 This collection of papers on theoretical and methodological perspectives in the study of African religion is the outcome of a conference which the editors were asked to convene on behalf of the African Studies Centre Leiden in December 1979 Religious Ways of Experiencing Life Carl Olson, 2016-02-05 Religious Ways of Experiencing Life A Global and Narrative Approach surveys world religions using the narratives and discourses of each tradition to describe it in its own terms Carl Olson examines each tradition's practices teachings material culture roles of women and path to salvation as well as the experiences of its followers The exploration of lived experience draws out and emphasizes the plural nature of religious traditions The volume includes chapters on all current major world religions as well as material on ancient religions of the Mediterranean indigenous North American and African spiritual traditions and New Age and new religious movements Featuring timelines and suggestions for further reading this text will be of interest to undergraduate students seeking a broad introduction to World Religion or Lived Religion **Introduction to Religious Studies** Harvey J. Sindima, 2012-07-10 In Introduction to Religious Studies Harvey J Sindima provides an unconventional approach to the study of world religions Often books and courses on religious studies focus on the major world religions This approach however frequently ignores other religious experiences such as those of various African groups as well as the indigenous people of the Americas and Australia These less widespread religions are commonly described in pejorative terms such as primitive religions or non literate religions Focusing solely on well known religions is an approach that impoverishes religious studies and deprives students of the enormous wealth of religious knowledge of the world Introduction to Religious Studies pulls together the diverse religious experience of Africans Native Americans and the indigenous peoples of Australia in order to provide a comprehensive introduction to the study of religion and broaden the horizons of religious studies students Under each theme or topic examples are drawn from religions of salvation as well as African and Native American religious traditions This book provides students with a deep wide and very rich introduction to religious studies *The Church in Africa, 1450-1950* Adrian Hastings, 1995-01-05 I can merely admire his courage in tackling so complex and difficult a subject he should succeed in stimulating a fresh generation of research this well written intelligent and lively study will greatly stimulate anyone fortunate enough to read it Christianity provided the constitutive identity of historic Ethiopia From the sixteenth century and increasingly from the nineteenth it entered decisively into the life and culture of an increasing number of other African peoples In the course of the twentieth century African Christians have become a major part of the world Church and arguably modern African history as a whole is not intelligible without its powerful Christian element Yet despite the great advance in African historiography over the last forty years this is the first major volume to consider the historical development and character of the Christian Church in Africa as a whole linking together Ehtiopia Orthodoxy

Roman Catholicism Protestantism and the numerous Independent churches of modern times The book focuses throughout on the role of conversion the shaping of Church life and its relationship to traditional values and the impact of political power Professor Hastings also compares the relation of Christian history to the comparable development of Islam in Africa **What Is Religion?** Jeppe Sinding Jensen, 2019-06-19 Starting from the premise that religion is a human endeavour that can be analysed and compared across time and cultures What Is Religion brings the most up to date scholarship to bear on humankind's most enduring creation Religious belief is one of the most pervasive and ubiquitous characteristics of human society Religion has influenced human lives since prehistoric times shaping the world views of cultures from isolated tribes to vast empires The book opens with a brief history of the idea of religion then divides the study of religion into four essential topics types representations practices and institutions and concludes with a final eye opening chapter on religion today Packed with case studies from a wide range of religions past and present What Is Religion offers a very current comprehensive yet intellectually challenging overview of the history theories practices and study of religion Thoroughly updated throughout this second edition provides an accessible wide ranging engaging and concise book for undergraduate students in the study of religion It is also invaluable for students of anthropology history psychology sociology and theology as well as anyone interested in how and why humans became and continue to be religious **Mapping Systematic**

Theology in Africa Ernst M Conradie, Charl E Fredericks, 2004-08-01 The emergence of an indigenous African theology especially since the 1960s is well documented A wealth of literature has been published in the context of African theology especially over the last two or three decades This indexed bibliography contains a number of publications in and for the African context specifically relevant to the fields of systematic theology and ethics **Religion and World Civilizations**

Critical Reflections on Indigenous Religions James L. Cox, 2016-04-22 The study of indigenous religions has become an important academic field particularly since the religious practices of indigenous peoples are being transformed by forces of globalization and transcontinental migration This book will further our understanding of indigenous religions by first considering key methodological issues related to defining and contextualizing the religious practices of indigenous societies both historically and in socio cultural situations Two further sections of the book analyse cases derived from European contexts which are often overlooked in discussion of indigenous religions and in two traditional areas of study South America and Africa

The Civilization of Illiteracy Mihai Nadin, 1997 Phenomena related to the transition from a literacy dominated civilization to one of various means of expression and communication are at the center of his book The fall of totalitarian regimes the current structural difficulties of the European Community the burden of state bureaucracies the world wide effort of re engineering and the global economy are part of the bigger picture of a necessary development

Histories of Religious Thought and Practice in Africa PROFESSOR LOUIS. BRENNER, 2024-12-17 This book is a richly detailed comparative analysis of endogenous Muslim and Christian religious thought and practice in sub Saharan Africa Organized thematically the book presents a conceptual and analytical framework for the study of religious traditions as complex and constantly evolving social phenomena The most salient theme in the book is how different religious traditions defined and provided for the personal and communal wellbeing of their

adherents Other major themes explore how religious traditions have influenced one another how religious practitioners conceptualized and interacted with spiritual entities how religious knowledge and expertise were acquired and transmitted how rituals were organized and structured in order to achieve their aims and how rituals affected those who performed them Additional topics analysed include the personalization of relationships with spiritual entities the gendering of religious thought and practice how personal transformative rituals were conceptualized and enacted with reference to stages of the life cycle such as birth marriage and death and how suffering was seen as integral to the process of personal transformation Overall the book engages with issues that continue to animate the study of religious thought and practice in Africa and African studies more generally

In Whose Image? Abdou Maliqalim Simone, 1994-07-13 A Muslim scholar with extensive experience in Africa T Abdou Maliqalim Simone was recruited by the Islamic fundamentalist Shari'a Movement in Sudan to act as consultant for its project to unite Muslims and non Muslims in Khartoum's shanty towns Based on his interviews with hundreds of individuals during this time plus extensive historical and archival research In Whose Image is a penetrating examination of the use of Islam as a tool for political transformation Drawing a detailed portrait of political fundamentalism during the 1985-89 period of democratic rule in the Sudan Simone shows how the Shari'a Movement attempted to shape a viable social order by linking religious integrity and economic development where religious practice was to dominate all aspects of society and individuals' daily lives However because Sudanese society is remarkably diverse ethnically and religiously this often led to conflict fragmentation and violence in the name of Islam Simone's own Islamic background leads him to deplore the violence and the devastating psychological economic and cultural consequences of one form of Islamic radicalism while holding to hope that a viable form of this inherently political religion can in fact be applied As a counterpoint he ends with a discussion of South Africa's Call of Islam which seeks political unity through a more tolerant interpretation of Islam As an introduction to religious discourse in Africa this book will be widely read by students and scholars throughout African Studies Religious Studies Anthropology and Political Science
