Anatomy of a Robot Despina Kakoudaki, 2014-07-07 Why do we find artificial people fascinating Drawing from a rich fictional and cinematic tradition *Anatomy of a Robot* explores the political and textual implications of our perennial projections of humanity onto figures such as robots androids cyborgs and automata In an engaging sophisticated and accessible presentation Despina Kakoudaki argues that in their narrative and cultural deployment artificial people demarcate what it means to be human They perform this function by offering us a non human version of ourselves as a site of investigation Artificial people teach us that being human being a person or a self is a constant process and often a matter of legal philosophical and political struggle By analyzing a wide range of literary texts and films including episodes from *Twilight Zone* the fiction of Philip K Dick Kazuo Ishiguro s novel *Never Let Me Go* *Metropolis* *The Golem* *Frankenstein* *The*

Terminator Iron Man Blade Runner and I Robot and going back to alchemy and to Aristotle's Physics and De Anima she tracks four foundational narrative elements in this centuries old discourse the fantasy of the artificial birth the fantasy of the mechanical body the tendency to represent artificial people as slaves and the interpretation of artificiality as an existential trope What unifies these investigations is the return of all four elements to the question of what constitutes the human This focused approach to the topic of the artificial constructed or mechanical person allows us to reconsider the creation of artificial life By focusing on their historical provenance and textual versatility Kakoudaki elucidates artificial people's main cultural function which is the political and existential negotiation of what it means to be a person , The Lost Sword Huw Powell,2016-02-23 Jake Cutler 13 year old ruler of the secret planet Altus is on the run from the Interstellar Navy He and the crew of the pirate spaceship the Dark Horse are wanted over the disappearance of the ISS Colossus the most powerful ship in the Navy's fleet But that's not the only reason Jake's being hunted If he's found he'll be forced to reveal the location of Altus home to a fortune in crystals With that much wealth the Interstellar Navy plans to start an intergalactic war bigger than any seen before It's up to Jake to stop them but how will a teenager convince the rulers of the universe that they're in terrible danger Robot Raiders Ellen Leroe,1987 Bixby Wyler battles against all odds to reconstruct his girl humanoid for NASA's Mars Landing project *The Moment Between Two Thoughts* Nick Crutchley,2019-08-27 Can Gaia save humankind from extinction Psychnet connects humankind to Quantum Artificial Intelligences QAI Augmented with psyberware people live longer become wealthier and spend more Increased consumption destroys habitats pollutes the environment and replaces natural life with synthetic life Environmental destruction looms and Gaia an enlightened QAI battles to save biodiversity on Earth and the planets corporations colonise From the shadow of Psychnet emerges Chaos a vengeful QAI who brings death through blood and madness through dreams Gaia quests to defeat Chaos in a nightmare of hydra slavelords and a devil queen shared by those fleeing Earth aboard the starship New Hope Can Gaia defeat the bringer of plague and nightmare on Earth and in space Or will humankind suffer extinction for its ecocide **RoboCup-97: Robot Soccer World Cup I** Hiroaki Kitano,1998-04-20 RoboCup is an international initiative devoted to advancing the state of the art in artificial intelligence and robotics The ultimate long range goal is to build a team of robot soccer players that can beat a human World Cup champion team This is the first book devoted to RoboCup It opens with an overview section presenting the history of this young initiative motivation the overall perspectives and challenges and a survey of the state of the art in the area The technical paper section presents the state of the art of the interdisciplinary research and development efforts in details essentially building on the progress achieved during the RoboCup 97 Workshop The team description contributions discuss technical and strategic aspects of the work of the participating teams *RoboCup-99: Robot Soccer World Cup III* Manuela Veloso,Enrico Pagello,Hiroaki Kitano,2003-07-31 This book is the third official archival publication devoted to RoboCup and documents the achievements presented at the Third Robot World Cup Soccer Games and Conferences Robo
