**Fundamentals of Robotic Mechanical Systems** Jorge Angeles,2013-12-09 The 4th edition includes updated and additional examples and exercises on the core fundamental concepts of mechanics robots and kinematics of serial robots New images of CAD models and physical robots help to motivate concepts being introduced Each chapter of the book can be read independently of others as it addresses a separate issue in robotics Edmund Berkeley and the Social Responsibility of Computer Professionals Bernadette Longo,2015-09-01 Edmund C Berkeley 1909 1988 was a mathematician insurance actuary inventor publisher and a founder of the Association for Computing Machinery ACM His book Giant Brains or Machines That Think 1949 was the first explanation of computers for a general readership His journal Computers and Automation 1951 1973 was the first journal for computer professionals In the 1950s Berkeley developed mail order kits for small personal computers such as Simple Simon and the Braniac In an era when computer development was on a scale barely affordable by universities or government agencies Berkeley took a different approach and sold simple computer kits to average Americans He believed that digital computers using mechanized reasoning based on symbolic logic could help people make more rational decisions The result of this improved reasoning would be better social conditions and fewer large scale wars Although Berkeley s populist notions of computer development in the public interest did not prevail the events of his life exemplify the human side of ongoing debates concerning the social responsibility of computer professionals This biography of Edmund Berkeley based on primary sources gathered over 15 years of archival research provides a lens to understand social and political decisions surrounding early computer development and the consequences of these decisions in our 21st century lives **A Theory of the Drone** Grégoire Chamayou,2015-01-06 Drone warfare has raised profound ethical and constitutional questions both in the halls of Congress and among the U S public Not since debates over nuclear warfare has American military strategy been the subject of discussion in living rooms classrooms and houses of worship Yet as this groundbreaking new work shows the full implications of drones have barely been addressed in the recent media storm In a unique take on a subject that has grabbed headlines and is consuming billions of taxpayer dollars each year philosopher Gr goire Chamayou applies the lens of philosophy to our understanding of how drones are changing our world For the first

time in history a state has claimed the right to wage war across a mobile battlefield that potentially spans the globe Remote control flying weapons he argues take us well beyond even George W Bush s justification for the war on terror What we are seeing is a fundamental transformation of the laws of war that have defined military conflict as between combatants As more and more drones are launched into battle war now has the potential to transform into a realm of secretive targeted assassinations of individuals beyond the view and control not only of potential enemies but also of citizens of democracies themselves Far more than a simple technology Chamayou shows drones are profoundly influencing what it means for a democracy to wage war A Theory of the Drone will be essential reading for all who care about this important question

**Multisensor Fusion** Rajive Joshi, Arthur C. Sanderson, 1999 The fusion of information from sensors with different physical characteristics such as sight touch sound etc enhances the understanding of our surroundings and provides the basis for planning decision making and control of autonomous and intelligent machines The minimal representation approach to multisensor fusion is based on the use of an information measure as a universal yardstick for fusion Using models of sensor uncertainty the representation size guides the integration of widely varying types of data and maximizes the information contributed to a consistent interpretation In this book the general theory of minimal representation multisensor fusion is developed and applied in a series of experimental studies of sensor based robot manipulation A novel application of differential evolutionary computation is introduced to achieve practical and effective solutions to this difficult computational problem

Exter, Andrew A. Tawfik, Yvonne Earnshaw, 2023-11-27 Learning design is an ill structured process that must account for multiple stakeholders contextual constraints and other instructional needs Whereas many theories outline learning theories less is known about the formative design process and how it impacts the design and development of learning technologies This is critical because a formative view considers the issues that educators encounter and how to overcome them during the learning design process This edited volume provides a multi faceted look at theories studies and design cases that employ formative design in learning across multiple domains Topics include processes oriented around design thinking design based research and others Additional chapters provide contextual considerations such as describing how formative design was used to design learning solutions for STEM learning and food banks as well as overcoming challenges in emergency remote teaching In doing so the book provides an interdisciplinary view that explores how scholars and practitioners engage in formative practices that support a wide array of learners and contexts
