Megalithic Tombs in Western Iberia Chris Scarre,Luiz Oosterbeek,2019-12-27 Western Iberia has one of the richest inventories of Neolithic chambered tombs in Atlantic Europe with particular concentrations in Galicia northern Portugal and the Alentejo Less well known is the major concentration of tombs along the Tagus valley straddling the Portuguese Spanish frontier Within this cluster is the Anta da Lajinha a small megalithic tomb in the hill country north of the River Tagus Badly damaged by forest fire and stone removal it was the subject of joint British Portuguese excavations in 2006 2008 accompanied by environmental investigations and OSL dating This volume takes the recent excavations at Lajinha and the adjacent site of Cabe o dos Pendentes as the starting point for a broader consideration of the megalithic tombs of western Iberia Key themes addressed are relevant to megalithic tombs more generally including landscape chronology settlement and interregional relationships Over what period of time were these tombs built and used Do they form a horizon of intensive monument construction or were the tombs the product of a persistent long lived tradition How do they relate to the famous rock art of the Tagus valley and to the cave burials and open air settlements of the region in terms of chronology and landscape A final section considers the Iberian tombs within the broader family of west European megalithic monuments focusing on chronologies parallels and patterns of contact Did the Iberian tombs emerge through connections with older established megalithic traditions in other regions such as Brittany or were they are the outcome of more general processes operating among Atlantic Neolithic societies

The Future of Nuclear Waste Rosemary Joyce, 2020-01-24 How can nations ensure that buried nuclear waste goes undisturbed for thousands of years The United States government tried to solve this problem with the help of experts they identified in communication materials science and futurism From the perspective of a contemporary archaeologist The Future of Nuclear Waste looks at what these experts suggested and what the government endorsed designs for a modern monument an artificial ruin a purpose built archaeological site that would escape future exploration One design selected for development argued that because specific archaeological sites and objects among them Stonehenge Serpent Mound the Rosetta Stone and rock art made long ago have endured and are seen as significant today contemporary engineers could build monuments that would be equally effective in conveying messages that last even longer An alternative proposal which government planners set aside was rooted in the idea that universal archetypes of design arouse similar human emotions in all times and places Both proposals used common sense assuming that human reactions and understandings are relatively predictable Employing an anthropology of common sense Rosemary Joyce explores why people chosen for their expertise relied on generalizations contradicted by the actual

history of preservation and interpretation of archaeological sites and the closest analogues to archetype based designs which are the large scale installations produced in the Land Art movement The book reveals the underlying imagination shared by the experts government planners and artists in which the American West is an empty space available for projects like these It counters this with the dissenting voices of indigenous scholars and activists who document the presence on these nuclear landscapes of Native American people The result is an eye opening and unique demonstration of how a deep understanding of the remote past informs critical debates about the present

Handbook to Life in Prehistoric Europe Jane McIntosh, 2009-06-01 For most of Europe's long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunter gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth

beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe's massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail Handbook to Life in Prehistoric Europe gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire
