## **Rock Carvings Of Northern Britain:**

**Rock Carvings of Northern Britain** Stan Beckensall, 1986      **Signalling and Performance: Ancient Rock Art in Britain and Ireland** Aron Mazel, George Nash, 2022-08-28 This lavishly illustrated volume presents a state of the art survey of the ancient rock art of Britain and Ireland Bringing together new discoveries and new interpretations it enhances our understanding and further establishes ancient British and Irish rock art as a significant archaeological assemblage worthy of attention and additional study      **Prehistoric Rock Art in Britain** Stan Beckensall, 2009-10-15 In this latest book the prolific Stan Beckensall returns to his principal specialism Britains prehistoric rock art      European Landscapes of Rock-Art Christopher Chippindale, George Nash, 2003-09-02 Rock art the ancient images which still scatter the rocky landscapes of Europe is a singular kind of archaeological evidence Fixed in place it does not move about as artefacts as trade objects do Enigmatic in its meaning it uniquely offers a direct record of how prehistoric Europeans saw and envisioned their own worlds European Landscapes of Rock Art provides a number of case studies covering a range of European locations including Ireland Italy Scandinavia Scotland and Spain which collectively address the chronology and geography of rock art as well as providing an essential series of methodologies for future debate Each author provides a synthesis that focuses on landscape as an essential part of rock art construction From the paintings and carved images of prehistoric Scandinavia to Second World War graffiti on the German Reichstag this volume looks beyond the art to the society that made it The papers in this volume also challenge the traditional views of how rock art is recorded Throughout there is an emphasis on informal and informed methodologies The authors skilfully discuss subjectivity and its relationship with landscape since personal experience from prehistoric times to the present day plays an essential role in the interpretation of art itself The emphasis is on location on the intentionality of the artist and on the needs of the audience This exciting volume is a crucial addition to rock art literature and landscape archaeology It will provide new material for a lively and greatly debated subject and as such will be essential for academics non academics and commentators of rock art in general      **Art as Metaphor** Aron D. Mazel, George Nash, Clive Waddington, 2007 Enigmatic esoteric and fascinating the rock art of the British Isles has for a long time been a well kept secret This volume brings together a carefully selected collection of papers reporting on recent discoveries and regional surveys covering British prehistoric rock art from over 10 000 years ago      Rock Art and the Prehistory of Atlantic Europe Mr Richard Bradley, Richard Bradley, 2002-11 Professor Bradley discusses the numerous rock carvings made four to five thousand years ago along the Atlantic seaboard from Scotland to Spain      The Stone Circles of Britain, Ireland, and Brittany Aubrey Burl, 2000-01-01 The spectacular stone circles of western Europe some nearly 6000 years old have intrigued viewers through the ages This beautiful book about these megalithic rings explores their ancestry methods of construction and eventual desertion A substantially revised version of Aubrey Burl's highly praised work The Stone Circles of the British Isles it offers new insights into the purpose of stone circles It also provides a new interpretation

of Stonehenge and of Callanish in Scotland the first overview of the cromlechs in Brittany a discussion of the problems of archaeoastronomy as related to stone circles a greatly expanded Gazetteer and an up to date list of radiocarbon dates and recent excavations      Abstractions Based on Circles: Papers on prehistoric rock art presented to Stan Beckensall on his 90th birthday Paul Frodsham, Kate Sharpe, 2022-09-22 Stan Beckensall is renowned for his work done on an entirely amateur basis discovering recording and interpreting Atlantic rock art in his home county of Northumberland and beyond Presented on his 90th birthday this diverse and stimulating collection of papers celebrates his crucial contribution to rock art studies and looks to the future      **The Rock-Art Landscapes of Rombalds Moor, West Yorkshire** Vivien Deacon, 2020-04-30 This landscape study of the rock art of Rombalds Moor West Yorkshire considers views of and from the sites In an attempt to understand the rock art landscapes of prehistory the study considered the environment of the moor and its archaeology along with the ethnography from the whole circumpolar region      *Orientation of Prehistoric Monuments in Britain: A Reassessment* Alistair Marshall, 2021-07-08 Reassesses major axial alignment at many megalithic ritual and funerary monuments Neolithic to Bronze Age in Britain and Ireland not in terms of abstract astronomical concerns but as an expression of repeated seasonal propitiation involving community agrarian economy and ancestry in an attempt to mitigate variable environmental conditions      Handbook of Rock Art Research David S. Whitley, 2001 While there has always been a large public interest in ancient pictures painted or carved on stone the archaeological study of rock art is in its infancy But intensive amounts of research has revolutionized this field in the past decade New methods of dating and analysis help to pinpoint the makers of these beautiful images new interpretive models help us understand this art in relation to culture Identification conservation and management of rock art sites have become major issues in historical preservation worldwide And the number of archaeologically attested sites has mushroomed In this handbook the leading researchers in the rock art area provide cogent state of the art summaries of the technical interpretive and regional advances in rock art research The book offers a comprehensive basic reference of current information on key topics over six continents for archaeologists anthropologists art historians and rock art enthusiasts      **New Light on the Neolithic of Northern England** Gill Hey, Paul Frodsham, 2021-01-13 These papers highlight recent archaeological work in Northern England in the commercial academic and community archaeology sectors which have fundamentally changed our perspective on the Neolithic of the area Much of this was new work and much is still not published has been overlooked in the national discourse The papers cover a wide geographical area from Lancashire north into the Scottish Lowlands recognising the irrelevance of the England Scotland Border They also take abroad chronological sweep from the Mesolithic Neolithic transition to the introduction of Beakers into the area The key themes are the nature of transition the need for a much improved chronological framework regional variation linked to landscape character links within northern England and with distant places the implications of new dating for our understanding the axe trade the changing nature of settlement and agriculture the character early Neolithic

enclosures the need to integrate rock art into wider discourse      **The Archaeology of Rock-Art** Christopher Chippindale, Paul S. C. Tacon, 1998 Pictures painted and carved in caves and on open rock surfaces are amongst our loveliest relics from prehistory This pioneering set of sparkling essays goes beyond guesses as to what the pictures mean instead exploring how we can reliably learn from rock art as a material record of distant times in short rock art as archaeology Sometimes contact period records offer some direct insight about indigenous meaning so we can learn in that informed way More often we have no direct record and instead have to use formal methods to learn from the evidence of the pictures themselves The book's eighteen papers range wide in space and time from the Palaeolithic of Europe to nineteenth century Australia Using varied approaches within the consistent framework of informed and proven methods they make key advances in using the striking and reticent evidence of rock art to archaeological benefit      **British and Irish Archaeology**, 1994

*The Neolithic of the Irish Sea* Chris Fowler, 2015-03-31 This collection of 24 papers aims to reconsider the nature and significance of the Irish Sea as an area of cultural interaction during the Neolithic period The traditional character of work across this region has emphasised the existence of prehistoric contact with sea routes criss crossing between Ireland the Isle of Man Anglesey and the British mainland A parallel course of investigation however has demonstrated that the British and Irish Neolithics were in many ways different with distinct indigenous patterns of activity and social practices The recent emphasis on regional studies has further produced evidence for parallel yet different processes of cultural change taking place throughout the British Isles as a whole This volume brings together some of these regional perspectives and compares them across the Irish Sea area The authors consider new ways to explain regional patterning in the use of material objects and relate them to past practices and social strategies Were there practices that were shared across the Irish Sea area linking different styles of monuments and material culture or were the media intrinsic to the message The volume is based on papers presented at a conference held at the University of Manchester in 2002      **Open-Air Rock-Art Conservation and Management**

Timothy Darvill, Antonio Pedro Batarda Fernandes, 2014-06-20 While much has been achieved in understanding and managing weather effects and erosion phenomena affecting ancient imagery within the relatively protected environments of caves and rock shelters the same cannot be said of rock art panels situated in the open air Despite the fact that the number of known sites has risen dramatically in recent decades there are few examples in which the weathering and erosion dynamics are under investigation with a view to developing proposals to mitigate the impact of natural and cultural processes Most of the work being done in different parts of the world appears to be ad hoc with minimal communication on such matters between teams and with the wider archaeological community This richly illustrated book evaluates rock art conservation in an holistic way bringing together researchers from across the world to share experiences of work in progress or recently completed The chapters focus on a series of key themes documentation projects and resource assessments the identification and impact assessment of weathering erosion processes at work in open air rock art sites the

practicalities of potential or implemented conservation interventions experimentation and monitoring programs and general management issues connected with public presentation and the demands of ongoing research investigations Consideration is given to the conservation of open air rock art imagery from many periods and cultural traditions across the Old and New Worlds This timely volume will be of interest to conservators managers and researchers dealing with aesthetic and ethical issues as well as technical and practical matters regarding the conservation of open air rock art sites

**Motherhood in Antiquity** Dana Cooper,Claire Phelan,2017-03-07 This edited collection examines concepts and realities of motherhood in the ancient world The collection uses essays on the Roman Empire Mesoamerica the Philippines Egypt and India to emphasize the concept of motherhood as a worldwide phenomenon and experience While covering a wide geographical range the editors arranged the collection thematically to explore themes including the relationship between the mother particularly ruling mothers and children and the mother in real life and legend Some essays explore related issues such as adaptation and child custody after divorce in ancient Egypt and the mother in religious culture of late antiquity and the ancient Buddhist Indian world The contributors utilize a variety of methodologies and approaches including textual analysis and archaeological analysis in addition to traditional historical methodology

**Ley Lines and Earth Energies** David Cowan,2003 This exploration shows how natural forces affect our behavior how they can be used to enhance our health and well being and ultimately how they bring us closer to penetrating one of the deepest mysteries being explored

**Image and Audience** Richard Bradley,2009-03-12 There have been many accounts of prehistoric art but nearly all of them begin by assuming that the concept is a useful one In this extensively illustrated study Richard Bradley asks why ancient objects were created and when and how they were used He considers how the first definitions of prehistoric artworks were made and the ways in which they might be related to practices in the visual arts today Extended case studies of two immensely popular and much visited sites illustrate his argument one considers the megalithic tombs of Western Europe whilst the other investigates the decorated metalwork and rock carvings of Bronze Age Scandinavia

**Prehistoric rock art in Scandinavia** Courtney Nimura,2015-11-30 Scandinavia is home to prolific and varied rock art images among which the ship motif is prominent Because of this the rock art of Scandinavia has often been interpreted in terms of social ritual cosmology and religion associated with the maritime sphere This comprehensive review is based on the creation of a Scandinavia wide GIS database for prehistoric rock art and reexamines theoretical approaches and interpretations in particular with regard to the significance of the ship and its relationship to a maritime landscape Discussion focuses on material agency as a means to understanding the role of rock art within society Two main theories are developed The first is that the sea was fundamental to the purpose and meaning of rock art especially in the Bronze Age and therefore that sea level shoreline changes would have inspired a renegotiation of the relationship between the rock art sites and their intended purpose The fundamental question posed is would such changes to the landscape have affected the purpose and meaning of rock art for the

communities that made and used these sites Various theories from within and outside of archaeology are drawn on to examine environmental change and analyze the rock art led to second theory that the purpose of rock art might have been altered to have an effect on the disappearing sea The general theory that rock art would have been affected by environmental change was discussed in tandem with existing interpretations of the meaning and purpose of rock art Imbuing rock art with agency means that it could be intertwined in an active web of relations involving maritime landscapes shoreline displacement and communities Though created in stone and fixed in time and place rock art images have propagated belief systems that would have changed over time as they were re carved abandoned and used by different groups of inhabitants In the thousands of years rock art was created it is likely that shoreline displacement would have inspired a renegotiation of the purpose and meaning of the imagery situated alongside the Scandinavian seas This journey through a prehistoric Scandinavian landscape will lead us into a world of ancient beliefs and traditions revolving around this extraordinary art form
