Rockets Missiles And Moons:

Rockets, Missiles, and Moons Charles Ira Coombs, 1957 **Missiles, Rockets and Satellites** United States. Department of the Army, 1958 **Missiles, Rockets and Satellites: Earth satellites and space exploration** United States. Department of the Army, 1958 Rockets, Missiles, and Moons Charles Coombs (kinderboeken.), 1957 **Missiles, Rockets, and Space in War and Peace** United States. Department of the Army, 1959 **Missiles, Rockets and Satellites: v.l. U.S.S.R** United States Department of the Army, 1958 **USSR: Missiles, Rockets and Space Effort** United States. Department of the Army. Office, Chief of Research and Development, 1960 Rockets and People: The moon race Boris Evseevich Chertok, 2005 *Rockets, Missiles, and Satellites* Clayton Knight, 1958 Introduces the history and principles of rocket flight and describes the various types of rockets and their purpose *By Rocket to the Moon* Vladimir Isaakovich Levantovskii, 1961 Research is presented on projected travel to the moon and other planets The following areas are covered 1 Flight to the moon plans and reality technical feasibility of such an expedition interplanetary stations certain plans for expeditions and flight of unmanned automatic rockets 2 Investigation of the moon and outer space matter in the universe the relief the physical conditions and the methods of scientific investigations of the moon and the moon as an intermediate station 3 Interplanetary flights interplanetary trajectories of pulsed rockets the first artificial planets trajectories of continuous thrust rockets role of man in space flight use of sounding rockets interplanetary expeditions and conquering space The second and third Soviet cosmic rockets are also discussed and a bibliography is presented **Air Force and Space Digest** , 1958 The Bomb and America's Missile Age Christopher Gainor, 2018-10-15 How nuclear weapons helped drive the United States into the missile age The intercontinental ballistic missile ICBM designed to quickly deliver thermonuclear weapons to distant targets was the central weapons system of the Cold War ICBMs also carried the first astronauts and cosmonauts into orbit More than a generation later we are still living with the political technological and scientific effects of the space race while nuclear armed ICBMs remain on alert and in the headlines around the world In *The Bomb and America's Missile Age* Christopher Gainor explores the US Air Force's USAF decision in March 1954 to build the Atlas America's first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America's space program and the development of US strategic forces *The Bomb and America's Missile Age* uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space

exploration the book makes a major contribution to the history of rocket development and the nuclear age **Two Sides of the Moon** David Scott,Alexei Leonov,2024-03-26 Growing up on either side of the Iron Curtain David Scott and Alexei Leonov experienced very different childhoods but shared the same dream to fly Excelling in every area of mental and physical agility Scott and Leonov became elite fighter pilots and were chosen by their countries burgeoning space programs to take part in the greatest technological race ever to land a man on the moon In this unique dual autobiography astronaut Scott and cosmonaut Leonov recount their exceptional lives and careers spent on the cutting edge of science and space exploration With each mission fraught with perilous risks and each space program touched by tragedy these parallel tales of adventure and heroism read like a modern day thriller Cutting fast between their differing recollections this book reveals in a very personal way the drama of one of the most ambitious contests ever embarked on by man set against the conflict that once held the world in suspense the clash between Russian communism and Western democracy Before training to be the USSR s first man on the moon Leonov became the first man to walk in space It was a feat that won him a place in history but almost cost him his life A year later in 1966 Gemini 8 with David Scott and Neil Armstrong aboard tumbled out of control across space Surviving against dramatic odds a split second decision by pilot Armstrong saved their lives they both went on to fly their own lunar missions Armstrong to command Apollo 11 and become the first man to walk on the moon and Scott to perform an EVA during the Apollo 9 mission and command the most complex expedition in the history of exploration Apollo 15 Spending three days on the moon Scott became the seventh man to walk on its breathtaking surface Marking a new age of USA USSR cooperation the Apollo Soyuz Test Project brought Scott and Leonov together finally ending the Cold War silence and building a friendship that would last for decades Their courage passion for exploration and determination to push themselves to the limit emerge in these memoirs not only through their triumphs but also through their perseverance in times of extraordinary difficulty and danger **Air University Periodical Index** ,1961 *Manned and Unmanned Flights to the Moon* Terry C Treadwell,2024-10-30 This book is about how the dreams of exploring other worlds became a reality with the Mercury Gemini and Apollo programs The problems encountered in the development of the spacecraft including the disastrous fire aboard Apollo 1 which resulted in the deaths of the three American astronauts Gus Grissom Ed White and Roger Chafee are covered When Neil Armstrong stepped out onto the surface of the Moon on 20 July 1969 many people thought that this was the first time man had visited its nearest neighbor Although this was the first manned landing there had been forty one missions prior to this by both the Americans and the Russians This book is about all those missions and the sixty five missions that followed Also included although in much lesser detail is the part the Russians played in the formative years of the space race and the problems they encountered culminating in the successful Apollo Soyuz program which proved that the two super powers could work together The laboratory in the sky Skylab the forerunner of the ISS station is also covered The book contains over 200 photographs all of which are either credited to NASA or from the author s

own collection The sources include correspondence and the author's personal conversations with some of the astronauts involved in the early part of the space program

Dark Side of the Moon Gerard Degroot, 2006-11-01

A selection of the History Scientific American and Quality Paperback Book Clubs For a very brief moment during the 1960s America was moonstruck Boys dreamt of being an astronaut girls dreamed of marrying one Americans drank Tang bought space pens that wrote upside down wore clothes made of space age Mylar and took imaginary rockets to the moon from theme parks scattered around the country But despite the best efforts of a generation of scientists the almost foolhardy heroics of the astronauts and 35 billion dollars the moon turned out to be a place of magnificent desolation to use Buzz Aldrin's words a sterile rock of no purpose to anyone In *Dark Side of the Moon* Gerard J DeGroot reveals how NASA cashed in on the Americans thirst for heroes in an age of discontent and became obsessed with putting men in space The moon mission was sold as a race which America could not afford to lose Landing on the moon it was argued would be good for the economy for politics and for the soul It could even win the Cold War The great tragedy is that so much effort and expense was devoted to a small step that did virtually nothing for mankind Drawing on meticulous archival research DeGroot cuts through the myths constructed by the Eisenhower Kennedy and Johnson administrations and sustained by NASA ever since He finds a gang of cynics demagogues scheming politicians and corporations who amassed enormous power and profits by exploiting the fear of what the Russians might do in space Exposing the truth behind one of the most revered fictions of American history *Dark Side of the Moon* explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon The effort devoted to the space program was indeed magnificent and its cultural impact was profound but the purpose of the program was as desolate and dry as lunar dust

Air University Library Index to Military Periodicals , 1961

[Shoot for the Moon](#) James Donovan, 2019-03-12

Learn why NASA astronaut Mike Collins calls this extraordinary space race story the best book on Apollo this inspiring and intimate ode to ingenuity celebrates one of the most daring feats in human history When the alarm went off forty thousand feet above the moon's surface both astronauts looked down at the computer to see 1202 flashing on the readout Neither of them knew what it meant and time was running out On July 20 1969 Neil Armstrong and Buzz Aldrin became the first humans to walk on the moon One of the world's greatest technological achievements and a triumph of the American spirit the Apollo 11 mission was a mammoth undertaking involving more than 410 000 men and women dedicated to winning the space race against the Soviets Set amid the tensions and upheaval of the sixties and the Cold War *Shoot for the Moon* is a gripping account of the dangers the challenges and the sheer determination that defined not only Apollo 11 but also the Mercury and Gemini missions that came before it From the shock of Sputnik and the heart stopping final minutes of

John Glenn's Mercury flight to the deadly whirligig of Gemini 8 the doomed Apollo 1 mission and that perilous landing on the Sea of Tranquility when the entire world held its breath while Armstrong and Aldrin battled computer alarms low fuel and other problems James Donovan tells the whole story Both sweeping and intimate Shoot for the Moon is a powerfully written and irresistible celebration of one of humankind's most extraordinary accomplishments Booklist starred review
