The Orchestration of the Arts — A Creative Symbiosis of Existential Powers M. Kronegger, 2013-03-09 Regardless of the subject matter our studies are always searching for a sense of the universal in the specific Drawing etchings and paintings are a way of communicating

ideas and emotions The key word here is to communicate Whether the audience sees the work as laborious or poetic depends on the creative genius of the artist Some painters use the play of light passing through a landscape or washing over a figure to create an evocative moment that will be both timeless and transitory The essential role of art remains what it has always been a way of human expression This is the role that our participants concentrate on as they discuss art as the expression of the spirit a creative act through which the artist makes manifest what is within him Spirit suggests the unity of feeling and thought Avoiding broad generalities our participants address specific areas in orchestration with music architecture literature and phenomenology Profs Souiller Scholz Etlin Sweetser Josephs show us at what point art is an intimate profound expression and the magic of a civilization as a whole springing from its evolving thoughts and embodying ideals such as the Renaissance the Baroque Modernism and at what point it reflects the transformation of a particular society and its mode of life

This book is the first to explore in detail the encounter between Albert Flocon and Gaston Bachelard in postwar Paris Bachelard was a philosopher and historian of science who was also involved in literary studies and poetics Flocon was a student of the Bauhaus in Dessau Germany who specialized in copper engraving Both deeply ingrained in the surrealist avant garde movements each acted at the frontiers of their respective matters in exploring uncharted territory Bachelard experienced the sciences of his time as constantly undergoing radical changes and he wanted to create a historical epistemology that would live up to this experience He saw the elementary gesture of the copper engraver the hand of the engraver as meeting the challenge of resistant and resilient matter in an exemplary fashion Flocon was fascinated by Bachelard's unconventional approach to the sciences and his poetics Together their relationship interrogated and celebrated the interplay of hand and matter as it occurs in poetic writing in the art of engraving and in scientific experimentation In the form of a double biography Hans Jörg Rheinberger succeeds in writing a lucid intellectual history and at the same time presents a fascinating illustrated reading of Flocon's copper engravings *Bibliographic Guide to Art and Architecture* New York Public Library.
