Role Of Mood In Heideggers Ontology:

The Role of Mood in Heidegger's Ontology Bruce W. Ballard, 1991 This work offers a critical examination of how Heidegger uses the concept of mood in his philosophy of being The author focuses on a specific kind of mood namely anxiety distinguishing this authentic mood from inauthentic ones and then extends the concept outward to encompass Rudolf Otto's phenomenology of religious feeling by providing a ground for that work There are four stages in the development of the work each taking up a chapter The first provides an introductory basis for understanding Heidegger's project in his Being and Time through a detailed analysis of his basic terms In chapter two the author turns to the role of mood in disclosing self and world In chapter three the author addresses himself to the marxist interpretation of alienation and the criticism of certain marxists concerning Heidegger's concept of anxiety as not being socially based but merely psychologically based In this context the author refers to the works of Adorno Kosik Lukacs Marcuse and Kolakowski The focus is on such issues as authenticity freedom and death The fourth and final chapter extends Heidegger's remarks concerning mood into the realm of religious mood

Philosophy's Moods: The Affective Grounds of Thinking Hagi Kenaan, Ilit Ferber, 2011-08-13 Philosophy's Moods is a collection of original essays interrogating the inseparable bond between mood and philosophical thinking What is the relationship between mood and thinking in philosophy In what sense are we always already philosophizing from within a mood What kinds of mood are central for shaping the space of philosophy What is the philosophical imprint of Aristotle's wonder Kant's melancholy Kierkegaard's anxiety or Nietzsche's shamelessness Philosophy's Moods invites its readers to explore the above questions through diverse methodological perspectives The collection includes twenty one contributions by internationally renowned scholars as well as younger and emerging voices In pondering the place of the subjective and personal roots that thinking is typically called to overcome the book challenges and articulates an alternative to a predominant tendency in philosophy to view the theoretical content and the affective side of thought as opposed to one another

Aesthetic and Philosophical Reflections on Mood Birgit Breidenbach, 2020-04-19 This study explores the concept of Stimmung in literary and philosophical texts of the modern age Signifying both mood and attunement Stimmung speaks to the categories of affective experience and aesthetic design alike The study locates itself in the nexus between discourses on modernity existentialism and aesthetics and uncovers the pivotal role of Stimmung in 19th and 20th century European narrative fiction and continental philosophy The study first explores the philosophical and aesthetic origins and implications of Stimmung to then discuss its role in the narrative fiction of three key authors of modern literature Fyodor Dostoevsky Samuel Beckett and Thomas Bernhard These readings demonstrate a significant shift towards an aesthetic of affective intensity and immediacy in which the experience of the reading process takes centre stage as each author develops an aesthetic philosophy of Stimmung in their own right Through its focus on the concept of Stimmung the study thus unearths a fundamental link between existentialist concerns and narrative practice in modern literature

Heidegger's

Moral Ontology James D. Reid, 2019 Offers the first full account of the ethical themes underwriting Heidegger's early efforts to develop an account of human existence

Heidegger's Ontological Project John Sallis, 2024-10-22 This long awaited volume of The Collected Writings of John Sallis presents his lectures on Martin Heidegger's monumental Being and Time. The lectures were presented during the 1985-86 academic year at Loyola University of Chicago and during the fall semester of 1999 at Pennsylvania State University. The fourteen years separating the beginning of the two courses is significant in that many of the Gesamtausgabe volumes appeared in that interval as well as a second translation of Being and Time. While the additional Gesamtausgabe volumes make no appearance in the Sallis lectures, there is certainly an awareness of them. This book is a synthesis of the manuscripts of the two separate lecture courses. This volume makes Being and Time accessible to students while the most advanced scholars will also profit from it.

Mood Birgit Breidenbach, Thomas Docherty, 2019-04-10 Mood is a phenomenon whose study is inherently interdisciplinary. While it has remained resistant to theorisation, it nonetheless has a substantial influence on art, politics, and society. Since its practical omnipresence in every day life renders it one of the most significant aspects of affect studies, it has garnered an increasing amount of critical attention in a number of disciplines across the humanities, sciences, and social sciences in the past two decades.

Mood: Interdisciplinary Perspectives New Theories provides a comprehensive theoretical and empirical exploration of the phenomenon of mood from an interdisciplinary angle. Building on cutting edge research in this emerging field and bringing together established and new voices, it bridges the existing disciplinary gap in the study of mood and further consolidates this phenomenon as a crucial concept in disciplinary and interdisciplinary study. By combining perspectives and concepts from the literary studies, philosophy, musicology, the social sciences, artistic practice, and psychology, the volume does the complexity and richness of mood-related phenomena justice and benefits from the latent connections and synergies in different disciplinary approaches to the study of mood.

Heidegger, Ontology, and the Destiny of Islam Milad Milani, 2024-08-20 Heidegger Ontology and the Destiny of Islam: Thoughts and Reflections on the Nature of Islam in the World critiques Islam as a phenomenon set into motion from its beginning. It is a reflective work that addresses difficult questions about Islam through familiar historical concerns and grapples with the issues that arise in that process. Notably, it attests to making no substantive claims about Muslims and instead keeps to the course of analysis of the phenomenon that is Islam, which is taken as an assessable entity rather than a categorical construct. Understood largely in light of a history of observable realities, the ontological analysis of Islam reveals the general acquaintance with it to be imperfect. This suggests the reality of Islam is based on a primal truth that is only partially seen. The analysis then confronts two problems: firstly, that Islam is not what its historical story as it were proclaims, and secondly, that Islam is therefore not what is traditionally made out of the surviving historical narratives. It is not a question of what Islam is, but more critically, how Islam appears in the world.

The Bloomsbury Companion to Heidegger Francois Raffoul, Eric S. Nelson, 2013-08-15 The definitive reference guide to Heidegger's life and work, including

57 original essays covering all the key aspects of his thought Life and Death in Freud and Heidegger Havi Carel, 2006 Life and Death in Freud and Heidegger argues that mortality is a fundamental structuring element in human life The ordinary view of life and death regards them as dichotomous and separate This book explains why this view is unsatisfactory and presents a new model of the relationship between life and death that sees them as interlinked Using Heidegger's concept of being towards death and Freud's notion of the death drive it demonstrates the extensive influence death has on everyday life and gives an account of its structural and existential significance By bringing the two perspectives together this book presents a reading of death that establishes its significance for life creates a meeting point for philosophical and psychoanalytical perspectives and examines the problems and strengths of each It then puts forth a unified view based on the strengths of each position and overcoming the problems of each Finally it works out the ethical consequences of this view This volume is of interest for philosophers mental health practitioners and those working in the field of death studies

Affective Mapping Jonathan FLATLEY, Jonathan Flatley, 2009-06-30 The surprising claim of this book is that dwelling on loss is not necessarily depressing Instead embracing melancholy can be a road back to contact with others and can lead people to productively remap their relationship to the world around them Flatley demonstrates that a seemingly disparate set of modernist writers and thinkers showed how aesthetic activity can give us the means to comprehend and change our relation to loss

Margins of Political Discourse Fred Dallmayr, 1989-07-03 Margins of political discourse are those border zones where paradigms intersect and where issues of order and disorder meaning and non meaning must be continually renegotiated Our age is marked by multiple dislocations by political as well as philosophical paradigm shifts Politically a Europe centered world order has given way to a decentered arena of global power struggles Philosophically traditional metaphysics itself a European legacy is making room for diverse modes of anti foundationalism In this situation philosophy and political theory are bound to be decentered themselves occupying a peculiar border zone in which traditional boundaries are blurred without being erased This is the locus of Dallmayr's book Located at the intersection of Continental and Anglo American thought as well as at the border of philosophy and politics Margins of Political Discourse explores the zone between polis and cosmopolis between modernity and postmodernity between reason and contingency between immanence and transcendence The Poet's Freedom Susan Stewart, 2011-10-11 Why do we need new art How free is the artist in making And why is the artist and particularly the poet a figure of freedom in Western culture The MacArthur Award winning poet and critic Susan Stewart ponders these questions in The Poet's Freedom Through a series of evocative essays she not only argues that freedom is necessary to making and is itself something made but also shows how artists give rules to their practices and model a self determination that might serve in other spheres of work Stewart traces the ideas of freedom and making through insightful readings of an array of Western philosophers and poets Plato Homer Marx Heidegger Arendt Dante and Coleridge are among her key sources She begins by considering the theme of making in the Hebrew Scriptures examining their account of a god who creates the world and leaves humans free to rearrange and reform the materials of nature She goes on to follow the force of moods sounds rhythms images metrical rules rhetorical traditions the traps of the passions and the nature of language in the cycle of making and remaking Throughout the book she weaves the insight that the freedom to reverse any

act of artistic making is as essential as the freedom to create A book about the pleasures of making and thinking as means of life The Poet's Freedom explores and celebrates the freedom of artists who working under finite conditions make considered choices and shape surprising consequences This engaging and beautifully written notebook on making will attract anyone interested in the creation of art and literature

On Jean Améry Magdalena Zolkos, 2011-10-16 On Jean Améry provides a comprehensive discussion of one of the most challenging and complex post Holocaust thinkers Jean Améry 1912-1978 a Jewish Austrian Belgian essayist journalist and literary author In the English speaking world Améry is known for his poignant publication At the Mind's Limits a narrative of exile dispossession torture and Auschwitz In recent years there has been a renewed interest in Améry's writings on victimization and resentment partly attributable to a modern fascination with tolerance historical injustice and reconciliatory ambitions Many aspects of Améry's writing have remained largely unexplored outside the realm of European scholarship and his legacy in English language scholarship limited to discussions of victimization and memory This volume offers the first English language collection of academic essays on the post Holocaust thought of Jean Améry Comprehensive in scope and multi disciplinary in orientation contributors explore central aspects of Améry's philosophical and ethical position including dignity responsibility resentment and forgiveness What emerges from the pages of this book is an image of Améry as a difficult and perplexing yet exceptionally engaging thinker whose writings address some of the central paradoxes of survivorship and witnessing The intellectual and ethical questions of Améry's philosophies are equally pertinent today as they were half century ago How one can reconcile with the irreconcilable How can one account for the unaccountable And how can one live after catastrophe

Emotion and Anxiety Warren Frederick

Morris, 2006-01-24 The primary function of emotion is to predispose and regulate behavior aimed at satisfying any kind of physiological or psychic need Emotional responses range from a primitively unconscious involuntary reflex to associatively conditioned habitual responses to conscious voluntarily chosen intentions Conceived psychodynamically emotion is a sensuous signifier of pain or pleasure regulating the response of an organism to a situation involving cognition of its own needs and environmental opportunities for satisfying them From diverse perspectives Freud and existentialists Kierkegaard Heidegger and Sartre consider the primary emotion to be anxiety It defensively warns of danger to the satisfaction of an instinctual need to some other higher level human aspiration or to some loss of great value Anxiety presents a demand It may be the need to gratify a particular desire to socially control conduct or to resolve their opposition The importance and scope of anxiety is underscored by its relatedness to instinctual gratification self realization moral conduct freedom creation of personal identity and death This single most important emotion is focused upon the basic nature and concerns of humanity This philosophy of emotion follows from the author's first published philosophical work *Escaping Alienation A Philosophy of Alienation and Dealienation*

Emotions Kevin Sludds, 2009 In this study of emotions and moods the author discusses both analytic and continental traditions of philosophy He starts by examining critically the influential hybrid cognitive theory in particular William Lyons's causal evaluative theory describing its merits but also elucidating a number of fundamental defects that exist in this account He goes on to detail Martin Heidegger's description of mood in *Being and Time* as pre cognitive and pre moral defending it from those who attempt to attribute a cognitive dimension to it The book highlights the significance of connections or bonds in our affective lives at the ontic as well as ontological levels by examining three specific emotions grief guilt and objectless fear One of the study's principal achievements is the demonstration that there is much to be gained from both the analytic and continental traditions of philosophy in furthering our understanding of emotion and mood analysis In particular it shows how our understanding of guilt and objectless fear can be deepened when assessed in Heideggerian terms
