Schaeffer,2003 This best selling text vividly shows how political and economic changes affect people's lives in different settings around the world Globalization the author argues is not completely new Instead the current wave of globalization builds on international institutions created just after World War II and was given new impetus by policies introduced in the 1970s and 80s The new edition has five new chapters as well as updates and changes throughout Visit our website for sample chapters Public Opinion William A. Blade,2002 Twenty four news networks a plethora of newspapers and magazines vibrant news talk radio and the ubiquitous Internet highlight our society as information driven With such a steady stream of hard facts mixed with publicised opinions the mainstream population has an opinion on everything Most anyone seems itching to argue their side of an issue making once private beliefs fodder for general consumption A staple of any medium's content is a regular public opinion poll on whatever hot topic strikes the editor's fancy From the significant to the mundane public opinion permeates society Accordingly politicians have taken note of these opinions and adopted stands and values that put them in tune with public sentiment An understanding of the nature of public opinion therefore is paramount in today's world This book assembles and presents a carefully chosen bibliography on public opinion in its many forms The collection of references makes for a valuable resource in studying and researching the critical issue of public opinion Easy access to these pieces of literature are then provided with author title and subject indexes Ecology and the World-System Walter L.
