Lambert, 2011 Mariners made a major but neglected contribution to England s warfare in the middle ages Here their role is examined anew showing their importance During the fourteenth century England was scarred by famine plague and warfare Through such disasters however emerged great feats of human endurance Not only did the English population recover from starvation and disease but thousands of the kingdom s subjects went on to defeat the Scots and the French in several notable battles Victories such as Halidon Hill Neville s Cross Cr cy and Poitiers not only helped to recover the pride of the English

chivalrous class but also secured the reputation of Edward III and the Black Prince Yet what has been underemphasized in this historical narrative is the role played by men of more humble origins none more so than the medieval mariner This is unfortunate because during the fourteenth century the manpower and ships provided by the English merchant fleet underpinned every military expedition The aim of this book is to address this gap Its fresh approach to the sources allows the enormous contribution of the English merchant fleet to the wars conducted by Edward II and Edward III to be revealed the author also explores the complex administrative process of raising a fleet and provides career profiles for many mariners examining the familial relationships that existed in port communities and the shipping resources of English ports Craig L Lambert is Research Assistant at the University of Hull

Tracing Your Shipbuilding Ancestors Anthony Burton, 2010-06-15 Anthony Burton s concise and informative guide to British shipbuilding will be absorbing reading for anyone who wants to learn about its history or find out about the life of a shipbuilder and his family In a clear and accessible way he traces its development from the medieval period to its peak in the nineteenth and early

twentieth centuries and on into the present day He describes how at the height of its powers it was of immense importance It employed tens of thousands of workers so a large proportion of the population today has some connection with it And this great industry was also so widespread that wherever you move around the coast of Britain you will never be far from a former shipbuilding center This practical handbook will be an invaluable guide for family and local historians and for readers with a more general interest in shipbuilding It introduces the variety of national and local records that are available for genealogical research and considers the many other resources that can yield fascinating information about the industry and those who worked in it Let's Go 2003: Israel Let's Go Inc.,2002-12-13 Let s Go The Resource For The Independent

Anyaa Anim-Addo,William Hasty,Kimberley Peters,2017-10-02 We live in a world that is ever on the move as is increasingly recognised within research on mobilities Yet studies of mobility have failed to go to sea with the same enthusiasm as mobilities ashore When we consider mobility we most often examine those movements that evidently form part of our everyday lives We forget to look outwards to the sea Yet ships have played and continue to play a significant role in shaping socio cultural political and economic life This book turns our attention to the manifold mobilities that occur at sea through an exploration of the mobilities of ships themselves as well as the movements of objects subjects and ideas that are mobilised by ships The Mobilities of Ships brings together seven chapters that tack through unexplored waters and move between diverse case studies including pirate ships naval vessels and luxury yachts In so doing The Mobilities of Ships offers a rich insight into the world of shipping mobilities past and present This book was published as a special issue of Mobilities **New**

Directions in Norwegian Maritime History Lewis R. Fischer, Even Lange, 2017-10-18 This book is a wide reaching study of Norwegian maritime history and developments within the discipline It brings together the research efforts of a University of Oslo project aiming to further understand Norwegian shipping history between 1814 and 2014 and the work of a new generation of maritime historians Structured into three sections global integration political issues and success and failure the volume covers a broad range of maritime topics that have influenced both Norwegian economic development and Norwegian cultural identity Through analysis it discovers that in the last few decades Norwegian shipping has been plagued by multiple troubles whilst simultaneously becoming less crucial to the Norwegian economy in favour of offshore petroleum production However it reiterates the historical importance of shipping to the economic development of Norway and asserts that historians have begun to treat it as the centre from which other industries grew *The Maritime History of Russia,*

1848-1948 Mairin Mitchell, 1949 *Living History* Ana Lucia Araujo, 2009-05-05 This book focusses on the several forms of reconstructing the slave past in the present The recent emergence of the memory of slavery allows those who are or who claim to be descendents of slaves to legitimize their demand for recognition and for reparations for past wrongs Some reparation claims encompass financial compensation but very often they express the need for memorialization through public commemoration museums and monuments In some contexts presentification of the slave past has helped governments and the descendants of former masters and slave merchants to formulate public apologies For some expressing repentance is not only a means to erase guilt but also a way to gain political prestige The authors analyse different aspects of the recent phenomenon of memorializing slavery especially the practices employed to stage the slave past in both public and private spaces The essays present memory and oblivion as part of the same process they discuss reconstructions of the past in the present at different public and private levels through historiography photography exhibitions monuments memorials collective and individual discourses cyberspace religion and performance By offering a comparative perspective on the United States and West Africa as well as on Western Europe South America and the Caribbean the chapters offer new possibilities to explore the resurgence of the memory of slavery as a transnational movement in our contemporary world

The Maritime History of Massachusetts, 1783-1860 Samuel Eliot Morison, 1921 **A Maritime History of Bath, Maine and the Kennebec River Region** William A. Baker, 1973 *Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica* Charmaine A. Nelson, 2017-07-05 *Slavery Geography and Empire in Nineteenth Century Marine Landscapes of Montreal and Jamaica* is among the first Slavery Studies books and the first in Art History to juxtapose temperate and tropical slavery Charmaine A Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest One could easily assume that nineteenth century Montreal and Jamaica were worlds apart but through her astute examination of marine landscape art the author re connects these two significant British island colonies sites of colonial ports with profound economic and military value Through an analysis of prints illustrated travel

books and maps the author exposes the fallacy of their disconnection arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain's global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations. The first study to explore James Hakewill's Jamaican landscapes and William Clark's Antiguan genre studies in depth it also examines the Montreal landscapes of artists including Thomas Davies Robert Sproule George Heriot and James Duncan. Breaking new ground Nelson reveals how gender and race mediated the aesthetic and scientific access of such mainly white male artists. She analyzes this moment of deep political crisis for British slave owners between the end of the slave trade in 1807 and complete abolition in 1833 who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance. Nelson explores how vision and cartographic knowledge translated into authority which allowed colonizers to civilize the terrains of the so-called New World while belying the oppression of slavery and indigenous displacement.
