**Light It Up** John Pettegrew,2015-11-15 Examines the U S Marines visual culture of combat in the Iraq War American military power in the War on Terror has increasingly depended on the capacity to see the enemy The act of seeing enhanced by electronic and digital technologies has separated shooter from target eliminating risk of bodily harm to the remote warrior while YouTube videos eroticize pulling the trigger and video games blur the line between simulated play and fighting Light It Up examines the visual culture of the early twenty first century military Focusing on the Marine Corps which played a critical part in the invasion and occupation of Iraq John Pettegrew argues that U S military force in the Iraq War was projected through an optics of combat Powerful military technology developed in the Iraq and Afghanistan wars has placed war in a new posthuman era Pettegrew s interviews with marines as well as his analysis of first person shooter videogames and combat footage lead to startling insights into the militarization of popular digital culture An essential study for readers interested in modern warfare policy makers and historians of technology war and visual and military culture

**Empire and Inequality** Paul Street,2015-11-17 This is an impressive collection well informed well written covering highly important topics over an impressive range with no hesitation about taking an honest stand that gets right to the heart of the matter in case after case Noam Chomsky A frequent columnist in Z magazine Black Commentator and other magazines Paul Street has closely monitored the deterioration of civil liberties since 9 11 In his new book Street challenges the widely accepted notion that everything changed on 9 11 The event of 9 11 changed the lives of thousands of people in tragic and lasting ways but some

things it did not drastically alter were the long term goals of the Bush administration Rather the terrorist attacks offered a way for them to fully realize these goals through waging war against fictional enemies abroad and against civil liberties at home By pointing out rampant injustices in society and doggedly pursuing the blatant contradictions in current government policies Street reveals a very different America than the government or media portray Empire and Inequality shows how the jetliner attacks provided a windfall opportunity to accelerate pre existing trends towards greater global and domestic hierarchy inequality and repression Street shows how the elites of American government and business used classic propaganda mechanisms in pursuit of this regressive and authoritarian agenda in the post 9 11 era Street offers a cogent critique of the myth of the powerless state showing that U S government s cup runs over when it comes to serving the wealthy and privileged few and is empty only when it comes to meeting the needs of the non affluent majority Empire and Inequality is a powerful reflection on the inseparable deepening and mutually reinforcing relationships that exist between empire abroad and inequality and repression at home in the post 9 11 era

**U.S. Marines In Iraq, 2003: Basrah, Baghdad And Beyond:** Colonel Nicholas E. Reynolds USMCR,2014-08-15 Includes more than 75 photos maps and plans This particular book is about Marines during the first stage of Operation Iraqi Freedom OIF It spans the period from 11 September 2001 to March and April 2003 when the Coalition removed Saddam Hussein from power and concludes in November 2003 when the Marines left Kuwait to return to their home bases in the U S While many then believed that the kinetic phase of the fighting

in Iraq was largely over as we now know it was only a prelude to a longer but just as deadly phase of operations where Marines would be redeployed to Iraq in 2004 to combat insurgents both foreign and domestic who had filtered back into the country. However, this phase of the fighting would be very different from the one the Marines and U S Army had fought in the spring of 2003 in the march up to take Baghdad. The primary focus of the book is I Marine Expeditionary Force I MEF the run up to the war in 2002 and early 2003 especially the development of the plan with its many changes the exhaustive rehearsals and other preparations and then the conduct of decisive combat operations and the immediate postwar period mostly under the control of the U S Central Command s Coalition Forces Land Component Command. The book also touches upon other Marine activities in the Military Coordination and Liaison Command in northern Iraq and with the British in the south. Nonetheless the primary focus remains on I Marine Expeditionary Force and the interactions of its constituent elements. Other forthcoming History Division publications will soon offer detailed narratives on Marines in Operation Enduring Freedom OEF in Afghanistan and II MEF operations inside Iraq.

Learning to Forget David Fitzgerald, 2013-06-26 Learning to Forget analyzes the evolution of US counterinsurgency COIN doctrine over the last five decades. Beginning with an extensive section on the lessons of Vietnam it traces the decline of COIN in the 1970s then the rebirth of low intensity conflict through the Reagan years in the conflict in Bosnia and finally in the campaigns of Iraq and Afghanistan. Ultimately it closes the loop by explaining how by confronting the lessons of Vietnam the US Army found a way out of those most recent wars. In the process it provides an illustration of how military leaders make use of history and demonstrates the difficulties of drawing lessons from the past that can usefully be applied to contemporary circumstances. The book outlines how the construction of lessons is tied to the construction of historical memory and demonstrates how histories are constructed to serve the needs of the present. In so doing it creates a new theory of doctrinal development.

Lantis, 2016-03-22 This book shows how one of the most powerful tools of security studies strategic culture illuminates the origins and implications of the Asia Pacific region's difficult issues from the rise of China and the American pivot to the shifting calculations of many other actors Strategic culture sometimes challenges and always enriches prevailing neo realist presumptions about the region It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between neoclassical realist and constructivist approaches The case studies in this book survey the role of strategic culture in the behaviors of Australia China Japan the Philippines South Korea and the United States They show the contrast between structural expectations and cultural predispositions as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political military cultures to influence security policies The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies as well as how culture may impact the potential for future conflict or cooperation in the region The result is a body of work that helps deepen our understanding of strategic cultures in the Asia Pacific in comparative perspective and enrich security studies This book was published as a special issue of Contemporary Security Policy

**America, Technology and Strategic Culture** Brice Harris, 2008-08-21 This book analyses the American way of war within the context of Clausewitzian theory In doing so it draws conclusions about the origins viability and technical feasibility of America's current strategic approach The author argues that the situation in which America has found itself in Iraq is the direct result of a culturally predisposed inclination to substitute technology for strategy This habit manifests most extremely in the form of the Network Centric Warfare Effects Based Operations NCW EBO construct which by and large has failed to deliver on its many promises This book argues that the fundamental problem with the NCW EBO and with US defence transformation generally is that it centres on technology at the expense of other dynamics notably the human one Taking a fresh perspective on US strategic cultural predispositions in an era of persistent military conflict the author argues for the necessity of America's revising its strategic paradigm in favour of a more holistic brand of strategy This book will be of much interest to students of Clausewitz Strategic Studies International Security and US foreign policy
