Owen,2014-04-23 The study of the history

of Southeast Asia is still growing evolving deepening and changing as an academic field Over the past few decades historians have added nuance to traditional topics such as Islam and nationalism and created new ones such as gender globalization and the politics of memory The Routledge Handbook of Southeast Asian History looks at the major themes that have developed in the study of modern Southeast Asian history since the mid 18th century Contributions by experts in the field are clustered under three major headings Political History Economic History and Social and Cultural History and chapters challenge the boundaries between topics and regions Alongside the rise and fall of colonialism topics include conflict in Southeast Asia tropical ecology capitalism and its discontents the major religions of the region gender and ethnicity The Handbook provides a stimulating introduction to the most important themes within the subject area and is an invaluable reference work for any student and researcher on Southeast Asia and Asian and World history *Encyclopedia of Historians and Historical Writing* Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies **The Making of Southeast Asia** Amitav Acharya, 2013-02-22 Developing a framework to study what makes a region Amitav Acharya investigates the origins and evolution of Southeast Asian regionalism and international relations He views the Association of Southeast Asian Nations ASEAN from the bottom up as not only a U S inspired ally in the Cold War struggle against communism but also an organization that reflects indigenous traditions Although Acharya deploys the notion of imagined community to examine the changes especially since the Cold War in the significance of ASEAN dealings for a regional identity he insists that imagination is itself not a neutral but rather a culturally variable concept The regional imagination in Southeast Asia imagines a community of nations different from NAFTA or NATO the OAU or the European Union In this new edition of a book first published as *The Quest for Identity* in 2000 Acharya updates developments in the region through the first decade of the new century the aftermath of the financial crisis of 1997 security affairs after September 2001 the long term impact of the 2004 tsunami and the substantial changes wrought by the rise of China as a regional and global actor Acharya argues in this important book for the crucial importance of regionalism in a different part of the world *America's Strategy in Southeast Asia* James A. Tyner, 2006-12-21 Geography encompasses everything from the local where human beings live work and travel to metageographies like nations and regions James A Tyner's inventive and multidisciplinary ideas on geography similarly range from the personal his father's

experience in the military during the Vietnam War to a broad discussion of how the United States has come to exercise power through the production of geographic knowledge in this case in Southeast Asia Since the end of the Second World War Southeast Asia has served as a surrogate space to further American imperial interests which are economic political territorial and moral in scope America s Strategy in Southeast Asia contends that the construction of Southeast Asia as a geographic entity has been a crucial component in the creation of the American empire For example America s most blatant experience of colonial rule occurred the Philippines America s longest war was fought in Vietnam and most recently some American policymakers have identified Southeast Asia as the Second Front in the War on Terror Yet America s overriding strategy in Southeast Asia and the region itself remains something of a mystery for the American populace a black box in America s geographical imagination This clear and innovative book educates readers about Southeast Asia s importance in American foreign policy

The Borderlands of Southeast Asia James Clad, Sean M. McDonald, Bruce Vaughn, 2011 As an academic field in its own right the topic of border studies is experiencing a revival in university geography courses as well as in wider political commentary Until recently border studies in contemporary Southeast Asia appeared as an afterthought at best to the politics of interstate rivalry and national consolidation The maps set out all agreed postcolonial lines Meanwhile the physical demarcation of these boundaries lagged Large slices of territory on land and at sea eluded definition or delineation That comforting ambiguity has disappeared Both evolving technologies and price levels enable rapid resource extraction in places and in volumes once scarcely imaginable The beginning of the 21st century s second decade is witnessing an intensifying diplomacy both state to state and commercial over offshore petroleum In particular the South China Sea has moved from being a rather arcane area of conflict studies to the status of a bellwether issue Along with other contested areas in the western Pacific and south Asia the problem increasingly defines China s regional relationships in Asia and with powers outside the region especially the United States Yet intraregional territorial differences also hobble multilateral diplomacy to counter Chinese claims and daily management of borders remains burdened by a lot of retrospective baggage The contributors to this book emphasize this mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics Whether the region s 11 states want it or not their bordered identity is falling into ever sharper definition if only because of pressure from extraregional states This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia

Cheng Ho and Islam in Southeast Asia Tan Ta Sen, 2003-08-01. Tan Ta Sen has modestly suggested that as a book to illustrate the peaceful impact of culture contact he is concerned to show how such cultural influences not only led to transmissions, conversions and transferences involving Inner Asian Muslims from China and Yunnan, Muslims, Chams, Javanese, Malays, Arabs and Indians but also enabled many Chinese in the Malay world to retain their non-Muslim cultural traits. In placing Cheng Ho's voyages in this context the author offers a fresh perspective on a momentous set of events in Chinese maritime history. Professor Wang Gungwu, National University of Singapore. Tan Ta Sen's book on Cheng Ho and Islam in Southeast Asia is not the first one on the subject but it is the first book that puts Cheng Ho's voyages in the larger context of culture contact in China and beyond. He has garnered numerous sources from published documents to architectural sites and buildings to support his arguments. He has done much more than previous scholars writing on this subject. Professor Leo Suryadinata, Chinese Heritage Centre, Singapore. This long-awaited book is welcomed by the academic community. Tan Ta Sen has used historical facts to strengthen the argument on the existence of the 'Third Wave' i.e. the Chinese Wave in the spread of Islam in the Southeast Asian region. Until now we only know two major waves i.e. the India-Gujarat Wave and the Middle East Wave through the development of trade relations. Professor A. Dahana, University of Indonesia, Jakarta.
