Hyer, Terence Messinger, Donald Stephen Cherry, Douglas L. Moyer, Janet H. Curran, Rebecca Jean Currie, 2003 *Resources in Education*, 1994 **The Mines Handbook** Walter Garfield Neale, Lenox Hawes Rand, Edward Barney Sturgis, 1916 *International Handbook of Earthquake & Engineering Seismology, Part B* William H.K. Lee, Hiroo Kanamori, Paul Jennings, Carl Kisslinger, 2003-07-23 The two volume International Handbook of Earthquake and Engineering Seismology represents the International Association of Seismology and Physics of the Earth s

Interior's IASPEI ambition to provide a comprehensive overview of our present knowledge of earthquakes and seismology. This state-of-the-art work is the only reference to cover all aspects of seismology: a resource library for civil and structural engineers, geologists, geophysicists, and seismologists in academia and industry around the globe. Part B by more than 100 leading researchers from major institutions of science around the globe features 34 chapters detailing strong motion seismology, earthquake engineering, quake prediction, and hazards mitigation, as well as detailed reports from more than 40 nations. Also available is *The International Handbook of Earthquake and Engineering Seismology*, Part A: Authoritative articles by more than 100 leading scientists; Extensive glossary of terminology; plus 2000 biographical sketches of notable seismologists. *Annotated Bibliography of Economic Geology*, 1962. **The Geologic Time Scale 2012** F. M. Gradstein, 2012-08-14. The Geologic Time Scale 2012 winner of a 2012 PROSE Award Honorable Mention for Best Multi-volume Reference in Science from the Association of American Publishers is the framework for deciphering the history of our planet Earth. The authors have been at the forefront of chronostratigraphic research and initiatives to create an international geologic time scale for many years, and the charts in this book present the most up-to-date international standard as ratified by the International Commission on Stratigraphy and the International Union of Geological Sciences. This 2012 geologic time scale is an enhanced, improved, and expanded version of the GTS2004, including chapters on planetary scales, the Cryogenian, Ediacaran periods, systems, a prehistory scale of human development, a survey of sequence stratigraphy, and an extensive compilation of stable isotope chemostratigraphy. This book is an essential reference for all geoscientists, including researchers, students, and petroleum and mining professionals. The presentation is non-technical and illustrated with numerous colour charts, maps, and photographs. The book also includes a detachable wall chart of the complete time scale for use as a handy reference in the office, laboratory, or field. The most detailed international geologic time scale available that contextualizes information in one single reference for quick desktop access. Gives insights in the construction, strengths, and limitations of the geological time scale that greatly enhances its function and its utility. Aids understanding by combining with the mathematical and statistical methods to scaled composites of global succession of events. Meets the needs of a range of users at various points in the workflow: researchers extracting linear time from rock records; students recognizing the geologic stage by their content. *System Analysis and Modeling: Theory and Practice* Oystein Haugen, Rick Reed, Reinhard Gotzhein, 2013-02-11. This book constitutes revised papers of the proceedings of the 7th International Workshop on System Analysis and Modeling (SAM 2012) held in Innsbruck, Austria, in October 2012. The 12 papers presented were carefully reviewed and selected from 27 submissions. In addition, the book contains two keynote speeches in full paper length. The contributions are organized in topical sections named: test and analysis; language enhancements; fuzzy subjects; components and composition; and configuring and product lines. **Hydrogeology Of, and Quality and Recharge Ages of Ground Water in Prince William County, Virginia, 1990-91** David L. Nelms, Allen Richard Brockman, 1997.
