Map Uses, Scales, and Accuracies for Engineering and Associated Purposes, 1983 **Surveying and Mapping**, 1982 *The Surveying Handbook* Russell C. Brinker, 2013-06-29 **Elements of Spatial Data Quality** S.C. Gupta, J.L. Morrison, 2013-10-22 *Elements of Spatial Data Quality* outlines the need and suggests potential categories for the content of a comprehensive statement of data quality that must be imbedded in the metadata that accompanies the transfer of a digital spatial data file or is available in a separate metadata catalog Members of the International Cartographic Association's Commission on Spatial Data Quality have identified seven elements of data quality: positional accuracy, attribute accuracy, completeness, logical consistency, lineage, semantic accuracy, and temporal information In the book the authors describe components of each data quality element, possible metrics that can be used to measure the quality of each criteria, possible testing and rating schemes, and how these parameters might differ from a producer or user point of view Finally, no volume of this nature would be complete without a chapter devoted to necessary future research in this subject area The chapter points out areas in need of further investigation and speculates about the use and transfer of digital spatial data in tomorrow's electronic world and at developments in presenting specified data quality information in a visualization This book will be of interest to all of those individuals involved in geographical information systems and spatial data handling **Multi-purpose Geographic Database Guidelines for Local Governments**, 1989 **Location-Based Services and Geo-Information Engineering** Allan Brimicombe, Chao Li, 2009-02-17 *Location Based Services* LBS are the delivery of data and information services where the content of those services is tailored to the current location and context of a mobile user This is a new and fast growing technology sector incorporating GIS, wireless technologies, positioning systems, and mobile human computer interaction *Geo-Information Engineering* is the design of dependably engineered solutions to society's use of geographical information and underpins applications such as LBS These are brought together in this comprehensive text that takes the reader through from source data to product delivery This book will appeal to professionals and researchers in the areas of GIS, mobile telecommunications services, and LBS It provides a comprehensive view and in-depth knowledge for academia and industry alike It serves as essential reading and an excellent resource for final year undergraduate and postgraduate students in GIScience, Geography, Mobile Computing, or Information Systems who wish to develop their understanding of LBS **The Cosmic Zoom** Zachary Horton, 2021-07-23 In *The Powers of Ten* by Charles and Ray Eames a view of two people enjoying a picnic zooms up and away to show their surroundings moving progressively farther into space then zooms back in for a close up of the hand of the picnicker travelling deep into the microscopic realm This is one of the most iconic examples of the cosmic zoom, a trope that has influenced countless media forms over the past seventy years Horton uses the cosmic zoom as a starting point to develop a cross-disciplinary theory of scale as mediated difference He considers the origins of our notions of scale, how scalar mediation functions differently in analog and digital modes, and how cosmic zoom media has

influenced scientific and popular views of the world Analyzing literature film digital media and database history Horton establishes a much needed framework for thinking about scale across multiple domains and disciplines **Journal of the Surveying and Mapping Division** ,1982 *Technical Papers of the 44th Annual Meeting of the American Congress on Surveying and Mapping* American Congress on Surveying and Mapping.
