**Maps and Politics** Jeremy Black,2000-12 Do maps accurately and objectively present the information we expect them to portray or are they instead colored by the political purposes of their makers In this lively and well illustrated book Jeremy Black investigates this dangerous territory arguing persuasively that the supposed objectivity of the map making and map using process cannot be divorced from aspects of the politics of representation **Maps and Politics** Jeremy Black,1997 Do maps accurately and objectively present the information we expect them to portray or are they instead colored by the political purposes of their makers In this lively and well illustrated book Jeremy Black investigates this dangerous territory arguing persuasively that the supposed objectivity of the map making and map using process cannot be divorced from aspects of the politics of representation **Prisoners of Geography** Tim Marshall,2016-10-11 First published in Great Britain in 2015 by Elliott and Thompson Limited *The Power of Projections* Arthur Jay Klinghoffer,2006-04-30 Why is Europe at the top half of maps and Africa at the bottom Although we are accustomed to that convention it is in fact a politically motivated almost entirely subjective way of depicting a ball spinning in space As *The Power of Projections* teaches us maps do not portray reality only interpretations of it To begin with they are two dimensional projections of a three dimensional spherical Earth Add to that the fact that every map is made for a purpose and its design tends to reflect that purpose Finally a map is often a psychological projection of the historical political and cultural values of the cartographer or of the nation person or organization for which the map was created In this fascinating book Klinghoffer examines the world perceptions of various civilizations and the ways in which maps have been formulated to serve the agendas of cartographers and their patrons He analyzes the recent decline of sovereignty the spread of globalization the reassertion of ethnic identity and how these trends affect contemporary mapmaking **The Cartographic State** Jordan Branch,2013-11-28 Why is today's world map filled with uniform states separated by linear boundaries The answer to this question is central to our understanding of international politics but the question is at the same time much more complex and more revealing than we might first think This book examines the important but overlooked role played by cartography itself in the development of modern states Drawing upon evidence from the history of cartography peace treaties and political practices the book reveals that early modern mapping dramatically altered key ideas and practices among both rulers and subjects leading to the implementation of linear boundaries between states and centralized territorial rule within them In his analysis of early modern innovations in the creation distribution and use of maps Branch explains how the relationship between mapping and the development of modern territories shapes our understanding of international politics today **100 Maps** John O. **The Politics of Maps** Christine Leuenberger, Izhak Schnell, 2020-07-18 The land between the Mediterranean Sea and the Jordan Valley has been one of the most disputed territories in history Since the establishment of the state of Israel in 1948 Palestinians and Israelis have each sought claim to the national identity of the land through various martial social and scientific tactics but no method has offered as much legitimacy and national controversy as that of the map The Politics of Maps delves beneath the battlefield to unearth the cartographic strife behind the Israel Palestine conflict Blending science and technology studies sociology and geography with a host of archival material in depth interviews and ethnographies this book explores how the geographical sciences came to be entangled with the politics territorial claim making and nation state building of Israel Palestine Chapters chart the cartographic history of the region from the introduction of Western scientific and legal paradigms that seemingly legitimized and depoliticized new land regimes to the rise of new mapping technologies and software that expanded access to cartography into the public sphere Maps produced by various sectors like the peace camps or the Jewish community enhanced national belonging while others like that of the Green Line served largely to divide The stories of Israel's many boundaries reveal that there is no absolute technocratic solution to boundary making As boundaries continue to be controversial and the Israeli Palestinian conflict remains intractable and unresolved The Politics of Maps uses nationally based cartographic discourses to provide insight into the

complexity fissures and frictions within internal political debates illuminating the persistent power of the nation state as a framework for forging identities citizens and alliances
