Privatization Of The Oceans The:

The Privatization of the Oceans Rögnvaldur Hannesson, 2004 Why exclusive use rights in particular individual transferable quotas provide the most efficient way to use fishing resources theory plus case studies of ITQs in six countries

Water Capitalism Walter Block, Peter L. Nelson, 2016-09-08 Water covers some 75% of the earth's surface while land covers 25% approximately Yet the former accounts for less than 1% of world GDP the latter 99% plus Part of the reason for this imbalance is that there are more people located on land than water But a more important explanation is that while land is privately owned water is unowned with the exception of a few small lakes and ponds or governmentally owned rivers large lakes This gives rise to the tragedy of the commons when something is unowned people have less of an incentive to care for it preserve it and protect it than when they own it As a result we have oil spills depletion of fish stocks threatened extinction of some species e.g. whales shark attacks polluted and dried up rivers misallocated water unsafe boating piracy and other indices of economic disarray which if they had occurred on the land would have been more easily identified as the result of the tragedy of the commons and or government ownership and mismanagement The purpose of this book is to make the case for privatization of all bodies of water without exception In the tragic example of the Soviet Union the 97% of the land owned by the state accounted for 75% of the crops On the 3% of the land privately owned 25% of the crops were grown The obvious mandate requires that we privatize the land and prosper The present volume applies this lesson in detail to bodies of water

The Sandbar , Neoliberal Environments Nik Heynen, James McCarthy, Scott Prudham, Paul Robbins, 2007-11-13 Does neoliberalizing nature work and what work does it do This volume provides answers to a series of urgent questions about the effects of neoliberal policies on environmental governance and quality A History of the Czechoslovak Ocean Shipping

Company, 1948-1989 Lenka Kratka, 2015-08-01 This book offers a comprehensive history of the Czechoslovak Ocean Shipping Company C O S from its beginning in the late 1940s until the fall of communism Owned by the Czechoslovak state C O S's activities were shaped by Soviet standards This unique study is structured according to the different phases of the Cold War and highlights the political aspects that determined C O S's fate Lenka Kratka focuses on two contradictory economic dimensions that C O S had to engage with Being part of the planned economy of a socialist state it also dealt with companies in the capitalist West Another paradoxical aspect of C O S emerges from the memories of former Czechoslovak seamen who experienced relative freedom when being aboard and strict communist regime control while at home with their families Kratka's book offers fascinating insights into a neglected topic using thus far untapped sources and building on primary research in oral history and personal memory **Water Capitalism** Walter E. Block, Peter L. Nelson, 2015-10-30 Water covers some 75% of the earth's surface while land covers 25% approximately Yet the former accounts for less than 1% of world GDP the latter 99% plus Part of the reason for this imbalance is that there are more people located on land than water But a more important explanation is that while land is privately owned water is unowned with the exception of a few small

lakes and ponds or governmentally owned rivers large lakes This gives rise to the tragedy of the commons when something is unowned people have less of an incentive to care for it preserve it and protect it than when they own it As a result we have oil spills depletion of fish stocks threatened extinction of some species e g whales shark attacks polluted and dried up rivers misallocated water unsafe boating piracy and other indices of economic disarray which if they had occurred on the land would have been more easily identified as the result of the tragedy of the commons and or government ownership and mismanagement The purpose of this book is to make the case for privatization of all bodies of water without exception In the tragic example of the Soviet Union the 97% of the land owned by the state accounted for 75% of the crops On the 3% of the land privately owned 25% of the crops were grown The obvious mandate requires that we privatize the land and prosper The present volume applies this lesson in detail to bodies of water

Globalization and Technocapitalism

Luis Suarez-Villa,2016-04-22 Globalization and Technocapitalism considers the global reach of a new capitalist era exploring the nature of technocapitalism as grounded in new forms of accumulation commodification and corporate organization As technological creativity corporate research and talent flows become more important than ever this book explores the manner in which globalization acquires new contextual features that will become central to the macro social dynamics of the twenty first century It thus sheds light on the resultant growth in global inequalities and more intrusive forms of global domination that are grounded in emerging sectors such as nanotechnology biotechnology and its diverse fields such as genomics synthetic bioengineering bioinformatics and biopharmacology and related advances in computing and telecommunications A rigorous examination of developments in contemporary capitalism as driven by the forces of globalization Globalization and Technocapitalism will be of interest to scholars working in the fields of social and political theory international political economy political philosophy science and technology studies and globalization

Free Enterprise Environmentalism

Walter E. Block,2021-10-18 In Free Enterprise Environmentalism Walter E Block argues that laissez faire capitalism can address climate change more effectively than socialism and government regulation Block advocates for the role of markets free enterprise limited government and private property rights in service of environmental protections Covering topics such as extinction overpopulation pollution and resources exhaustion this volume offers alternate solutions to environmental degradation than have been proposed by the political left

Law of the Sea, Environmental Law and Settlement of

Disputes Tafsir Malick Ndiaye,Rüdiger Wolfrum,2007-11-30 This volume covers a variety of topics in the fields of the law of the sea and the protection of the environment The particular focus of the volume is on the role and function of judicial quasi judicial and administrative institutions in the prevention and settlement of disputes in both of these areas This includes an overview and insightful analysis of the cases of the International Tribunal for the Law of the Sea during its first decade Further substantive issues range from the allocation of shared marine resources maritime boundary delimitation and issues of maritime security to the prevention of marine pollution as well as a coverage of the compliance and enforcement

mechanisms of international environmental law The views from both scholars and practitioners perspectives presented in this volume will offer readers a number of outstanding intellectual synergies to reflect on the development of international law It can provide both scholars and policy makers alike with new insights on how to address pressing problems in international law including ideas for improved institutional design The work has been compiled in honour of Thomas A Mensah and comprises 59 essays from leading scholars and practitioners in international law

All the Boats on the Ocean Carmel Finley, 2017-02-15 This historical account of overfishing sees the future of fisheries hinging on holistic approaches involving fish fisher and environment Nature Most current fishing practices are neither economically nor biologically sustainable Every year the world spends 80 billion buying fish that cost 105 billion to catch even as heavy fishing places growing pressure on stocks that are already struggling with warmer more acidic oceans How have we developed an industry that is so wasteful Carmel Finley explores how government subsidies propelled the expansion of fishing from a coastal in shore activity into a global industry Looking across politics economics and biology *All the Boats on the Ocean* casts a wide net to reveal how the subsidy driven expansion of fisheries in the Pacific during the Cold War led to the growth of fisheries science and the creation of international fisheries management In a world where this technologically advanced industry has enabled nations to colonize the oceans fish literally have no place left to hide and the future of the seas and their fish stocks is uncertain Finley is an engaging writer weaving together historical economic and societal threads in a narrative that anchors global developments in the accounts of local actors Science The most comprehensive and empirically grounded account yet of how the modern transnational fishery regime emerged Oregon Historical Quarterly Finley links the fisheries story to the great transformation of global ecology in the postwar period by way of the technology policy and politics of food production a significant original book Arthur McEvoy Southwestern Law School author of *The Fisherman's Problem Ecology and Law in the California Fisheries 1850-1980*
