Counseling Across the Lifespan Cindy L Juntunen, Donald R Atkinson, 2002
 Counseling Across the Lifespan expands the perimeters of counseling with its emphasis on preventive techniques for adjustment problems in the lifespan of a normal individual. This cogent work focuses on counseling intervention strategies from the unique perspective of an individual's lifespan, placing techniques in the proper development context. By concentrating on life stages from childhood through old age, the authors identify the nature and origin of various psychological issues such as self identity and healthy lifestyle development in adolescents, family violence in young adults, or retirement transitions for older adults. The intervention tools needed to confront these issues are presented through succinct pedagogical features including case examples, checklists for evaluating clients, and exercises.

The SAGE Handbook of Mental Health and Illness David Pilgrim, Bernice Pescosolido, Anne Rogers, 2011
 This title integrates the conceptual, empirical, and evidence-based threads of mental health as an area of study, research, and practice. It approaches mental health from two perspectives: firstly as a positive state of well-being and secondly as psychological difference or abnormality in its social context.

An International Psychology of Men Chris Blazina, David S. Shen-Miller, 2011-01-19
 This text is the first to provide a contextual understanding of the clinical issues that affect men and masculinity across a wide range of cultural and national settings. It demonstrates that gender can no longer be viewed as an isolated characteristic in an era of increased globalization; mental health professionals need to take ethnic and cultural issues into account to provide adequate care for male patients. Numerous international perspectives are offered by the contributing authors, authorities from countries such as Australia, Argentina, Denmark, Canada, India, Ireland, and South Africa, on theoretical and clinical innovations for working with men. Their chapters also offer insight into the socio-cultural contexts for counseling men in and from their respective countries by exploring the ways in which being a man is socially defined, what unique challenges men face, and how these challenges can be negotiated within their specific cultural settings. Topics addressed will include boyhood, notions of manhood, relationship concerns, and power, fatherhood, and men's body image across the life span. This text will ultimately enable mental health practitioners to have a better understanding of how to work more effectively with male clients.

Handbook of Counseling Boys and Adolescent Males Arthur M. Horne, Mark S. Kiselica, 1999-08-09
 Arthur M. Horne and Mark S. Kiselica have gathered a large and impressive team of authorities from around the United States and New Zealand to produce a comprehensive volume on counseling boys. The contributing authors address a wide variety of developmental and cultural considerations pertaining to counseling boys, and they offer extremely useful recommendations for helping 11 special clinical populations of boys. I know of no other book on boys that is as broad in its scope or as practical in its approach as is this groundbreaking work.

Arnold A. Lazarus, Ph.D., ABPP, Distinguished Professor Emeritus of Psychology, Rutgers University
 This wonderful volume represents the advancing developments of the field; it is broad and comprehensive in

scope offers outstanding clinical and practical suggestions and includes a veritable who's who of counselors and psychologists among its contributors. Mental health professionals and graduate students will treasure this reference work.

Ronald F. Levant, Ed.D., ABPP, Dean, Center for Psychological Studies, Nova Southeastern University, Ft. Lauderdale, Florida. The Handbook of Counseling Boys and Adolescent Males fills a gap in the counseling field by providing counselors in schools and community agencies with information that will guide them in expanding their services to the males with whom they work. The developmental background is very helpful to counselors in expanding their understanding of the nature of problems boys experience in growing up; the section on cultural considerations illustrates sensitivity to the varying racial/ethnic intervention and treatment programs that may be used in schools and community agencies. This book will be an extremely helpful resource for counselors in their work with boys and adolescent males; it is highly recommended for all mental health practitioners.

Pamela Paisley, Ed.D., The University of Georgia, President, Association of Counselor Education and Supervision. As we try to understand the violence that has rocked our schools, one common denominator stands out: The perpetrators are all young males. School counselors confirm that there are a lot of angry young men out there. Why are they so angry? What can we do to better understand them? How can we help? This book promises to be a must read for all school counselors.

Nancy S. Perry, NCC, NCSC, American School Counselor Association. Arthur M. Horne and Mark S. Kiselica have produced a timely compendium which offers an exciting glimpse at important developments related to boys and men. This well thought out volume boldly ranges beyond conventional boundaries and will be a useful addition to the available literature on boys and men.

Don C. Locke, Ph.D., North Carolina State University. The Handbook of Counseling Boys and Adolescent Males provides the reader with a context for understanding the developmental dilemmas experienced by male youth and how male development, both adaptive and maladaptive, is shaped by a complex interaction of biological, cultural, and economic forces. This book is organized into three parts. Part I provides the reader with an understanding of how the psychological, career, and athletic development of boys is shaped by a complex interaction of biological, social, cultural, and economic forces. Part II covers cultural considerations pertaining to counseling with African American, Asian American, Hispanic American, Native American, and White Non-Hispanic boys. Part III addresses special populations of boys, including gay boys, teenage fathers, sexually abused boys, boy sexual offenders, developmentally disabled boys, shy and anxious boys, depressed boys, bullies, male youth gangs, and boy substance abusers.
