The Cuban Military Under Castro Jaime Suchlicki, 1989-01-01 [Cuba's Foreign Policy In The Middle East](#) Damian J Fernandez, 2021-11-18 In spite of the growing academic interest in Cuba's international relations in the revolutionary period Cuba's policy toward the Middle East has been a neglected field of study Although the Middle East has not been a high priority item on Fidel Castro's agenda various factors have combined to propel the regime into taking a more active stance in the region not least of which is the importance of the Middle East to the Soviet Union Some of these factors have been ideological such as the nature of Castroism itself Other factors have been more pragmatic the need to increase Cuba's leverage with the Soviet Union the desire to establish spheres of interest of its own in the Third World the attempt to use external politics to soothe internal problems and the wish to maximize the prestige of the Cuban revolution and by extension that of its leader maximo Since 1959 Havana's Middle Eastern policy has experienced four stages 1 1959 1973 Autonomous foreign policy marked by a dual relationship with both Israel and the Arab states 2 1973 1977 Accommodation to the Soviet line anti Israeli policy combined with an expansion of relations with progressive states signalled by the establishment of Cuban military missions 3 1977 1980 Activist policy in the region expanded role and development of diplomatic relationships 4 1981 to the present 1985 Cautious involvement restrained activism emphasizing socio economic cooperation Cuba's incursion into the Arab world illuminates how Cuban foreign policy works especially in relation to autonomy convergence and subordination dependence pragmatism and ideology The island's entrance into Middle East politics has introduced new risks into the island's foreign policy in return for the benefits which have been derived A theory to explain Cuba's foreign policy in its interaction with the Soviet Union in the Third World must include heretofore neglected variables time regime type and factionalism bureaucratic politics in addition to external events The study of Cuba's initiatives in the Middle East will serve to test this theory [The Cuban University Under the Revolution](#) Eusebio Mujal-LeÃ³n, 1988-01-01 **The Cuban Economy**

of the specific topics treated include Cuban and Soviet relations decentralization local government and participation economic policies and strategies for the 1990s the politics of sports political and military relations and forecasting institutional changes after Castro In addition two appendices present a chronology of the Cuban revolution from 1959 to 1998 and biographical essays on 19 revolutionary leaders Annotation copyrighted by Book News Inc Portland OR **Cuba** Jaime Suchlicki,2011 In Jaime Suchlicki s engaging style *Cuba From Columbus to Castro and Beyond* provides a detailed and sophisticated understanding of the Cuba of yesterday today and tomorrow In addition to its concise narrative history CUBA details the current political climate economy and the regime s future Suchlicki discusses the domestic and international events that have affected this island nation in recent years This highly readable history is perfect for students travelers and anyone else who seeks to understand more about Cuba and its people **Cuba** Rex A. Hudson,2002 Describes and analyzes the economic national security political and social systems and institutions of Cuba Amazon com viewed Jan 4 2021 The Long Night of Dark Intent Irving Horowitz,2017-07-05 The Cuban Revolution of 1959 was a benchmark of triumph and a harbinger of tragedy to come Rather than herald a new era of Cuba joining the world community of nations as a paragon of democracy as many fervently hoped and believed it would it became instead a new stage in authoritarian rule in the Western hemisphere For more than a half century since then Cuba has been defined by the capacity of a single family to command and determine the fate of a nation and to do so with a minimum of opposition Incredibly even those professing adhesion to democratic norms have been ready to forgive the dictator his excesses This volume explains the theory and practice of this absence of internal opposition and the persistence of external support for the Castro family and its entourage *The Long Night of Dark Intent* is chronological in order with the author indicating major points in each of the five decades covered The volume covers five centers of system analysis economics politics society military and ideology Who or what determines events and decisions is the stuff of real history It is precisely due to variability in causal chains in society that we have huge variance in levels of predictability The course of the Cuban Revolution gives strong support for such an approach to the Castro Era This is a unique unflinching account with a strong emphasis on the importance of U S policy decisions over time *Foreign Operations, Export Financing, and Related Programs Appropriations for 2001* United States. Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs,2000 *Modern Latin American Revolutions* Eric Selbin,2018-02-07 In contrast to previous studies that have centered on the institutionalization of revolution in Latin America and the Caribbean *Modern Latin American Revolutions* Second Edition introduces the concept of consolidation of the revolutionary process the efforts of revolutionary leaders to transform society and the acceptance by a significant majority of the population of the core of the social revolutionary project As a result the spotlight is on people not structures and transformation not simply revolutionary transition The second edition of this acclaimed book has been revised to include new information on the cases of Bolivia Cuba Nicaragua and Grenada assessing the extent to which each

revolution was both institutionalized and consolidated This edition also boasts expanded coverage on Che Guevara's visionary leadership and an all new section that addresses the future of revolution in Latin America and the Caribbean Dr Selbin argues that there is a strong link between organizational leadership and the institutionalization process on the one hand and visionary leadership and the consolidation process on the other Particular attention is given to the ongoing revolutionary process in Nicaragua with an emphasis on the implications and ramifications of the 1990 electoral process A final chapter includes brief analyses of the still unfolding revolutionary processes in El Salvador and Peru

Revolution and Dictatorship Steven Levitsky, Lucan Way, 2022-09-13 Why the world's most resilient dictatorships are products of violent revolution Revolution and Dictatorship explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure

Cuban Politics Rhoda Rabkin, 1991. The Cuban Revolution presents a mixed record of achievements and failures. In this comprehensive study of Cuban politics, Rhoda Rabkin examines the institutions, policies, and performance of revolutionary Cuba. The study, part of the Politics in Latin America Hoover Institution Series, concisely and thoroughly addresses the major issues debated by scholars concerning the Cuban revolutionary experience. These include the development, impasse of pre-revolutionary Cuba, rates of revolutionary socio-economic progress, elite factionalism, the role of the military, succession, politics, respect for human rights, and the relevance of the Cuban model to other developing countries. Rabkin analyzes with particular care Cuban efforts to reconcile revolutionary leadership, including the special role of Fidel Castro, with popular participation in institutions of government and mass organizations. The study also analyzes in depth the likely implications of the Gorbachev era for Cuban socialism. The meticulous inclusion of source references to the scholarly literature allows readers to pursue controversial issues in greater depth. In a field too often dominated by polemics, Rabkin provides her readers with an honest, objective synthesis of contemporary scholarship on the Cuban Revolution. Chapters cover background to the revolution, communism, Fidel's style, 1959-1970 institutions and policy, 1970-1986 the socialist economic system, Cuban foreign policy, the rectification period, 1986 to the present, and a concluding assessment of the Cuban revolutionary socialist development model.
