Reinventing the Library for Online Education Frederick Stielow,2014 Have changes such as cloud computing search engines the Semantic Web and mobile applications rendered such long standing academic library services and functions as special collections interlibrary loans physical processing and even library buildings unnecessary Can the academic library effectively reconceive itself as a virtual institution Stielow who led the library program of the online university American

Public University System argues most emphatically that it can His comprehensive look at web based academic libraries synthesizes the changes wrought by the Web revolution into a visionary new model grounded in history as well as personal experience He demonstrates how existing functions like cataloging circulation collection development reference and serials management can be transformed by entrepreneurship human face electronic communicator relations web apps and other innovations Online education can ensure that libraries remain strong information and knowledge hubs and his timely book Shows how the origins and history of the academic library have laid the foundation for our current period of flux Identifies practices rooted in print based storage to consider for elimination and legacy services ready to be adapted to virtual operations Discusses tools and concepts libraries will embrace in a networked world including new opportunities for library relevance in bookstore textbook operations compliance library archival museum functions e publishing and tutorial services Offers a thorough examination of the virtual library infrastructure crucial for an online learning program with a special look at the particular needs and responsibilities of online librarians Looks at the evolving relationship between higher education and copyright and posits how educational technology will bring further changes Bursting with stimulating ideas and wisdom gleaned from first hand experience Stielow s book presents a model for offering outstanding higher education library services in an increasingly online environment

Disaster Preparedness Association of Research Libraries,1993 Most librarians know the importance of disaster preparedness Many disasters could have been prevented altogether or have had reduced impact if institutions had been better prepared This resource guide suggests how disaster preparedness can be achieved at cultural institutions Twenty three basic resource articles are presented to introduce disaster preparedness They deal with the safety of collections rather than the safety of staff and related issues such as security and environmental control are not addressed Of the materials that cover what to do once a disaster has occurred most emphasize water damage because so many causes of disaster result in water damage The resource guide is supplemented by a list of 23 selected readings When a choice had to be made between a readily available source and one that was difficult to obtain the hard to obtain one was included in the resource guide and a reference to the other was provided in the bibliography The basic processes for disaster preparedness include 1 brainstorming potential disasters 2 investigating responses to past disasters 3 outlining a disaster plan 4 determining remaining needs and 5 developing recommendations SLD
