balloons and then highlights the use of zeppelins piston engine fighters jet bombers and finally the so called Military Revolution of today While discussing the growth of American and European military aviation Black a pioneer in emphasizing the importance of non Western military history for understanding global developments also traces the emergence of air power in Latin America Africa and Asia Black breaks new ground by exploring not only to conventional war both inside and outside Europe but also to the use of air power in unconventional wars especially critical given to the spread of insurgencies around the globe He vividly describes traditional debates over the pros and cons of strategic bombing and aircraft carriers versus battleships and gives equal attention to managerial doctrinal and technological innovations The author shows how better management resulted in increasing lethality of close air support of the RAF during the latter part of World War II and at the same times highlights the limits of air power with case studies of the two Gulf Wars The author goes beyond our traditional understanding of air power associated with bombing and fighter engagements adding the important elements associated with naval power including ground logistics support anti aircraft measures and political constraints As he explains air power has become Western politicians weapon of choice spreading maximum destruction with the minimum of commitment His current and comprehensive study considers how we got to this point and what the future has in store Anyone seeking a balanced accurate understanding of air power in history will find this book an essential introduction
