The Evolution of Charles Darwin Diana Preston,2022-10-04 From the Los Angeles Times Book Prize winning historian the colorful dramatic story of Charles Darwin's journey on HMS Beagle that inspired the evolutionary theories in his path breaking books On the Origin of Species and The Descent of Man When twenty two year old aspiring geologist Charles Darwin boarded HMS Beagle in 1831 with his microscopes and specimen bottles invited by ship's captain Robert FitzRoy who wanted a travel companion at least as much as a ship's naturalist he hardly thought he was embarking on what would become perhaps the most important and epoch changing voyage in scientific history Nonetheless over the course of the five year journey around the globe in often hard and hazardous conditions Darwin would make observations and gather samples that would form the basis of his revolutionary theories about the origin of species and natural selection Drawing on a rich range of revealing letters diary entries recollections of those who encountered him and Darwin's and FitzRoy's own accounts of what transpired Diana Preston chronicles the epic voyage as it unfolded tracing Darwin's growth from untested young man to accomplished adventurer and
