Selected Papers On Apodization Coherent Optical Systems Spie Milestone Series Vol 119:

Selected Papers on Apodization--coherent Optical Systems James Patrick Mills, Brian J. Thompson, 1996 This collection of papers covers topics such as the application of apodization the effect of non uniform illumination on critical resolution by a circular aperture using partially coherent light and apodized aperture using frustrated total reflection *Self-focusing: Past and Present* Robert W. Boyd, Svetlana G. Lukishova, Y. R. Shen, 2008-12-16 Self focusing has been an area of active scientific investigation for nearly 50 years This book presents a comprehensive treatment of this topic and reviews both theoretical and experimental investigations of self focusing This book should be of interest to scientists and engineers working with lasers and their applications From a practical point of view self focusing effects impose a limit on the power that can be transmitted through a material medium Self focusing also can reduce the threshold for the occurrence of other nonlinear optical processes Self focusing often leads to damage in optical materials and is a limiting factor in the design of high power laser systems But it can be harnessed for the design of useful devices such as optical power limiters and switches At a formal level the equations for self focusing are equivalent to those describing Bose Einstein condensates and certain aspects of plasma physics and hydrodynamics There is thus a unifying theme between nonlinear optics and these other disciplines One of the goals of this book is to connect the extensive early literature on self focusing filamentation self trapping and collapse with more recent studies aimed at issues such as self focusing of fs pulses white light generation and the generation of filaments in air with lengths of more than 10 km It also describes some modern advances in self focusing theory including the influence of beam nonparaxiality on self focusing collapse This book consists of 24 chapters Among them are three reprinted key landmark articles published earlier It also contains the first publication of the 1964 paper that describes the first laboratory observation of self focusing phenomena with photographic evidence Forthcoming Books Rose Arny, 1996-06 **Subject Guide to Books in Print**, 1996 *American Book Publishing Record*, 1996-05 Selected Papers on Coherent Optical Processing Francis T.
