Tools of Literacy Guðrún Nordal, Nordal Guðrún, 2001-01-01 A thorough and ground breaking examination of thirteenth century skaldic verse linking the poets of the time with leading families and with ecclesiastical and secular learning

Unwanted Andreas Schmidt, Daniela Hahn, 2022-01-19 The 9 essays collected in this volume are the result of a workshop for international doctoral and postdoctoral researchers in Old Norse Icelandic Saga Studies held at the Institute for Nordic Philology LMU in Munich in December 2018 The contributors focus on unwanted illicit neglected and marginalised elements in saga literature and research on it The chapters cover a wide range of intra textual phenomena narrative strategies and understudied aspects of individual texts and subgenres The analyses demonstrate the importance of deviance and transgression as literary characteristics of saga narration as well as the discursive parameters that have been dominant in Saga Studies The aim of this collection is to highlight the productiveness of developing modified methodological approaches to the sagas and their study with a starting point in narratological considerations *Holy Vikings* Carl Phelpstead, 2007

Bloodtaking and Peacemaking William Ian Miller, 2009-05-15 Dubbed by the New York Times as one of the most sought after legal academics in the country William Ian Miller presents the arcane worlds of the Old Norse studies in a way sure to attract the interest of a wide range of readers Bloodtaking and Peacemaking delves beneath the chaos and brutality of the Norse world to discover a complex interplay of ordering and disordering impulses Miller's unique and engaging readings of ancient Iceland's sagas and extensive legal code reconstruct and illuminate the society that produced them People in the saga world negotiated a maze of violent possibility with strategies that frequently put life and limb in the balance But there was a paradox in striking the balance one could not get even without going one better Miller shows how blood vengeance law and peacemaking were inextricably bound together in the feuding process This book offers fascinating insights into the politics of a stateless society its methods of social control and the role that a uniquely sophisticated and self conscious law played in the construction of Icelandic society Illuminating Rory McTurk Times Literary Supplement An impressive achievement in ethnohistory it is an amalgam of historical research with legal and anthropological interpretation What is more and rarer is that it is a pleasure to read due to the inclusion of narrative case material from the sagas themselves Dan Bauer Journal of Interdisciplinary History

King, Birgit Pauksztat, Robert Storrie, 2005 Arising from a conference held at the British Museum in 2001 Arctic Clothing of North America Alaska Canada Greenland is a wide ranging and authoritative account of clothing use in the north For the first time contributors include Native and non Native artists and seamstresses anthropologists historians curators and conservators with expertise in Alaska Canada and Greenland **BOOK JACKET** **Tales, the Times Literary Supplement**, 1987 Subject Guide to Books in Print, 2001 **The Origins and Character of the Ancient Chinese City** Paul

Wheatley,2017-07-12 These two volumes elucidate the manner in which there emerged on the North China plain hierarchically structured functionally specialized social institutions organized on a political and territorial basis during the second millennium b c They describe the way in which during subsequent centuries these institutes were diffused through much of the rest of North and Central China Author Paul Wheatley equates the emergence of the ceremonial center as evidenced in Shang China with a functional and developmental stage in urban genesis and substantiates his argument with comparative evidence from the Americas Mesopotamia Egypt Southeast Asia the Mediterranean and the Yoruba territories The Origins and Character of the Ancient Chinese City seeks in small measure to help redress the current imbalance between our knowledge of the contemporary Western style city on the one hand and of the urbanism characteristic of the traditional world on the other Those aspects of urban theory which have been derived predominantly from the investigation of Western urbanism are tested against rather than applied to ancient China The Origins and Character of the Ancient Chinese City examines the cosmological symbolism of the Chinese city constructed as a world unto itself It suggests with a wealth of argument and evidence that this cosmo magical role underpinned the functional unity of the city everywhere until new bases for urban life began to develop in the Hellenistic world Whereas the majority of previous investigations into the nature of the Chinese city have been undertaken from the standpoint of elites The Origins and Character of the Ancient Chinese City has adopted a point of view closer to that of the social scientist than the geographer **Spatial Cultures** Sam

Griffiths,Alexander von Lünen,2016-06-10 What is the relationship between how cities work and what cities mean Spatial Cultures Towards a New Social Morphology of Cities Past and Present announces an innovative research agenda for urban studies in which themes and methods from urban history social theory and built environment research are brought into dialogue across disciplinary and chronological boundaries The collection confronts the recurrent epistemological impasse that arises between research focussing on the description of material built environments and that which is concerned primarily with the people who inhabit govern and write about cities past and present A reluctance to engage substantively with this issue has been detrimental to scholarly efforts to understand the urban built environment as a meaningful agent of human social experience Drawing on a wide range of historical and contemporary urban case studies as well as a selection of theoretical and methodological reflections the contributions to this volume seek to historically geographically and architecturally contextualize diverse spatial practices including movement encounter play procession and neighbourhood The aim is to challenge their tacit treatment as universal categories in much writing on cities and to propose alternative research possibilities with implications as much for urban design thinking as for history and the social sciences *Constructing Frames of Reference* Lewis R. Binford,2019-05-07 Many consider Lewis Binford to be the single most influential figure in archaeology in the last half century His contributions to the New Archaeology changed the course of the field as he argued for the development of a scientifically rigorous framework to guide the excavation and interpretation of the archaeological

record This book the culmination of Binford s intellectual legacy thus far presents a detailed description of his methodology and its significance for understanding hunter gatherer cultures on a global basis This landmark publication will be an important step in understanding the great process of cultural evolution and will change the way archaeology proceeds as a scientific enterprise This work provides a major synthesis of an enormous body of cultural and environmental information and offers many original insights into the past Binford helped pioneer what is now called ethnoarchaeology the study of living societies to help explain cultural patterns in the archaeological record and this book is grounded on a detailed analysis of ethnographic data from about 340 historically known hunter gatherer populations The methodological framework based on this data will reshape the paradigms through which we understand human culture for years to come **Maps of the**

Ancient Sea Kings Charles H. Hapgood,1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century Hapgood believes that they mapped all the continents This would mean that the Americas were mapped thousands of years before Columbus Antarctica would have been mapped when its coasts were free of ice Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene Ice Age land bridge *Books in Series* ,1985 Vols for 1980 issued in three parts
