Logic as a Liberal Art R. E. Houser,2019-12-10 In the twenty first century there are two ways to study logic The more recent approach is symbolic logic The history of teaching logic since World War II however casts doubt on the idea that symbolic logic is best for a first logic course Logic as a Liberal Art is designed as part of a minority approach teaching logic in the verbal way in the student s natural language the approach invented by Aristotle On utilitarian grounds alone this verbal approach is superior for a first course in logic for the whole range of students For millennia this verbal approach to logic was taught in conjunction with grammar and rhetoric christened the trivium The decline in teaching grammar and rhetoric in American secondary schools has led Dr Rollen Edward Houser to develop this book The first part treats grammar rhetoric and the essential nature of logic Those teachers who look down upon rhetoric are free of course to skip those lessons The treatment of logic itself follows Aristotle s division of the three acts of the mind Prior Analytics 1 1 Formal logic is then taken up in Aristotle s order with Parts on the logic of Terms Propositions and Arguments The emphasis in Logic as a Liberal Art is on

learning logic through doing problems Consequently there are more problems in each lesson than would be found for example in many textbooks In addition a special effort has been made to have easy medium and difficult problems in each Problem Set In this way the problem sets are designed to offer a challenge to all students from those most in need of a logic course to the very best students

The Inhumanity of Right Christos Yannaras,2021-09-30 In this study of an important aspect of political theory Christos Yannaras argues that the concept of the right of the individual since Hegel s Philosophy of Right summarizes the philosophical and cultural identity of the paradigm of modernity The philosophical assumptions underlying the concept of right have not hitherto been subjected to a searching critique This book maintains that the starting point of the concept of right is a phenomenalist naturalism which presupposes an abstract concept of the human subject as a fundamentally undifferentiated natural individual The question is explored of how the priority accorded to this concept of right is related to the contemporary crisis of the modern politico social paradigm Against

the modern concept of right with its illusion of objectivity Yannaras sketches out the basic lines of a political theory that prioritizes new social needs that reflect the relational character of the human person Select Works: Thoughts on the present discontents.
