III, 2012-05-18 Scholars librarians students and database vendors have all applauded the increase in access to rare old
venerated and obscure texts that has resulted from the rise of electronic resources Almost everyone associated with any
branch of cultural history has heard the claims about unlimited research opportunity and the rediscovery of overlooked
sources But are these claims true Have high tech systems and methods enhanced or inhibited scholarship Nowhere is this
question more pressing than in the area of eighteenth century studies where so much of the subject matter relates to the first
wave of informational abundance to that great period of profuse printing during which presses produced a mass market full
of diverse readers Textual Studies and the Enlarged Eighteenth Century probes the assumptions about the advanced tools
that may be replicating this period of profusion among contemporary scholars How much access to period information do
current cost and present institutional support really allow Who is accessing what and who is not Which authors and which
topics get lost in the processor driven shuffle How do electronic tools bias scholarship What are the disadvantages of
databases These and many more questions receive a brisk and robust review in this first critique of new wave research A
variety of acclaimed scholars from an interdisciplinary array of specialties look at topics ranging from legacy bibliographical
projects to standards for online editions to para textual materials to the appropriateness of importing electronic research
techniques into the study of a low tech period and on to the transatlantic exchange of information in both the early modern
and the present periods Scholars in all fields will benefit from this vigorous analysis of the assumptions underlying the tools
and the methods of twenty first century humanities scholarship **Letters, 1796-1817, Selected and Edited by R. W.**

English Literature in History, 1780-1830 Roger Sales, 2023-02-03 First published in 1983 English Literature in History 1780-1830 is an original and provocative study of the literature of the Romantic period with an introduction by Raymond Williams. Roger Sales concentrates his analysis on two related themes. The first the politics of pastoral analyses the use of this genre by both established writers and poets who were enormously popular in their time but who are now less well known. The author argues that all literary treatments of rural society in this period make political statements particularly when they displace or disguise the economic facts of life. His second theme the theatre of politics introduces the reader to some of the main political events of the period and demonstrates how their form and presentation can illuminate some of the literature of the period. This book will be of interest to students and teachers of English literature.

Love's Madness Helen Small, 1996 Love's Madness is an important new contribution to the interdisciplinary study of insanity. Focusing on the figure of the love mad woman it presents a significant reassessment of the ways in which British medical writers and novelists of the nineteenth century thought about madness femininity and narrative convention. The book centers around studies of novels by Jane

Austen Sir Walter Scott Charlotte Bront Wilkie Collins and Charles Dickens as well as of previously neglected writings by Charles Maturin Lady Caroline Lamb and Edward Bulwer Lytton among others
