A. Amitsur with Commentary** Shimshon A. Amitsur, Avinoam Mann, 2001 The second volume continues and presumably concludes since they date to two years after his death the selection of almost all of Amitsur's 1921-1994 work demonstrating his wide and enduring contribution to algebra though some in Hebrew and some expositions are not included The sections here are combinatorial polynomial identity theory and division algebras each introduced by a mathematician The papers are reproduced from their original publication in a variety of type styles and page layouts The biographical sketch must be in the first volume There is no index c Book News Inc **Selected Papers of Walter E. Thirring with Commentaries** Walter E. Thirring, 1998 Provides facsimiles of some 50 papers on mathematical and statistical physics quantum field theory general relativity and elementary particle physics that Thirring published in various journals from 1950-96 The papers cover some of Thirring's contributions to quantum electrodynamics many-body theory entropy and ergodic theory as well as his invention of the field theory of particles in one spatial and one temporal dimension Includes a curriculum vita and a list of publications No index Annotation copyrighted by Book News Inc Portland OR **Selected Papers of E. B. Dynkin with Commentary** Evgenii Borisovich Dynkin, Gary M. Seitz, 2000 Eugene Dynkin is a rare example of a contemporary mathematician who has achieved results in two quite different areas of research algebra and probability In both areas his ideas constitute an essential part of modern mathematical knowledge and form a basis for further development Although his last work in algebra was published in 1955 his contributions continue to influence current research in algebra and in the physics of elementary particles His work in probability is part of both the historical and the modern development of the topic **Selected Questions of Mathematical Physics and Analysis** I. V. Volovich, Aleksei Georgievich Sergeev, 1995 This is a collection of original papers on various branches of analysis and mathematical physics It includes work on the following topics the theory of generalized functions mathematical questions of quantum field theory and statistical mechanics and computational mathematics and differential equations Selected Papers Of Errett Bishop, 1986-12-01 Errett Bishop's mathematical work was divided between complex and functional analysis and constructive mathematics The influence of his discoveries in these areas is still strongly felt today **The Selected Works of V.S. Varadarajan** V. S. Varadarajan, 1999 V. S. Varadarajan has made significant contributions to a remarkably broad range of mathematical subjects which include probability theory various mathematical aspects of quantum mechanics harmonic analysis on reductive groups and symmetric spaces and the modern theory of meromorphic differential equations The papers included in this volume have been selected to highlight these contributions For other wonderful titles
