## **Selected Papers On Epistemology And Physics:**

**Selected Papers on Epistemology and Physics** Béla von Juhos, 1980      **Selected Papers on Epistemology and Physics** B. Juhos, 2012-12-06 It was as a result of having known Juhos personally over many years that I became familiar with his thought I met him and Viktor Kraft in Vienna soon after the War and through their acquaintance I first came into contact with the tradition of the Vienna Circle To their conversation too lowe much as regards the clarification of my own views even if in the end these took quite a different turn in many essentials At this point my gratitude goes first of all to Mrs Lia J uhos for the gen erous help she has given me and the editors of the Vienna Circle collection in selecting the contents of this volume Next we owe a special debt to Dr Paul Foulkes for his splendid translation of the text Finally I wish to thank Dr Veit Pittioni for his constant assistance As Juhos last student he was thoro lghly familiar with his supervisor s mode of thought and has significantly furthered the assembly and execution of this book      *Selected Papers on Epistemology and Physics* Bela von Juhos, 1976      **Selected Papers on Epistemology and Physics** Béla JUHOS, 1976      **Philosophical Papers** Moritz Schlick, 1980-03-31      Empiricism, Logic and Mathematics Hans Hahn, 2012-12-06 The role Hans Hahn played in the Vienna Circle has not always been sufficiently appreciated It was important in several ways In the frst place Hahn belonged to the trio of the original planners of the Circle As students at the University of Vienna and throughout the frst decade of this century he and his friends Philipp Frank and Otto Neurath met more or less regularly to discuss philosophical questions When Hahn accepted his flrst professorial position at the University of Czernowitz in the north east of the Austrian empire and the paths of the three friends parted they decided to continue such informal discussions at some future time perhaps in a somewhat larger group and with the cooperation of a philosopher from the university Various events delayed the execution of the project Drafted into the Austrian army during the first world war Hahn was wounded on the Italian front Toward the end of the war he accepted an offer from the University of Bonn extended in recognition of his remarkable 1 mathematical achievements He remained in Bonn until the spring of 1921 when he return d to Vienna and a chair of mathe matics at his alma mater There in 1922 the Mach Boltzmann professorship for the philosophy of the inductive sciences became vacant by the death of Adolf Stohr and Hahn saw a chance to realize his and his friends old plan      Wittgenstein and the Turning Point in the Philosophy of Mathematics S.G. Shanker, 2013-12-19 First published in 2005 This study seeks to identify the specific mistakes that critics were alluding to in their passing asides on Wittgenstein s failure to grasp the mechanics of Godel s second incompleteness theorem It also includes an understanding of his attack on meta mathematics and Hilbert s Programme      Philosophical Papers Friedrich Waismann, 2012-12-06      **Reminiscences of the Vienna Circle and the Mathematical Colloquium** Karl Menger, 2013-03-07 Karl Menger was born in Vienna on January 13 1902 the only child of two gifted parents His mother Hermione nee Andermann 1870 1922 in addition to her musical abilities wrote and published short stories and novelettes while his father Carl 1840 1921 was the noted Austrian economist one of the founders of

marginal utility theory A highly cultured man and a liberal rationalist in the nineteenth century sense the elder Menger had witnessed the defeat and humiliation of the old Austrian empire by Bismarck's Prussia and the subsequent establishment under Prussian leadership of a militaristic mystically nationalistic state capitalist German empire in effect the first modern military industrial complex These events helped frame in him a set of attitudes that he later transmitted to his son and which included an appreciation of cultural attainments and tolerance and respect for cultural differences combined with a deep suspicion of rabid nationalism particularly the German variety Also a fascination with structure whether artistic scientific philosophical or theological but a rejection of any aura of mysticism or mumbo jumbo accompanying such structure Thus the son remarked at least once that the archangels' chant that begins the Prolog im Himmel in Goethe's Faust was perhaps the most beautiful thing in the German language but of course it doesn't mean anything

**The Problems of Philosophy in Their Interconnection** Moritz Schlick, 1987-10-31

**Economic Writings** Otto Neurath, 2006-03-03

This book makes available for the first time in English a substantial part of Otto Neurath's economic writings The essays and small monographs translated here extend from his student years to his last ever finished piece They chart not only Neurath's varied interests in the economic history of antiquity in war economics and schemes for the socialisation of peacetime economies in the theory of welfare measures and social indicators and in issues of the theory of collective choice but also show his philosophical interests emerging in his contributions to seminal debates of the German Social Policy Association This volume shows that Neurath's important contributions to the socialist calculation debate are but one aspect of a many-sided and original oeuvre The translations are preceded by an introductory essay by one of the editors which contextualises the selections by locating them in the various debates of the time that provided their original setting This book is of interest to economists philosophers of social science and of economics as well as to historians of philosophy of science and of analytic philosophy

**Methodology and Epistemology for Social Sciences** Donald T. Campbell, 1988-10-27 Selections from the work of an influential contributor to the methodology of the social sciences He treats measurement experimental design epistemology and sociology of science each section introduced by the editor Samuel Overman Annotation copyright Book News Inc Portland Or

**Reality and Experience** E. Kaila, 2012-12-06 Philosophically there is a book which was a tremendous experience for me Eino Kaila's psychology of the Personality \_ His thesis that man lives strictly according to his needs negative and positive was shattering to me but terribly true And I built on this ground Ingmar Bergman J 1 This introductory essay is neither intended to be a full presentation nor to be a critical evaluation of the contributions to philosophy made by Eino Kaila Kaila's work will speak to the reader through the four papers here published in English translation from the German They belong in the tradition of the Vienna Circle and of logical empiricism They cover however only one period or sector of Kaila's rich and varied life work This is the sector best integrated into the mainstream of contemporary philosophic thinking The primary aim of this essay is to portray an impressive intellectual personality and to

make a modest contribution to Finnish and Scandinavian intellectual history Much of its content may be thought to be of local relevance only But considering the position which Kaila held in his country and considering his decisive influence on the development of philosophy in Finland I hope that this local background will also interest an international circle of readers

**Moritz Schlick Philosophical Papers** Moritz Schlick,1978-12-31      Foundations For A Scientific Analysis Of Value Viktor Kraft,1981      *Unified Science* B.F. McGuinness,2012-12-06 a priori and what is more to a rejection based ultimately on a posteriori findings in other words the pure science of nature in Kant s sense of the term had proved to be not only not pure but even false As for logic and mathematics the decisive works of Frege Russell and White head suggested two conclusions first that it was possible to construct mathematics on the basis of logic logicism and secondly that logical propositions had an irrevocably analytic status But within the frame work of logicism the status of logical propositions is passed on to mathematical ones and mathematical propositions are therefore also conceived of as analytic All this creates a situation where the existential presupposition contained in the Kantian question about the possibility of judgements that are both synthetic and a priori must it seems be rejected as false But to drop this presupposition is at the same time to strike at the very core of Kant s programme of putting the natural sciences on a philosophical foundation The failure of the modern attempt to do so suggests at the same time a reversal of the relationship between philosophy and the individual sciences it is not the task of philosophy to meddle with the foundations of the individual sciences being the less successful discipline its task is rather to seek guidance from the principles of rationality operative in the individual sciences      *Selected Papers* Vasily Sesemann,2010-01-01 The Baltic philosopher Vasily Sesemann 1884 1963 rooted in the Classics and influenced but not dominated by Kant Herder Bergson Husserl and Lossky was a first rate scholar in the fields of aesthetics epistemology logic and history of philosophy But he is still relatively unknown internationally because he wrote mostly in Lithuanian and some of his many works are only now being translated into English This successor volume to his Aesthetics collects eight noteworthy essays ranging from the scholarly to the popular on aesthetics aesthetic education national culture and theory of knowledge They reveal a sympathetic and responsive mind equally at home in Ancient Greek and modern French German and Russian philosophy and capable both of untendentiously expounding their dominant ideas and fruitfully anticipating newer developments even as the latter began to take shape in early to mid 20th century Western European philosophy Hallmarks of Sesemann s thought are the Heraclitean preference for becoming dynamism change over being stasis timelessness and the idea that any culture in order to survive and grow must be intellectually deep and open to foreign influences This insight has crucial relevance to the debates about multiculturalism today      The Infinite in Mathematics Felix Kaufmann,1978-08-31 The main item in the present volume was published in 1930 under the title *Das Unendliche in der Mathematik und seine Ausschaltung* It was at that time the fullest systematic account from the standpoint of Husserl s phenomenology of what is known as finitism also as intuitionism and constructivism in mathematics Since then important changes have been required

in philosophies of mathematics in part because of Kurt Godel's epoch making paper of 1931 which established the essential incompleteness of arithmetic. In the light of that finding a number of the claims made in the book and in the accompanying articles are demonstrably mistaken. Nevertheless as a whole it retains much of its original interest and value. It presents the issues in the foundations of mathematics that were under debate when it was written and in some cases still are and it offers one alternative to the currently dominant set theoretical definitions of the cardinal numbers and other arithmetical concepts. While still a student at the University of Vienna Felix Kaufmann was greatly impressed by the early philosophical writings especially by the *Logische Untersuchungen* of Edmund Husserl. He was never an uncritical disciple of Husserl and he integrated into his mature philosophy ideas from a wide assortment of intellectual sources. But he thought of himself as a phenomenologist and made frequent use in all his major publications of many of Husserl's logical and epistemological theses.

Principles of the Theory of Heat Ernst Mach, 2012-12-06 xi should hope for first and foremost from any historical investigation including his own was that it may not be too tedious. II That hope is generally realized in Mach's historical writings most of which are as lively and interesting now as they were when they appeared. Mach did not follow any existing model of historical or philosophical or scientific exposition but went at things his own way combining the various approaches as needed to reach the goals he set for himself. When he is at his best we get a sense of the Mach whom William James met on a visit to Prague the Mach whose four hours of unforgettable conversation gave the forty year old well traveled James the strongest impression of pure intellectual genius he had yet received and whose absolute simplicity of manner and winningness of smile captivated him completely. 12 Consider for example the first few chapters of this book *Principles of the Theory of Heat* which Mach devotes to the notion of temperature that most fundamental of all thermal concepts. He begins by trying to trace the path that leads from our sensations of hot and cold to a numerical temperature scale. **Catalog of Copyright Entries. Third Series** Library of Congress.
