Modernism Between Benjamin and Goethe Matthew Charles, 2019-12-12 Widely regarded as one of the foremost cultural critics of the last century Walter Benjamin's relation to Modernism has largely been understood in the context of his reception of the aesthetic theories of Early German Romanticism and his associated interest in avant garde Surrealism But this Romantic understanding only gives half the picture Running through Benjamin's thought is also a critique of Romanticism developed in conjunction with a positive engagement with the philosophical artistic and historical writings of J W von Goethe In demonstrating the significance of these Goethean elements this book challenges the dominant understanding of Benjamin's philosophy as essentially Romantic and instead proposes that Goethe's Classicism conceived as the counterpoint to Romanticism permits a corrective to the latter's deficiencies Benjamin's Modernist concept of criticism it is argued is constituted in the movement between these polarities of Romanticism and Classicism Conversely placing Goethe's Classicism in relation to Benjamin's practice of literary criticism reveals historical tensions with Romanticism that constitute the untimely indeed it will be argued cinematic Modernism of his work Adopting a transcritical approach this book alternates between Benjamin and Goethe in relation to the experiences of colour language and technology assembling a constellation of philosophical and artistic figures between them including the writings of Kant Nietzsche Cohen Deleuze Koselleck Klages and the work of Gropius Mies van der Rohe Klee Turner Hulme Eisenstein Tretyakov and Murnau

Yeats and Modern Poetry Edna Longley, 2013-11-11 This book from renowned poetry critic Edna Longley presents fresh dynamic perspectives on W B Yeats' enduring legacy

The Collected Writings of T.E. Hulme Thomas Ernest Hulme, 1994 This is the first collected edition of the writings of the poet critic and philosopher T E Hulme 1883-1917 Hulme wrote some of the first modernist poems in English helped introduce the philosophy of Henri Bergson to Britain and the U S and was one of the first English critics to write about modern art This edition contains

extensive notes to Hulme's writings together with a substantial biographical and critical introduction *Modernism, Magazines, and the British avant-garde* Faith Binckes, 2010-05-20 This book is a re-examination of the fertile years of early modernism immediately preceding the First World War. During this period how, where and under whose terms the avant-garde in Britain would be constructed and consumed were very much to play for. It is the first study to look in detail at two little magazines marginalised from many accounts of this competitive process: *Rhythm* and *the Blue Review*. By thoroughly examining not only the content but the interrelated networks that defined and surrounded these publications, Faith Binckes aims to provide a fresh and challenging perspective to the on-going reappraisal of modernism. Founded in 1911 and edited by John Middleton Murry with assistance from Michael Sadleir and subsequently from Katherine Mansfield, *Rhythm* and *The Blue Review* featured a series of pivotal moments. *Rhythm* was the arena for a challenge to Roger Fry's vision of Post-Impressionism for the introduction of Picasso to a British audience; for early short stories and reviews by Lawrence; and for Mansfield's discovery of a voice in which to frame her breakthrough writing on New Zealand. A further context for many of these experiments was the extended and acrimonious debate *Rhythm* conducted with A. R. Orage's *New Age* in which issues of the proper gender, generation and formulation of modernity were debated month by month. However, reading magazines as vehicles for avant-garde development can only provide half the story. The book also pays close attention to their dialogic, reproductive and periodical nature and explores the strategies at work within the terminology of the new. Crucially, it argues that they offer compelling material evidence for the consistently mobile and multiple boundaries of the modern and puts forward a compelling case for focusing upon the specificity of magazines as a medium for literary and artistic innovation.

Form and Modernity in Women's Poetry, 1895-1922 Sarah Parker, 2024-02-29 While W. B. Yeats's influential account of the Tragic Generation claims that most fin de siècle poets died or at least stopped writing shortly after 1900, this book explodes this narrative by attending to the twentieth-century poetry produced by women poets: Alice Meynell, Michael Field, Katharine Bradley and Edith Cooper, Dollie Radford and Katharine Tynan. While primarily associated with the late nineteenth century, these poets were active in the twentieth century but their later writing is overlooked in modernist-dominated studies, partly due to this poetry's adherence to traditional form. This book reveals that these poets far from being irrelevant to modernity used these established forms to address contemporary concerns including suffrage, sexuality, motherhood and the First World War. The chapters focus on Meynell's manipulations of metre to contemplate temporality and literary tradition; Michael Field's use of blank verse to portray the conflicted modern woman; Radford's adaptation of the aesthetic song-like lyric to tackle the experience of the city, urban crime and suffrage; and Tynan's employment of the ballad to soothe bereaved mothers during the First World War. This book ultimately shows that traditional forms played a vital role in shaping mature women poets' responses to modernity, illuminating debates about form, tradition and gender in twentieth-century poetry. C. Day-Lewis: *The Golden Bridle* Albert Gelpi, Bernard O'Donoghue, 2018-01-26 C. Day-Lewis was a major figure in British poetry

and culture from the 1930s until his death in 1972 *The Golden Bridle Selected Prose* takes its title from the myth of Bellerophon and the golden bridle of Pegasus which Day Lewis invoked on several occasions as a metaphor for the creative process Day Lewis as poet is then the organizing idea of this anthology and the selections indicate the scope and range of his vital engagement with English life and letters Organised into four parts the volume illustrates Day Lewis's reflections on the role and function of poetry in society and culture the creative process and the workings of the imagination as well as the nature of poetic truth and its relation to science poets who were of particular importance to Day Lewis and the poetic process in relation to the composition of several of his own poems The notes indicate the particular source circumstances and central issues of each piece to provide a brief intellectual biography and critical account of this eminent poet's development and standing

A History of Modernist Poetry Alex Davis, Lee M. Jenkins, 2015-04-27 *A History of Modernist Poetry* examines innovative anglophone poetries from decadence to the post war period The first of its three parts considers formal and contextual issues including myth politics gender and race while the second and third parts discuss a wide range of individual poets including Ezra Pound T S Eliot W B Yeats Mina Loy Gertrude Stein Wallace Stevens William Carlos Williams and Marianne Moore as well as key movements such as Imagism Objectivism and the Harlem Renaissance This book also addresses the impact of both World Wars on experimental poetries and the crucial role of magazines in disseminating and proselytizing on behalf of poetic modernism The collection concludes with a wide ranging discussion of the inheritance of modernism in recent writing on both sides of the Atlantic

Bohemia in London P. Brooker, 2004-01-23 This original study discovers the bourgeois in the modernist and the dissenting style of Bohemia in the new artistic movements of the 1910s Brooker sees the bohemian as the example of the modern artist at odds with but defined by the codes of bourgeois society It renews once more the complexities and radicalism of the modernist challenge

Automatic Timothy Wientzen, 2021-08-31 A fascinating study of how behavioral science shaped twentieth century politics and the modernist literary period The advent of the twentieth century famously brought about new personal and political freedoms including radical changes in voting rights and expressions of gender and sexuality Yet writers and cultural critics shared a sense that modern life reduced citizens to automatons capable of interacting with the world in only the most reflexive ways In Automatic Timothy Wientzen asks why modernists were deeply anxious about the role of reflexive behaviors and the susceptibility of bodies to physical stimuli in the new political structures of the twentieth century Engaging with historical thinking about human behaviors that fundamentally changed the nature of political and literary practice Wientzen demonstrates the ways in which a politics of reflex came to shape the intellectual and cultural life of the modernist era Documenting some of the ways that modernist writers and their contemporaries mapped harnessed and

intervened in a political sphere dominated by conditioned reflexes Wientzen reads writers like D H Lawrence Rebecca West Wyndham Lewis and Samuel Beckett in conversation with fields that include public relations physiology sociology and vitalism Ultimately he justifies a reckoning with some of the most enduring preoccupations of modernist studies Automatic further emphasizes the role of politics and science in the aesthetic projects of modernist writers At a moment when political enfranchisement and the mass media promised new modes of freedom agency and choice Wientzen argues that the modernist era was beset by apprehension about the conscription of liberty through the conditioning force of everyday life Analyzing such thinking through a neglected archive about embodiment and reflex reveals modernists responding to the historically novel conditions of political life in the twentieth century conditions that have become entrenched in the politics of our own century

Radical Empiricists Helen Thaventhiran, 2015 *Radical Empiricists* presents a new history of criticism in the first half of the twentieth century against the backdrop of the modernist crisis of meaning Our received idea of modernist criticism is that its novelty lay in being very empirical critics believed in looking closely at words on the page Such close reading has since been easy to ridicule but this book seeks to consider whether this is fair have we in the rush either to dismiss or even to defend the idea of close reading often failed to look closely at what it involves in practice Against this oversight *Radical Empiricists* turns close reading back on itself proposing some innovative readings of the prose of five major modernist poet critics I A Richards T S Eliot William Empson R P Blackmur and Marianne Moore The book is divided into two parts preceded by an introduction that explores what these five writers share a radical self consciousness about the key critical concept meaning Part I How to read considers the prose techniques of Eliot Richards and Empson as they push at the boundaries of verbal analysis in other disciplines experimental psychology and anthropology classical commentary and textual criticism Part II introduces Blackmur and Moore alongside Empson and takes a more polemical look at how their critical styles defy various modernist orthodoxies about how not to read for example that paraphrase always destroys poetic meaning Many of these orthodoxies remain current re visiting their history and attending to the rich detail of critical prose styles can allow us to lift some old unreflective constraints on our ways of knowing about poems
